The Future of Education. Advantages and Disadvantages of Online Education D.M.C. Wayne,2018-05-14
Academic Paper from the year 2018 in the subject Didactics - Common Didactics, Educational Objectives, Methods, , language: English, abstract: This work focuses on Future Education and its characteristics. Thereby it will have a closer look at the advantages and disadvantages of Online Education. Over the past several decades the rapid technological advancement has had an impact on every aspect of human life and education has been one of the most important beneficiaries of this phenomenon. However as technology continues to take a central role in today's society, educational experts and professionals have raised concerns on the possible impacts that this will have not just on the system but also on the students and the society as whole. Some critics arguing that technology would in the future replace human intelligence. This, they argue would be as a result of the assumption of control by technologies over a considerable measure of undertakings and capacities that educators have been educating their students in the conventional education system. It is the position of this paper that despite the rise of technology and the central role it is now playing in the society, Education faces no threat, rather with the changing world; technology will only be driving force behind the restructuring of the education model as it aligns itself to the global changes.

Handbook of Research on Inclusive and Innovative Architecture and the Built Environment Peng, Ng Foong,Sonet, Ungku Norani,2023-06-19 There is an urgent need to emphasize inclusivity in architecture and the built environment. Innovative technologies within the field of architecture are being developed to enhance inclusivity in architectural approaches and development processes. It is essential to research inclusivity in architecture and the built environment toward holistic sustainable development. The Handbook of Research on Inclusive and Innovative Architecture and the Built Environment discusses inclusive and innovative approaches to providing socio-cultural value within architecture and the built environment. It focuses on issues of diversity, sustainability, resilient designs, and more. Further, the book expands the knowledge and awareness of architecture and the built environment towards inclusivity in design development and emerging advanced technology. Covering topics such as architectural challenges, global health, and urban morphology, this major reference work is an excellent resource for architects, government officials, urban planners, practitioners, students and educators of higher education, researchers, and academicians.

Adapting Education in the COVID-19 Era Trisha Sethi, 2025-01-03 In the heart of the global pandemic, *Adapting Education in the COVID-19 Era* examines the profound impact of the coronavirus on the global education sector. This book offers an insightful look into the challenges and transformations that have reshaped our concept of normal. From masks and sanitizers to social distancing and quarantines, the world adapted quickly. We explore the crucial shift from traditional education to digital learning, showcasing the resilience and innovation of educators and students during these unprecedented times. This book provides a comprehensive view of various countries' responses to the crisis, highlighting their unique strategies, successes, and lessons learned. Furthermore, this book thoroughly examines the alterations and new strategies adopted within the education system, evaluating their effectiveness and long-term implications. *Adapting Education in the COVID-19 Era* is not just a story of hardships but a testament to human resilience and innovation. Overall, this book is a powerful guide to understanding the impact of the coronavirus on education and offers invaluable insights for the future.

Math Anxiety—How to Beat It! Brian Cafarella, 2025-06-23 How do we conquer uncertainty, insecurity, and anxiety over college mathematics? You can do it, and this book can help. The author provides various techniques, learning options, and pathways. Students can overcome the barriers that thwart success in mathematics when they prepare for a positive start in college and lay the foundation for success. Based on interviews with over 50 students, the book develops approaches to address the struggles and success these students shared. Then the author took these ideas and experiences and built a process for overcoming and achieving when studying not only the mathematics many colleges and universities require as a minimum for graduation, but more to encourage reluctant students to look forward to their mathematics courses and even learn to embrace additional ones. Success breeds interest, and interest breeds success. Math anxiety is based on test anxiety. The book provides proven strategies for conquering test anxiety. It will help find ways to interest students in succeeding in mathematics and assist instructors on pathways to promote student interest, while helping them to overcome the psychological barriers they face. Finally, the author shares how math is employed in the “real world,” examining how both STEM and non-STEM students can employ math in their lives and careers. Ultimately, both students and teachers of mathematics will better understand and appreciate the difficulties and how to attack these difficulties to achieve success in college mathematics.

