**Japanese Castles in Korea 1592-98** Stephen Turnbull,2012-10-20 The Japanese invasion and occupation of Korea, which lasted from 1592 to 1598, was the only occasion in Japanese history when samurai aggression was turned against a foreign country. During the occupation of Korea the Japanese built 25 wajo or castles. Unlike the castles built in Japan, these fortifications were never developed or modernized after the Japanese departure. The details of late 16th-century castle construction are therefore better preserved than at many other sites. Written by Stephen Turnbull, an expert in the subject, this book examines the castles built by the Japanese in Korea, as well as the use made of existing Korean fortifications, particularly city walls. This resulted in curious hybrid fortifications that dominated the landscape until the Japanese were pushed out of the peninsula by a furious onslaught from huge Chinese armies.

**Earth Shapers** Maxim Samson,2025-10-13 The globetrotting story of how humans have harnessed the geographical landscape and written ourselves onto our surroundings. Mountains, meridians, rivers, and borders—these are some of the features that divide the world on our maps and in our minds. But geography is far less set in stone than we might believe, and, as Maxim Samson's *Earth Shapers* contends, in our relatively short time on this planet, humans have become experts at fundamentally reshaping our surroundings. From the Qhapaq Ñan, the Inca's "great road," and Mozambique's colonial railways to a Saudi Arabian smart city, and from Korea's sacred Baekdu-daegan mountain range and the Great Green Wall in Africa to the streets of Chicago, Samson explores how we mold the world around us. And how, as we etch our needs onto the natural landscape, we alter the course of history. These fascinating stories of connectivity show that in our desire to make geographical connections, humans have broken through boundaries of all kinds, conquered treacherous terrain, and carved up landscapes. We crave linkages, and though we do not always pay attention to the in-between, these pathways—these ways of "earth shaping," in Samson's words—are key to understanding our relationship with the planet we call home. An immense work of cultural geography touching on ecology, sociology, history, and politics, *Earth Shapers* argues that, far from being constrained by geography, we are instead its creators.

**Advances in Ergonomics In Design, Usability & Special Populations: Part I** Marcelo Soares,Francisco Rebelo,2022-07-19 Successful interaction with products, tools and technologies depends on usable designs and accommodating the needs of potential users without requiring costly training. In this context, this book is concerned with emerging ergonomics in design

concepts, theories and applications of human factors knowledge focusing on the discovery, design and understanding of human interaction and usability issues with products and systems for their improvement. This book will be of special value to a large variety of professionals, researchers and students in the broad field of human modeling and performance who are interested in feedback of devices' interfaces (visual and haptic), user-centered design, and design for special populations, particularly the elderly. We hope this book is informative, but even more - that it is thought provoking. We hope it inspires, leading the reader to contemplate other questions, applications, and potential solutions in creating good designs for all.

**Geopolitics, Military Modernisation and the Future of the Indo-Pacific** Bates Gill,Adam Lockyer,Yves-Heng Lim,Andrew T. H. Tan,2024-08-02 This book examines to what extent geopolitics explains the current wave of force modernisation in the Indo-Pacific region. Examining the leading Indo-Pacific nations in terms of defence spending: the United States, China, India, Japan, South Korea, Australia, Taiwan, Singapore, Pakistan, Indonesia and Thailand, geopolitical principles are used to create hypotheses that can be tested against the military modernisation programmes of the major actors in the Indo-Pacific region. The book represents a bridge between reference works and the literature on international politics in the Indo-Pacific. The empirical chapters provide qualitative narratives that explore the force postures, military modernisation and procurement patterns of the cases, and assess why these nations' military modernisation has followed particular courses and evaluate this evidence against the expectations of geopolitics and its rivals. This book will be a valuable addition to scholars, practitioners and, indeed, anyone interested in the future stability of one of the world's most important and dynamic regions.

**Spontaneous Combustion** Jason Del Gandio,AK Thompson,2017-08-28 From the events of May 1968 to the Arab Spring and Occupy, we have seen social movements develop spontaneously around the globe propelling thousands and, at times, millions of people into the streets to demand an end to oppression. In order to make sense of such events, the authors draw on George Katsiaficas's conception of the 'eros effect,' which picks up and takes off from concepts developed by Herbert Marcuse. This effect describes moments in which the instinctual human need for justice and freedom undergoes a massive spontaneous awakening. Drawing on Marcuse, the concept foregrounds the instinctual foundation of the desire for freedom, in which a biologically-based pleasure drive—eros—is given free play. — from the Foreword by Peter Marcuse However, even as the eros effect provides a valuable framework for understanding spontaneous global uprisings, Katsiaficas has acknowledged that the concept has remained underdeveloped. *Spontaneous Combustion* provides an introduction to the eros effect along with a series of elaborations, applications, and critical rejoinders concerning its implications. A truly interdisciplinary venture, the book features contributions from cutting-edge scholars and activists on the frontlines of today's struggles.

The Korean Alphabet of 1446 Sek Yen Kim-Cho,2002-08 No Marketing Blurb

*The Korean Alphabet* Young-Key Kim-Renaud,2021-05-25 The Korean alphabet, commonly known as han'gul, has been called one of the greatest intellectual achievements of humankind. Experts agree that few writing systems can match its simplicity and efficiency, its elegance and intelligence. The only alphabet completely native to East Asia, han'gul distinguishes itself among writing systems of the world with its scientific qualities and unusual linguistic fit to the Korean language. Most strikingly, the theoretical underpinnings of the language, as well as the time and circumstances of its creation, are clearly known and recorded. Han'gul was invented in 1443 and promulgated in 1446 by King Sejong (1418-1450), sage ruler of the Yi dynasty (1392-1910). This volume, the first book-length work on han'gul in English by Korean-language specialists, is comprised of ten essays by the most active scholars of the Korean writing system. An instructive commentary by eminent linguist Samuel Martin follows, offering perceptive comments on the essays as well as a discussion on Martin's own research findings on the script.
