Social Capital and Urban Networks of Trust Jouni Häkli,2016-12-05 This is the first book on social capital and trust informed by a critical geographical perspective. The authors examine the role of social capital in the constitution and reproduction of urban networks of trust in different places and contexts. They explore how social capital and trust are reflected in the capacity of these networks to achieve their goals and to deliver specific forms of urban development in a number of Finnish and Italian cities. Finland and Italy present, in many ways, two almost paradigmatic cases of how social capital and trust can work in extremely different and yet very effective ways in the production of the urban. They are two almost ideal laboratories for experimenting new definitions and new understandings of the concepts in question.

Temporal Value in MCDM Elisa Mariavittoria Bertolini,2025-11-24 This book outlines a process for planning transportation systems, employing qualitative methods to explore the balance between various considerations, and highlighting power asymmetries among key stakeholders. It serves as a decision support tool, complementing the usual techniques used in multi-criteria analysis (MCA). The book delves into the dynamics of territorial governance within a group decision-making context. The proposed tool provides a rational approach to addressing the main challenges that arise in the territorial context, promoting greater consensus among all parties involved in the decision-making process. The methodology allows for a deep appreciation of the contribution of decision analysis frameworks in the territorial scenario, particularly in group decision-making settings, where the literature on participatory MCA is rather sparse. To achieve a practical synthesis of the stakeholders' positions and to enrich the multi-criteria framework, the book introduces a tool for systematic analysis of stakeholder behaviour. Without this tool, the MCA analysis would be incomplete for providing adequate decision support. The

multi-criteria techniques underpinning the analysis, such as the Simple Additive Weighting (SAW), simplified Simos method, and the MACTOR case-based method, facilitate the identification of strategic directions based on criteria and parameters reflective of the relevant territorial framework. This outcome was achieved through successive evaluations of increasing complexity. Initially, the performances over short, medium, and long-term periods were considered separately, based on the alternatives and criteria identified by the stakeholders, including both economic and welfare aspects. Subsequently, a method was developed to coherently compare the performances of various alternatives over different timescales, aggregating the values into a single measure while also accounting for the duration of effects across these periods. This approach leads to a greater awareness of the temporal significance of decisions, understanding how impacts vary over time and how these should be carefully assessed. This understanding helps overcome the difficulties associated with balancing long-term visions with immediate needs. As evidenced by the results, considering the time factor in evaluations alters both the values and, in some cases, the aggregated outcomes in the Alternatives/Stakeholders matrices. This highlights the necessity of incorporating temporal preference elicitation into the MCA model to accurately reflect their influence on decision-making.

**Stati Generali del Patrimonio Industriale. 2022** AA.VV., 2022-06-09T00:00:00+02:00 L'Associazione Italiana per il Patrimonio Archeologico Industriale (AIPAI), in occasione dei suoi 25 anni, ha promosso i Secondi Stati Generali del Patrimonio Industriale. Per tracciare un bilancio ed elaborare strategie e visioni ha posto le condizioni per l'incontro tra gli addetti ai lavori e il confronto tra i molteplici ambiti operativi, di ricerca e istituzionali coinvolti. Ci si è riuniti a Roma e a Tivoli con la consapevolezza che il primo lascito dell'età industriale siamo noi, la nostra società con i suoi pregi e le sue contraddizioni, le incredibili conquiste degli ultimi secoli. La risposta è stata ampia e tra i numerosi contributi presentati in questo volume, si possono scorgere studi e appelli, buone pratiche di conservazione e progetti di riuso, percorsi culturali e azioni di valorizzazione del patrimonio intangibile. Il tutto fa ben constatare che pur con impianti metodologici fortemente caratterizzati, sono sempre di più le discipline che convergono sull'oggetto e sui contesti della produzione e gradualmente assimilano i principi consolidati dell'archeologia industriale. Le voci di una comunità segnata dai due anni di pandemia mostrano più incisivamente il divario tra il permanere di emergenze culturali e ambientali, da un lato, e un'aumentata tensione al riconoscimento e al ripensamento dell'eredità industriale, dall'altro. Quest'ultima si conferma sia nella centralità che le memorie e la cultura industriale hanno assunto nelle strategie di ripresa dei programmi nazionali ed europei, sia nelle

potenzialità di riscatto sociale economico e ambientale che emergono da una declinazione aggiornata dei progetti di recupero e rigenerazione. The Italian Association for Industrial Archaeological Heritage - AIPAI, on its 25th anniversary, promoted the Second States General of Industrial Heritage. In order to draw a balance sheet and elaborate strategies and visions for the near future, it set the conditions for the meeting of insiders and the confrontation between the many operational, research and institutional spheres involved. We gathered in Rome and Tivoli with the awareness that the first legacy of the industrial age is us, our society with its merits and contradictions, the incredible achievements of the last centuries. The response was wide-ranging, and among the contributions presented in large numbers one can discern in-depth studies and denunciations, good conservation practices and reuse projects, cultural paths, and actions to enhance intangible heritage. All of which makes a good case for the fact that more and more disciplines, even with strongly characterized methodological frameworks, are converging on the object and contexts of production and are gradually assimilating the established principles of industrial archaeology. The voices of a community marked by the two-year pandemic show more incisively the gap between the persistence of cultural and environmental emergencies, on the one hand, and an increased tension to recognize and rethink industrial heritage, on the other. The latter is confirmed both in the centrality that industrial memories and culture have assumed in the recovery strategies of national and European programs, and in the potential for social economic and environmental redemption that emerges from an updated declination of recovery and regeneration projects.
