This Starbucks case indicates how Starbucks coffee drinking business applies micro and macro-economic analysis methods to predict consumer behavior. Today, Starbucks has become world famous and brings high quality coffee and beverages to its clients over the world daily. Their well-known mission statements is: to inspire and nurture the human spirit, one person, one cup and one neighborhood at a time. How does it apply macro and micro economic analysis methods to predict consumers' coffee taste is influenced to change by economic environment more accurate? According to the following statistics, coffee market is large market potential in the world for this particular coffee service and production. Starbucks along with many competitors, such as Costa coffee and Mc-cafe have seized this opportunity and continue to indicate within this coffee market. It is no doubt that this coffee market can be profitable in 2012 year, the CEO of Starbucks was classified as the 8th best -paid CEO in the United States of America making \$ 103 million dollars of profit ( Rushe, 2013). Hence, the question concerns that how Starbucks can predict its coffee customer taste changes fast accurate. Micro and macro-economic marketing environment analysis: It is crucial to be aware and understand environment in which a company is operating in order to implement their strategies successfully. The micro environment strategies can be analyzed using in SWOT analysis and further completed with a macro environment study by doing a PEST analysis. As Starbucks background, it can apply micro environment a SWOT analysis method, it must focus on the external factors since internal factors are rather analyzed in the core marketing strategy and extended marketing strategy and extended marketing mix. However, macro environment refers to everything external to the organization. So, it seems Starbucks can't necessarily fully control, only influence. Such as PEST analysis indicates political, economic, social and technological external environment factors. Such as certain political issues can raise since coffee beans are grown in developing countries and this could raise questions about the working conditions and child labor. Tariffs and import taxes could also influence the prices in stores as well as the country's economic recession or exchange rates change could threaten Starbucks' profits. However, Starbucks internal strengths include that the development of new technologies and user friendly machines, such as home coffee machines, quality of beverages in other restaurants served are increasing and Starbucks should create Starbucks experience at home by manufacturing their own capsules machine with their coffee and tea. The emergence of social media is already used by Starbucks especially via Twitter where gift cards can be purchased and sent to friends ( Starbucks, 2014). There are Starbucks internal strengths to win its

competitors, although, it can not control external environment factors to threaten its business. Coffee drinking sale industry is a service marketing, positioning has received little attention from marketers, but is very useful in defining and modifying the tangible characteristics of the different kind of taste coffee product and its intangible perceptions. As Starbucks, customers are buying an expensive product high quality (tangible ) every cup of different kind of taste coffee, but they also have the personalized in-store drinking experience enhanced by the trained employees, for example, the customer's name is written on the plastic cup their beverage will be served in ( tangible ), this helps Starbucks obtains the premium brand status and win competition.
