**How Not to Age** Michael Greger, M.D., FACLM, 2023-12-05 Instant New York Times Bestseller Uncover the evidence-based science to slowing the effects of aging, from the New York Times bestselling author of the How Not to Die series When Dr. Michael Greger, founder of NutritionFacts.org, dove into the top peer-reviewed anti-aging medical research, he realized that diet could regulate every one of the most promising strategies for combating the effects of aging. We don't need Big Pharma to keep us feeling young—we already have the tools. In *How Not to Age*, the internationally renowned physician and nutritionist breaks down the science of aging and chronic illness and explains how to help avoid the diseases most commonly encountered in our journeys through life. Physicians have long treated aging as a malady, but getting older does not have to mean getting sicker. There are eleven pathways for aging in our bodies' cells and we can disrupt each of them. Processes like autophagy, the upcycling of unusable junk, can be boosted with spermidine, a compound found in tempeh, mushrooms, and wheat germ. Senescent “zombie” cells that spew inflammation and are linked to many age-related diseases may be cleared in part with quercetin-rich foods like onions, apples, and kale. And we can combat effects of aging without breaking the bank. Why spend a small fortune on vitamin C and nicotinamide facial serums when you can make your own for up to 2,000 times cheaper? Inspired by the dietary and lifestyle patterns of centenarians and residents of “blue zone” regions where people live the longest, Dr. Greger presents simple, accessible, and evidence-based methods to preserve the body functions that keep you feeling youthful, both physically and mentally. Brimming with expertise and actionable takeaways, *How Not to Age* lays out practical strategies for achieving ultimate longevity.

*Honoring Elders* Michael D. McNally, 2009-08-06 Like many Native Americans, Ojibwe people esteem the wisdom, authority, and religious significance of old age, but this respect does not come easily or naturally. It is the fruit of hard work, rooted in narrative traditions, moral vision, and ritualized practices of decorum that are comparable in sophistication to those of Confucianism. Even as the dispossession and policies of assimilation have threatened Ojibwe peoplehood and have targeted the traditions and the elders who embody it, Ojibwe and other Anishinaabe communities have been resolute and

resourceful in their disciplined respect for elders. Indeed, the challenges of colonization have served to accentuate eldership in new ways. Using archival and ethnographic research, Michael D. McNally follows the making of Ojibwe eldership, showing that deference to older women and men is part of a fuller moral, aesthetic, and cosmological vision connected to the ongoing circle of life a tradition of authority that has been crucial to surviving colonization. McNally argues that the tradition of authority and the authority of tradition frame a decidedly indigenous dialectic, eluding analytic frameworks of invented tradition and naïve continuity. Demonstrating the rich possibilities of treating age as a category of analysis, McNally provocatively asserts that the elder belongs alongside the priest, prophet, sage, and other key figures in the study of religion.

**The Detox Book, 3rd Edition** Bruce Fife,2017-08-14 We live in a toxic world. Environmental pollution and disease-causing germs assault us continually day after day. Our food is nutrient deficient and our water supply dangerously contaminated. People today are exposed to chemicals in far greater concentrations then were previous generations. Thousands of tons of man-made chemicals and industrial pollutants are poured into our environment and our food supply daily. With such a massive attack on our health we should all be sick from toxic overload. And we are! In no other time in the history of the world has degenerative disease been as prominent as it is today. Diseases that were rare or unheard of a century ago are now raging upon us like a plague. Millions are dying from diseases that were virtually unknown in the past. Experts tell us that by the time we reach middle age, each one of us will have already been affected by either cancer, cardiovascular disease, or some other serious degenerative condition. Conventional medicine has no sure cure. Drugs,

surgery, and radiation treatments can be as dangerous and debilitating as the diseases they attempt to cure. Nature, however, has provided us with the solution. Our bodies are amazingly resilient. If the disease-causing toxins are removed, the body will heal itself. This book outlines the steps you need to take to thoroughly detoxify and cleanse your body from these disease-causing agents. You will also learn how to reduce your toxic exposure and how to strengthen your immune system. Through detoxification you will free yourself from the chains of pain, reverse degenerative conditions, gain more energy, feel and look younger, improve your memory, and be happier. Virtually all the diseases of modern society, including many infectious illnesses, can be avoided or even cured by sensible systematic detoxification. Although we live in a toxic world we can take control of our health. This book will show you how. "The Detox Book is highly recommended for health reference collections." —The Midwest Book Review "A comprehensive handbook of detoxification therapies... Chapters give extensive background information on each subject, reports of research, and precise, detailed instructions for self-administration...An encyclopedic look at how we can care for and cleanse our amazingly resilient bodies." —Booklist American Library Association "The Detox Book is an excellent primer on cleansing the body. It provides everything you need to know about detoxification, why you must detoxify, and how to get the best results. I highly recommend this down-to-earth and approachable book as the first step along your journey to health." —Michelle Cook, Health 'N Vitality
