The Cambridge Handbook of Consumer Privacy Evan Selinger,Jules Polonetsky,Omer Tene,2018-04-02 Businesses are rushing to collect personal data to fuel surging demand. Data enthusiasts claim personal information that's obtained from the commercial internet, including mobile platforms, social networks, cloud computing, and connected devices, will unlock path-breaking innovation, including advanced data security. By contrast, regulators and activists contend that corporate data

practices too often disempower consumers by creating privacy harms and related problems. As the Internet of Things matures and facial recognition, predictive analytics, big data, and wearable tracking grow in power, scale, and scope, a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis. The only productive way forward is to get a grip on the key problems right now and change the conversation. That's exactly what Jules Polonetsky, Omer Tene, and Evan Selinger do. They bring together diverse views from leading academics, business leaders, and policymakers to discuss the opportunities and challenges of the new data economy.

Patient Zero and the Making of the AIDS Epidemic Richard A. McKay, 2017-11-22 Now an award-winning documentary feature film The search for a “patient zero”—popularly understood to be the first person infected in an epidemic—has been key to media coverage of major infectious disease outbreaks for more than three decades. Yet the term itself did not exist before the emergence of the HIV/AIDS epidemic in the 1980s. How did this idea so swiftly come to exert such a strong grip on the scientific, media, and popular consciousness? In *Patient Zero*, Richard A. McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries-old ideas—and fears—about contagion and social disorder. McKay presents a carefully documented and sensitively written account of the life of Gaétan Dugas, a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV/AIDS epidemic developed—and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak. McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis; how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS; and how many individuals grappled with the notion of patient zero—adopting, challenging and redirecting its powerful meanings—as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic. With important insights for our interconnected age, *Patient Zero* untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats. What McKay gives us here is myth-smashing revisionist history at its best.

Bereavement Care for Families David W. Kissane, Francine Parnes, 2014-01-03 Grief is a family affair. When a loved one dies, the distress reverberates throughout the immediate and extended family. Family therapy has long attended to issues of loss and grief, yet not as the dominant therapeutic paradigm. Bereavement Care for Families changes that: it is a practical resource for the clinician, one that draws upon the evidence supporting family approaches to bereavement care and also provides clinically oriented, strategic guidance on how to incorporate family approaches into other models. Subsequent chapters set forth a detailed, research-based therapeutic model that clinicians can use to facilitate therapy, engage the ambivalent, deal with uncertainty, manage family conflict, develop realistic goals, and more. Any clinician sensitive to the roles family members play in bereavement care need look no further than this groundbreaking text.
