Rethinking Curriculum in Times of Shifting Educational Context Kaustuv Roy, 2017-07-25 This book engages with the dynamic intersection of several domains such as philosophy, psychology, sociology, and pedagogy, in order to critically analyze and reinvent our understanding of curriculum. The chapters raise important questions such as: what are the conditions of possibility for a living curriculum in which Eros and intellect (or reason and intuition) are not separated? How is it possible to escape ideology that keeps us bound to defunct categories? What are the ingredients of an inquiry that is able to grasp curriculum as an expanding interpersonal movement? How do the teacher-learner ensemble get creatively constituted beyond obstructive dualities? How can we reinvent meaning in curriculum without totalization? Which indigenous understandings can be recovered in order to reinvent curriculum with greater relevance for diverse peoples? This volume addresses elements of reason, nonreason, becoming, dissipation, violence, uncertainty, transcendence, love, and death in order to come to a critical understanding of the relationship between knowledge and knower from these multiple perspectives.

Educating in Dialog Sebastian Feller, Ilker Yengin, 2014-11-14 Educating in Dialog: Constructing meaning and building knowledge with dialogic technology contains a collection of new articles on the relationship of learning, dialog and technology. The articles combine different views of dialogic learning stemming from a multiplicity of discipline backgrounds and research interests including educational design, educational science, epistemology, cognitive linguistics, cultural studies, and mobile learning, to name a few. The authors discuss and explore a variety of topics that range from knowledge building over learning communities to dialogic technologies for knowledge co-construction. Discussing technology and learning against this broad background is indispensable, as the gap between what learners actually need for successful learning and what current technology offers becomes increasingly wide. This book provides thought-provoking views of recent developments in the area of technology supported learning for everyone who is interested in educational technologies, collaborative learning, and dialog.

Learning Unleashed Evonne E. Rogers,2016-08-30 Children enter the world curiously hard-wired for creativity and imagination. After a few short years of school, something drastically changes for them. Why? There is an unmistakable and deliberate attempt to control the learning of young people who find themselves sitting in our schools. The industrial model of schooling has taken its toll and victims without remorse. It programs curious young minds to become helpless, dependent, and compliant. It is manipulation and malpractice, but few seem to notice or care. After years of observing and participating in some of these questionable practices herself, Evonne decided it was time to tell the truth about schools. With a credible and strong voice, Evonne tackles the “sacred school rituals” that are rarely questioned and widely accepted as normal. She transparently leads the reader through firmly-held and often faulty assumptions about schooling practices. She offers common sense solutions that challenge us to re-imagine how we do school in this country. With strong conviction, passion, and a call to action, she encourages us to hear and listen to the voices of our children who are crying out for the freedom to learn.

Einstein in His Own Words: 100+ Quotes (Albert Einstein Quotes) Markkus Rovito,2012-04-04 ABOUT THE BOOK Albert Einstein was born in 1879. By the time of his death in 1955, the world Einstein was born into would be completely

foreign to him. Scientific breakthroughs and advancement over the 76 years of his life permanently changed the world. While Einstein was regarded as brilliant by both his contemporaries and predecessors, Einstein had a humble assessment of his mental faculties. Einstein published his theory of relativity in 1905, at the tender age of 26, and years later it was all but validated by the scientific community at large. Yet, the source of his greatest triumph also lead to his greatest sources of consternation. MEET THE AUTHOR Markkus took a degree in journalism and ran with it, covering topics such as music, technology, business, health and the future for a variety of print and online publications, including Remix, MaximumPC, DJ Tech Tools, Charged EVs, San Francisco Business Times, Philadelphia Weekly, Mac | Life, MacHome, Electronic Musician, and others. He likes to make music, funny voices, and people's days. He generally keeps a baseline healthy lifestyle going, and then experiments from there. Other interests include world travel, world shifts, and world non-domination. As a rule, he's more well rounded than he used to be. He's also currently training for a half marathon, and when finished will be halfway proud. <http://www.facebook.com/markkus.rovito> Twitter: @treefitty EXCERPT FROM THE BOOK It is just as important to make knowledge live and to keep it alive as to solve specific problems. Contact between the intellectual and the masses must not be lost. It is necessary for the elevation of society and no less so for renewing the strength of the intellectual worker; for the flower of science does not grow in the desert. I am only coming to Princeton to research, not to teach. There is too much education altogether, especially in American schools. The only rational way of educating is to be an example—of what to avoid, if one can't be the other sort. The wonderful things you learn in your schools are the work of many generations, produced by enthusiastic effort and infinite labour in every country of the world. All this is put into your hands as your inheritance in order that you may receive it, honor it, add to it, and one day faithfully hand it on to your children. Thus do we mortals achieve immortality in the permanent things which we create in common. ...buy the book to read more exclusive quotes!!
