Introduction to Neutrosophic Sociology (Neutrosociology) Florentin Smarandache, Neutrosophic Sociology (or Neutrosociology) is the study of sociology using neutrosophic scientific methods. The huge social data that we face in sociology is full of indeterminacy: it is vague, incomplete, contradictory, hybrid, biased, ignorant, redundant, superfluous, meaningless, ambiguous, unclear, etc. That's why the neutrosophic sciences (which deal with indeterminacy), through the process of neutrosophication, are involved, such as: neutrosophy (a new branch of philosophy), neutrosophic set, neutrosophic logic, neutrosophic probability and neutrosophic statistics, neutrosophic analysis, neutrosophic measure, and so on.

Teaching the Novel across the Curriculum Colin C. Irvine, 2007-11-30 Instructors at all levels are being encouraged to teach writing in their courses, even in subjects other than English. Because the novel reflects a broad set of human experiences and history, it is the ideal vehicle for learning about a wide range of issues. This book helps educators learn how to incorporate novels in courses in English, the humanities, social and behavioral sciences, and professional studies. The chapters focus on using the novel to explore ethical concerns, multiculturalism, history, social theory, psychology, social work, and education. The book looks at major canonical works as well as graphic novels and popular literature. Language arts are at the forefront of education these days. Instructors at all levels are being encouraged to teach writing in their courses, even if those courses cover subjects other than English. Literature instructors have long used fiction to teach composition. But because the novel reflects a broad range of human experiences and historical events, it is the ideal medium for learning about contemporary social issues. This book helps educators learn how to use the novel in courses in English, the humanities, social and behavioral sciences, and professional studies. The book is divided into broad sections on general education classes; multiculturalism; literature classes; humanities courses; classes in social, behavioral, and political sciences; and professional studies, such as social work and teacher training. Each section includes chapters written by gifted teachers and provides a wealth of theoretical and practical information. While the book examines major canonical works such

as *Hard Times*, *Billy Budd*, and *Invisible Man*, it also looks at graphic novels, science fiction, and popular contemporary works such as *Finishing School* and *Jarhead*. Chapters reflect the personal successes of their authors and cite works for further reading.

Social Theory in the Real World Steven Miles, 2001-05-09 Social Theory in the Real World is concerned with illustrating the practical benefits of social theory. Many students find it hard to relate the real insights provided by social theory to their real life experiences, and many lecturers struggle to demonstrate the relevance of social theory to everyday life. This book offers an accessible, non-patronizing solution to the problem, demonstrating that social theory need not be remote and obscure, but if used in imaginative ways, it can be indispensable in challenging our common sense perceptions and understandings. The book identifies the key themes of contemporary social theory: mass society, postindustrialism, consumerism, postmodernism, McDonaldization, risk and globalization, and uses the insights of both classical and contemporary theorists of social change to highlight the potential of imaginative theorizing.

An Introduction to Sociology and the Real World David Spurling, 2016-09-30 David Spurling believes that a sociology book should enable the reader to understand social problems. Spurling uses his background, including research on the single homeless to look at sociological perspectives and research methods. The book looks at the variety of perspectives including Marxism, functionalism, feminism and neo-liberalism. His transport background, as both a worker and a lecturer, is reflected in the chapters on urbanism. A sociology book that claims to be comprehensive but ignores climate change would be nonsensical as it is the most important problem for current and future generations; therefore this book discusses this issue and what to do about it. Spurling's chapter on crime looks at the importance of crime to the victims, using statistics, so that it presents a different perspective to many other books. The chapter on race reflects the ways in which perceptions of immigration have little relationship to the actual data available and also the way in which the media has a great influence on public opinion. Spurling uses his examiner experience, as well as teaching experience, to examine the different aspects of the educational system. The chapter on religion reflects the wide variety of views on this subject. As a Quaker, Spurling's views on religion have a Quaker perspective. The hatred towards people of other religions or no religion is also examined in both contemporary and past societies. The influence of education and attitudes towards it are examined. Spurling has also included a chapter of questions and answers. This book would be ideal for first-year university students, including the University of London International Degree, as well as for A-Level students looking for different material. Learning Through Cooperation Ltd hopes that this book will provide support to anyone sitting their exams. The Real World (Fourth Edition) Kerry Ferris, Jill Stein, 2014-02-01 The most relevant textbook for today's students. The Real World succeeds in classrooms because it focuses on the perspective that students care about most--their own. In every chapter, the authors use activities, examples from everyday life, and popular culture to draw students into thinking sociologically and to show the relevance of sociology to our relationships, our jobs, and our future goals.

Sociological Abstracts, 2004 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

A Practical Introduction to Real-World Research Loreen Wolfer, 2020-12-19 This practical text combines social research methods with coverage of statistical analysis to help students develop the applied research skills needed for future careers in public and private organizations, while also delivering a solid foundation for those going on to graduate school. Throughout the book, the author offers a real-world example and then breaks it down into a decision tree, which helps lead

students to a possible statistical decision (rather than starting with the statistic). This text gives students a toolbox of the most common and in-demand skills and demonstrates how those skills can be used to make the best research decisions. The book takes students through the entire real-world research process, from the formation of a research topic to measurement and sampling, to methods for gathering information and making sense of the data, and finally presenting to a non-academic audience in a way that gets the job done. Resources for instructors and students are available on an accompanying website for the book.

Sociology and the Real World Stephen Lyng, David D. Franks, 2002 In this new book, Lyng and Franks argue that contemporary sociology has lost its connection to human realities. Addressing the conceptual underpinnings of sociological practice, they offer ways for sociology to reclaim lost concepts of objectivity, reality, and truth. The authors deconstruct these terms in modern and postmodern contexts, yet they look beyond the usual predicaments espoused by these traditions in an effort to rebuild concepts of reality and truth more coherently for contemporary social relations and social problems.