Mending Education Karen Gross, Edward K.S. Wang, 2024 Discover how the crisis of a global pandemic allowed educators to improve learning across the pre-K-adult pipeline. While acknowledging the scale of loss and difficulty the COVID pandemic engendered within the field of education, this book focuses on how sudden and forced changes to teaching and learning created “Pandemic Positives,” which can be captured and brought to scale. In particular: Part I addresses how Pandemic Positives came into being, with special attention to the presence of educator hope and creativity. Part II explores the Pandemic Positives that arose in three settings: when schools were closed, when learning turned online, and when schools re-opened. Part III provides strategies for replicating the Pandemic Positives so they become positive educational game changers. This book is grounded on trauma and mental wellness theory and includes the in-the-trenches experiences and voices of educators. The text features art created by the coauthors and shares both their professional and personal experiences, humanizing and enriching the book. *Mending Education* completes a trilogy composed of *Breakaway Learners*

and Trauma Doesn't Stop at the School Door by Karen Gross. "We have all bemoaned the COVID pandemic and its lasting negative effects, but Karen Gross and Edward Wang turn that pessimism on its head. Their extensive experience in education is augmented by the priceless data gathered through their research survey of teachers and educators. This is a must-have for educators everywhere." —Chris Messina-Boyer, educational crisis manager/crisis communications consultant, 20Buttonwood PR Solutions LLC

Proceedings of International Conference on Emerging Technologies and Intelligent Systems Mostafa Al-Emran, Mohammed A. Al-Sharafi, Mohammed N. Al-Kabi, Khaled Shaalan, 2021-08-07 This book sheds light on the emerging research trends in intelligent systems and their applications. It mainly focuses on three different themes, including software engineering, ICT in education, and management information systems. Each chapter contributes to the aforementioned themes by discussing the recent design, developments, and modifications of intelligent systems and their applications.

Handbook of Research on Instructional Systems and Technology Terry T. Kidd, Holim Song, 2008 This book provides information on different styles of instructional design methodologies, tips, and strategies on how to use technology to facilitate active learning and techniques to help faculty and researchers develop online instructional and teaching materials. It enables libraries to provide a foundational reference for researchers, educators, administrators, and others in the context of instructional systems and technology--Provided by publisher.

Developing Web-based Instruction Elizabeth A. Dupuis, 2003 Dupuis (head of instructional services and the Doe and Moffitt Libraries, U. of California at Berkeley) presents 14 papers that examine the full process of creating Web-based library instruction from short tutorials to full online courses. The papers emphasize instructional design and goals rather than specific technologies and software. Three sections address planning and management, evaluation and assessment, and design and development.

Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 'I found the book excellent and read every one of the 450 pages.... Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour, educational leadership, and organizational management. The book will be particularly appropriate for readers from a corporate, training or business school background, though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book. There are many books and articles about online learning. This is one of the better ones!' - Robin Mason, Computers and Education Technology-mediated instruction has taken the university and the corporate sector by storm. As more instructors teach online for a dispersed learning community in both academic and business environments, there's a need for resources that will help them adapt to this new teaching method. Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online (e.g. lectures, textbooks and readings, examinations) rather than attend to small-group processes and principles of

what the editors of this volume call andragogy. This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so. The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment. Their central tenet is: the adoption of computer networks as the teaching vehicle of the future demands a re-examination of our core beliefs about pedagogy and how students learn. The transfer of a classroom curriculum into cyberspace is deceptively simple, but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it. Rather than fear the challenges that new technology brings to systems of learning, the editors hope to help instructors embrace it by re-thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning. Features/Benefits - Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment, pedagogical issues, curriculum design, psychological and group dynamics, and ethical issues. - Part II examines practical issues associated with implementing courses online, both in the traditional university setting and in professional corporate training environments. - The book draws heavily on personal case examples, many from The Fielding Graduate Institute's 26+ years of teaching in nontraditional distributed learning environments.

E-learning and Teaching in Library and Information Services Barbara Allan, 2002 This overview of virtual learning environments provides guidance to the development, use and delivery of online learning and teaching materials and programmes. It includes case studies in an ILS context, taken from current practice of the information and library world in the UK and worldwide.
