How to Day Trade for a Living Andrew Aziz, 2016-07-28 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day

trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com. You can ask us questions. Practical, hands-on knowledge. That's How to Day Trade for a Living.

Day trading is a form of trading where trades are opened and closed on the same day, enabling the trader to capitalize on marginal gains earned through the day to day volatility of the market. When you are a day trader, your goal is to identify what stocks are likely to shift into favor that day so that you can conduct your trades accordingly. Generally, day traders will buy their stocks in the morning and hold onto those stocks until later in the day when the marginal gains have accumulated enough to earn a significant profit. Then, they will close the trade by selling the stocks before the end of the day so that they are not left holding any stocks after the market closes. Utilizing the day trading strategy means that your goal is to always be free of stocks in the evening to ensure that you are not exposing yourself to the risk of overnight price changes. As with any form of trading, you want to minimize your risk by never staying in the market longer than you intended to, as doing so could expose you to unforeseen changes that can lead to significant losses. How to Actually Day Trade for a Living Tim Morris,1901 ————— Here's a Secret Other Authors Won't Tell You... ————— Day Trading is Hard and Most Day Trading Educators Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom memberships, video courses, and monthly subscriptions they sell to you! Before we get started, let me first go over what I don't include in this book... • I have no day

trading chatroom which charges your credit card each month for a service you'll never use. • I have no monthly website subscription service for more advanced strategies that are needed to get started, but not included in the book. • I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: —————▼————— • Chapter 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called pro traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. • Chapter 2: Terminology - Here we go over all the terms you'll need to know as we progress to through the book. Volume, chart types, indicators, order types... it's all covered! • Chapters 3 + 4: Pre-Trading Basics - In these chapters, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. I then show you how to set up your trading screen, what time frame to use, and the most beneficial types of stocks to trade. • Chapter 5: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. • Chapter 6: Additional Advice - In the last part of the book, I give you my final bits of advice. This includes how to increase the probability of your trades, using a practice account, and more bits of wisdom I have learned over the years. —————▲————— I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now is your chance to finally learn what it's all about! As a complimentary bonus, only for book buyers, you'll receive my special report titled Crush the Market!
