A Cross sectional Study of Contextual Causes of Demotivation among Algerian University Students of English Seyfeddine Baka, 2021-02-01 Master's Thesis from the year 2016 in the subject English Language and Literature Studies - Linguistics, , language: English, abstract: The present study seeks to identify those factors causing demotivation among students of English so as to raise teachers and administrators' awareness to those factors, and consequently, to render foreign language learning/teaching in the Algerian context more motivating to students. It is hypothesized that there are certain contextual factors that demotivate English learners, the identification of which is a first step towards rendering foreign language learning/teaching more motivating. In order to achieve the aim of this study, a questionnaire has been administered to sixty English students from the three license levels at Mohammed Seddik Ben Yahia University, Jijel. The results obtained from the analysis of the students' questionnaire revealed that some demotivating factors, particularly teachers' personality type, students' low self-confidence and administrative obstacles, are largely responsible for causing demotivation among students.

Raising awareness to these factors will certainly contribute to rendering our context of the English language teaching at the university level more motivating to the students and hence more conducive to higher levels of proficiency in English among our students.
