Al hilo del tiempo Dámaso de Lario,2014-11-03 Al hilo del tiempo recoge los artículos publicados por el autor en los últimos treinta años, estructurados en torno a sus dos principales preocupaciones historiográficas: las Cortes, en especial las del Reino de Valencia, y la burocracia de la España Imperial. La primera parte sitúa las Cortes valencianas en el contexto de la península ibérica y de los parlamentos europeos, y se explican los momentos y circunstancias que llevaron al País Valenciano a aceptar la propuesta de la Unión de Armas del Conde Duque de Olivares en las Cortes de 1626. La segunda parte analiza la función de los colegios mayores españoles como instituciones de mecenazgo para la educación de las elites burocráticas del imperio español y el papel que el Colegio español de Bolonia (Italia) juega en esa dinámica. En la parte final se apuntan temas poco conocidos de una España que todavía conservaba un imperio, como los intentos frustrados de crear una colonia penal española y los esfuerzos de Rafael Altamira en la creación del «americanismo» español. El autor nos invita, por último, a repensar, en base a la experiencia del pasado, la relación de los dos países ibéricos: España y Portugal.

Universidades, colegios, poderes Jorge Correa Ballester,2021-09-06 La investigación sobre la historia de las universidades se incardina en una tradición que profundiza en diversos aspectos: poderes internos y externos -reyes y pontífices-, sus miembros -escolares y doctores-, enseñanzas y estudios, patrimonio, ritos y costumbres. El análisis de la inserción en la sociedad de sus profesores y graduados, de sus saberes, exige especialistas diversos que aporten su conocimiento sobre distintas épocas y disciplinas para el avance de la historiografía sobre las universidades hispanas. En esta labor, el intercambio y la crítica son imprescindibles, así como el contacto con la comunidad científica a través de la lectura y de la relación con otros investigadores. Esta comunidad ha evolucionado, desde las antiguas cátedras jerarquizadas, los grupos de presión y reparto de puestos del pasado a formar sectores abiertos, amplios y flexibles, una especie de

«colegios invisibles» que se reconocen mutuamente sus conocimientos. Este volumen aborda la renovación de los saberes históricos e histórico-jurídicos sobre la enseñanza superior, tanto de las facultades del Antiguo Régimen como de la universidad contemporánea, descubriendo, gracias a un trabajo que se apoya en esfuerzos anteriores, nuevos planos e implicaciones. Los temas referidos al derecho quedan, además, en primer plano: facultades, enseñanzas, doctrinas, manuales, estatutos de las instituciones y los colegios universitarios, etc.

Cathedrals of Learning Blaise Cronin,2016-08-09 Cathedrals of Learning: Great and Ancient Universities of Western Europe provides a conspectus of the great Western European universities, pithily tells their life stories, showcases their architectural heritage, and describes the art, literary, and natural history collections they have accumulated over the centuries. This book profiles the ancient universities and their distinctive organizational cultures, reveals their customs, ceremonies, and traditions, their quirks and quiddities, recounts their complicated histories, describes their architectural wonders (libraries, museums, anatomy theaters, botanical gardens) and treasures (rare manuscripts, antiquities, paintings, and objects d'art of all kinds), and introduces their famous alumni, distinguished scholars, Nobel Prize-winning scientists, and famously eccentric personalities. It is a book for scholars, researchers, and anyone interested in these ancient institutions that remain centers of learning in the contemporary world. - Contains a collection of mini biographies, pen portraits of some of the world's most venerable universities - Offers twelve institutional biographies that can be used to compare universities and their complex histories - Written in an easy and rigorous style, with accessible coverage - Compiled by a leading figure in information science, with a wide experience of great universities and the trends with which they are associated
