**Subtitling Through Speech Recognition** Pablo Romero-Fresco, 2020-09-30 Based on sound research and first-hand experience in the field, *Subtitling through Speech Recognition: Respeaking* is the first book to present a comprehensive overview of the production of subtitles through speech recognition in Europe. Topics covered include the origins of subtitling for the deaf and hard of hearing, the different methods used to provide live subtitles and the training and professional practice of respeaking around the world. The core of the book is devoted to elaborating an in-depth respeaking course, including the skills required before, during and after the respeaking process. The volume also offers detailed analysis of the reception of respeaking, featuring information about viewers' preferences, comprehension and perception of respoken subtitles obtained with eye-tracking technology. Accompanying downloadable resources feature a wealth of video clips and documents designed to illustrate the material in the book and to serve as a basis for the exercises included at the end of each chapter. The working language of the book is English, but the downloadable resources also contain sample material in Dutch, French, Galician, German, Italian and Spanish. *Subtitling through Speech Recognition: Respeaking* is designed for use as a coursebook for classroom practice or as a handbook for self-learning. It will be of interest to undergraduate and postgraduate students as well as freelance and in-house language professionals. It will also find a reading public among broadcasters, cinema, theatre and museum managers, as well as the deaf and members of deaf associations, who may use the volume to support future campaigns and enhance the quality of the speech-to-text accessibility they provide to their members.

*The Education Invasion* Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education

scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

**The Dumbest Generation Grows Up** Mark Bauerlein, 2022-02-01 From Stupefied Youth to Dangerous Adults Back in 2008, Mark Bauerlein was a voice crying in the wilderness. As experts greeted the new generation of “Digital Natives” with extravagant hopes for their high-tech future, he pegged them as the “Dumbest Generation.” Today, their future doesn’t look so bright, and their present is pretty grim. The twenty-somethings who spent their childhoods staring into a screen are lonely and purposeless, unfulfilled at work and at home. Many of them are even suicidal. The Dumbest Generation Grows Up is an urgently needed update on the Millennials, explaining their not-so-quiet desperation and, more important, the threat that their ignorance poses to the rest of us. Lacking skills, knowledge, religion, and a cultural frame of reference, Millennials are anxiously looking for something to fill the void. Their mentors have failed them. Unfortunately, they have turned to politics to plug the hole in their souls. Knowing nothing about history, they are convinced that it is merely a catalogue of oppression, inequality, and hatred. Why, they wonder, has the human race not ended all this injustice before now? And from the depths of their ignorance rises the answer: Because they are the first ones to care! All that is needed is to tear down our inherited civilization and replace it with their utopian aspirations. For a generation unacquainted with the constraints of human nature, anything seems possible. Having diagnosed the malady before most people realized the patient was sick, Mark Bauerlein surveys the psychological and social wreckage and warns that we cannot afford to do this to another generation.

**Projecting Migration** Alan Grossman, Áine O'Brien, 2007 Migration has rapidly become a fundamental component of modern life and increasingly determines who we are and how we define ourselves today. Projecting Migration is a groundbreaking multimedia book/DVD-ROM project that attempts to understand the phenomena of mobility and displacement through essays, films, photography and audio recordings. Contributors have been on the ground in locations as diverse as the US/Mexico border, southern Africa, Lebanon and Ireland, and each chapter is linked with DVD chapters of original footage, resulting in a dynamic account of migrant narratives which circumvent the distorting lens of news journalism. This cross-media collection created in collaboration with the Centre for Transcultural Research and Media Practice at the Dublin Institute of Technology marks a major transdisciplinary contribution to contemporary debates on migration--Publisher's website.

**Bridging English** Joseph O'Beirne Milner, Lucy Floyd Morcock Milner, 2008 Bridging English, fourth edition, is a comprehensive English methods text that is structured on James Moffett's conception of the universe of discourse in the teaching of English: talking and listening, writing and reading. The textbook combines theory and practice, that is, overarching structures with particular instructional strategies. It provides prospective teachers with a huge array of approaches and activities that are active, constructivist, and student-centered. It mirrors that emphasis with boxed Invitations to Reflection that continually survey its readers about their experiences of English classrooms, their new learnings as they read the text, and their projection into classroom teaching of their own. It takes into account the range of student learners a teacher will teach from the gifted to the reluctant and struggling. It addresses the special needs of English language learners. It also anticipates the need of its readers prospective teachers to put theory and method into practice by designing and delivering effective units and lessons. In several chapters on pedagogy, it helps them answer questions such as: How do I actually teach writing? design a unit? evaluate student learning? This edition also addresses many of the most persistent issues that arise within the field, issues that bubble up in individual classrooms, English departments, and school communities and in the general culture.

*Background Knowledge* Douglas Fisher, Nancy Frey, 2009 Why background knowledge? Because the Grapes of Wrath is dry reading if students don't know about the Dust Bowl. Because the Boston Tea Party is a non-event if students don't know loyalists from patriots. Because knowing a triangle has 180 degrees isn't the same as knowing why. Because content-area comprehension depends on it, you and your students need Background Knowledge. Douglas Fisher and Nancy Frey help you develop lasting subject-area understanding with ideas for modeling, guided practice, productive group work, and independent work that effectively engage adolescents. You'll learn to: distinguish incidental knowledge from core background knowledge check students' understanding prior to a unit with tools such as opinionnaires, interest surveys, and

anticipation guides model how to activate and apply prior knowledge so kids can wrestle with new content build up students' background knowledge through virtual fieldtrips, YouTube, guest experts, and more provide collaborative ways for students to develop expertise, show what they know, and own their learning. Doug and Nancy also build your background knowledge with multimedia book-study resources at [www.heinemann.com/backgroundknowledge](http://www.heinemann.com/backgroundknowledge). As teachers our job is not to simply fill students' heads with facts, write Doug Fisher and Nancy Frey. We need to have students manipulate and apply information so that it becomes a permanent understanding. That's why the time is now for Background Knowledge.

The Law Professor's Handbook Madeleine Schachter,2004 The Law Professor's Handbook is designed as a guide for those who are transitioning to, engaged in, or contemplating a law school faculty position. Simply because an attorney mastered a substantive area of the law, refined his advocacy or negotiation skills, and has extensive experience in analytical thought, writing, and other scholarly pursuits, doesn't necessarily mean that he's prepared to educate others. Schachter offers information about the application process and factors to take into account in choosing amongst offers of faculty appointment. There's information about designing a course, crafting a syllabus, and choosing textual materials. In an effort to facilitate review of matters of particular interest, headings, a table of contents, and a detailed index have been included. Cross-references have also been incorporated to enable additional textual review. I was impressed with the practical advice that The Law Professor's Handbook offered for a variety of situations. As Academic Dean, I had it distributed to many of our most involved adjuncts... They were grateful for the information, and their feedback was overwhelmingly positive. We plan to continue distributing it to adjuncts and new faculty in the future. -- Gregory Sergienko, Associate Dean of Academics and Professor of Law at Western State University
