Invitation to the Life Span Kathleen Stassen Berger,2009-11-23 Check out a preview. KATHLEEN STASSEN BERGER's bestselling textbooks are un-matched for the engrossing, culturally inclusive way they communicate the essential science of human development. But that does not even begin to convey what the Berger experience is: What makes these bestselling textbooks so distinctive is the unmistakable presence of KATHLEEN STASSEN BERGER on every page, in writing that continually draws on the author's teaching and family life to demonstrate a remarkable understanding not just of the field, but of students' questions, their concerns, and their lives. The distinctive, definitive BERGER touch is evident throughout her new textbook, *Invitation to the Life Span*. This brief, original, 15-chapter textbook was created from page 1 to address the challenges teachers and students face when covering the entire life span in a semester (or even a quarter!). The hallmark Berger qualities are all here—the relatable presentation of research, the inclusive approach to world cultures, the study help that builds critical thinking and observational skills, the outstanding media and supplements—and all held together with Berger's skill in bringing students and the science together.

Spiritual Intelligence Raymond F. Paloutzian,2014-10-13 First published in 2000. This is Volume 10, No 1 of the

International Journal for the Psychology of Religion. One of the most important concepts in the history of psychology is intelligence. Traditionally, intelligence has been thought of as a more or less unitary mental capacity, connoting a general problem-solving ability and skill at abstract reasoning. More recently, a major counter-argument to the idea that intelligence is unitary was published by Howard Gardner (1993) In his view, intelligence is not a unitary construct but instead is multidimensional, comprised of linguistic, musical, logical-mathematical, spatial, bodily-kinesthetic, interpersonal, and intrapersonal facets. Since then, a dialogue has continued about what does and does not constitute an intelligence. This journal is a collection of essays that discuss this question.
