Alexander Keith Johnston

The Ancient Bosnian Pyramids Charles River Editors, 2016-08-30 *Includes pictures *Includes theories and explanations regarding the structures *Includes online resources for further reading Ten years from now nobody will remember my critics, and a million people will come to see what we have done. - Semir Osmanagich There are hundreds of pyramid-shaped hills distributed in and around central Bosnia and Herzegovina, yet one in particular has achieved worldwide attention over the last decade. Found in the small town of Visoko, located about thirty kilometres northwest from Sarajevo, the hill is the tallest point in a landscape of tremendous historical importance for the country. The region has been occupied from prehistoric times. Rich in natural resources, the area was extensively quarried for metal ore and stone over many periods. In the medieval period (twelfth to fifteenth centuries CE), this area became the centre of the Kingdom of Bosnia. It was here that the first king of Bosnia, Tvrtko I, was crowned in 1377 CE. During this time the large hill became known as Visocica, and a fortress was constructed upon its summit. From 1463, the Ottomans controlled them, and under their rule, many towns were founded, including Visoko which experienced a surge of economic development and cultural activity and became one of the richest towns in Bosnia. The town was of key importance in Bosnia's modern history, serving as a stronghold for Bosniak forces during conflict in the 1990s. However, it is not for these reasons that the hill of Visocica is so well-known today. Instead, the focus of attention has been on the controversial claim that it is the largest and oldest man-made pyramid to be found, not only in Europe, but the world. Since 2005, the Bosnian-born American businessman and self-proclaimed archaeologist Semir Osmanagich has promoted a controversial narrative of how-and why-the hill exists. He maintains that Visocica is not a natural feature, but was made by an ancient Bosniak civilization during the last Ice Age, between ten and twelve thousand years ago. Its substructure is allegedly filled with an intricate network of passageways that connect it to other structures in the surrounding landscape built during the same time. If true, the scale of these pyramids would have required the largest construction works to have ever been performed in prehistory. But this theory has been fiercely criticized by archaeologists, geologists, pyramid experts, journalists, and countless other academics and non-academics. Many scientific specialists and laypersons have gone to Visoko to see the site with their own eyes, and reported that there is little evidence to suggest the validity of Semir's claims. Furthermore, some of the claims made of the pyramid are borderline science fiction, featuring everything from aliens to the mythical civilization of Atlantis. Through the use of

popular and journalistic media, rather than academic channels, Mr. Osmanagich has garnered the attention of many hundreds of volunteers that come to Visoko each year. Conflicting accounts testify to what takes place. Is legitimate archaeology being carried out, or the creation of a money-making theme park for tourists? Can the Bosnian pyramid be considered genuine, or is this but one example of widespread and pseudoscientific pyramid-mania that occurs across the globe? Why do people believe in the fantastic stories woven around the Pyramid of the Sun, and why is the academic community so critical of this phenomenon? And who, exactly, is Semir Osmanagich, without whom this story would not exist? *The Ancient Bosnian Pyramids: The History and Mystery Over the Controversial Pyramids in Bosnia and Herzegovina* chronicles the theories and debates over the landmarks. Along with pictures of important people, places, and events, you will learn about the Bosnian pyramids like never before.

Pyramids John Malam, 2014-12-15 People travel thousands of miles to see the pyramids in Giza, Egypt. Even with the amazing skyscrapers constructed today, these 4,500-year-old wonders remain some of the most astounding structures on Earth. In this well-researched volume, 100 facts about these intriguing buildings and other pyramids will take readers around the world to Egypt, China, Mexico, and even a glass pyramid in Paris, France. Vibrant photographs, interesting activities, and fun quizzes and diagrams will keep readers engaged as they learn about history, culture, architecture, and more.

Sacred Places Europe Brad Olsen, 2007-02-01 Combining current trends, academic theories, and historical insights, this travel guide brings both lesser-known and famous European spiritual locales into perspective by explaining the significance of each sacred site. The cultural relevance, history, and spirituality of each site—including Stonehenge, the Acropolis, Mont Saint Michel, Pompeii, and Saint Peter's Basilica—are explained, creating a moving and artistic travel experience. Each destination—with selections spanning more than 15 countries throughout Europe—is accompanied by easy-to-follow maps and directions.

Archaeology Matters Jeremy A Sabloff, 2016-06-16 Archaeology is perceived to study the people of long ago and far away. How could archaeology matter in the modern world? Well-known archaeologist Jeremy Sabloff points to ways in which archaeology might be important to the understanding and amelioration of contemporary problems. Though archaeologists have commonly been associated with efforts to uncover cultural identity, to restore the past of underrepresented peoples, and to preserve historical sites, their knowledge and skills can be used in many other ways. Archaeologists help Peruvian farmers increase crop yields, aid city planners in reducing landfills, and guide local communities in tourism development and water management. This brief volume, aimed at students and other prospective archaeologists, challenges the field to go beyond merely understanding the past and actively engage in making a difference in the today's world.

Handbook of European Societies Stefan Immerfall, Göran Therborn, 2009-12-01 European integration is one of the most ambitious and socially far-reaching developments in world politics and in world economics. Against growing opposition

and despite increasing social heterogeneity, the European Union continues to expand and to acquire new competences. But to what extent is the self-proclaimed ever closer union among the peoples of Europe a social reality? In which ways is the political European project anchored in social developments? How does social change impinge upon political integration? Societal trends in multi-cultural, multi-ethnic, multi-lingual and socially diverse Europe have never been studied systematically. *Handbook of European Societies: Social Transformations in the 21st Century* sets to rectify this neglect of societal developments in Europe, providing a groundwork for the sociology of European integration. The book portrays social life and social relations in the enlarged Europe, and gives a perspective on the European Union as an evolving social entity. *Handbook of European Societies* is a pioneering source book analyzing the current social patterns on the continent. It covers a representative selection of major topics of social concern and sociological relevance, such as Collective Action, Consumption, Identity, Power Structure, Sexuality, Stratification and Well-being. Each contribution probes key developments in a strictly comparative manner. The Handbook thus offers a detailed look into the intricacies of the national societies of Europe and into the prospect of an emerging European society. The Editors have enlisted leading researchers to synthesize existing knowledge and to make use of many different data sources in a straight-forward style. The contributions stay away from jargon, simple labeling and sweeping assertions. Instead, they provide solid and accessible information on a wide variety of social trends and processes within and across European societies.

Archaeological Fieldwork Opportunities Bulletin Archaeological Institute of America, 2005-02 The Archaeological Fieldwork Opportunities Bulletin (AFOB) is an annual resource designed as an excellent starting point to plan a fieldschool or archaeological vacation. Perfect for a student or the layperson, AFOB provides an extensive list of programmes that offer opportunities to excavate in the United States and abroad. This fully indexed edition contains more than 200 fieldwork opportunities, listed under major geographic regions. Each entry provides essential information about the site, including full contact details, the duration of the excavation, age requirements, applicable fees, and general background information. As in past years, the 2005 AFOB also contains a fully updated list of state archaeologists, state historical preservation officers, and archaeological organisations; all excellent resources from which to receive information about excavations not listed within this publication.
