*Aging and Human Nature* Mark Schweda, Michael Coors, Claudia Bozzaro, 2020-01-11 This book focuses on ageing as a topic of philosophical, theological, and historical anthropology. It provides a systematic inventory of fundamental theoretical questions and assumptions involved in the discussion of ageing and old age. What does it mean for human beings to grow old and become more vulnerable and dependent? How can we understand the manifestations of ageing and old age in the human body? How should we interpret the processes of change in the temporal course of a human life? What impact does old age have on the social dimensions of human existence? In order to tackle these questions, the volume brings together internationally distinguished scholars from the fields of philosophy, theology, cultural studies, social gerontology, and ageing studies. The collection of their original articles makes a twofold contribution to contemporary academic discourse. On one hand, it helps to clarify and deepen our understanding of ageing and old age by examining it from the fundamental point of view of philosophical, theological, and historical anthropology. At the same time, it also enhances and expands the discourses of philosophical, theological, and historical anthropology by systematically taking into account that human beings are essentially ageing creatures.

*The Stuff of Science Fiction* Gary Westfahl, 2022-10-07 While students and general readers typically cannot relate to esoteric definitions of science fiction, they readily understand the genre as a literature that characteristically deals with subjects such as new inventions, space, robot and aliens. This book looks at science fiction in precisely this manner, with twenty-one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries. Based on a packet of original essays that the author assembled for his classes, the book could serve as a supplemental textbook in science fiction classes, but also contains material of interest to science fiction scholars and others devoted to the genre. In some cases, chapters offer thorough surveys of numerous works involving certain subjects, such as imagined vehicles, journeys beneath the Earth and undersea adventures, discovering intriguing patterns in the ways that various writers developed their ideas. When comprehensive coverage of ubiquitous topics such as robots, aliens and the planet Mars is impossible, chapters focus on major themes referencing selected texts. A conclusion discusses other science fiction subjects that were omitted for various reasons, and a bibliography lists additional resources for the study of science fiction in general.

and the topics of each chapter.

A Biographical Dictionary of Silent Film Western Actors and Actresses George A. Katchmer,2002 Long before sound became an essential part of motion pictures, Westerns were already an established genre. The men and women who brought to life cowboys, cowgirls, villains, sidekicks, distressed damsels and outraged townspeople often continued with their film careers, finding success and fame well into the sound era--always knowing that it was in silent Westerns that their roads to film success began.Over one thousand of these once-silent Western players are featured in this encyclopedia work. The actors are listed alphabetically by last name, and each entry includes a detailed biography, covering both personal and professional milestones in the performer's life. Also included for each actor is a complete Western filmography. The biographies are preceded by a foreword by Diana Serra Cary (formerly the child star Baby Peggy), who performed with many of those included in this dictionary. Full indexing is included.
