**Searching for the Castle** Barbara Leigh Ohrstrom,2013-12-10 Like cowboys turning in the saddle to look at where they came from, Searching for the Castle documents the backtrail of author Barbara Leigh Ohrstrom's adoption. It begins with her urgency as an eighteen-year-old woman initiating her search for her birth parents. Her recollection includes court petitions, letters, Division of Social Service documents, and other original documents usually buried behind the lock and key of the law. In this memoir, she narrates the unearthing of her history and that of her family. Some of her discoveries are filled with pain, while others are joyful, including locating sisters, another brother, and eventually nieces and a nephew. A story of how one woman comes to terms with her identity, Searching for the Castle tells of real people doing the best they can to live and love in the often heartbreaking circumstances of life. As Ohrstrom shares her journey to find her birth parents, she reveals her emotions throughout the process, discovering that her identity is self-created, but also that her being is governed, in part, by her ancestors and family lines. Searching for the Castle communicates the message that love creates families and that the family to which Ohrstrom belonged in foster care gave her a mother, father, and family filled with love and decency.

**Paris Climate Agreement: Beacon of Hope** Ross J. Salawitch, Timothy P. Canty, Austin P. Hope, Walter R. Tribett, Brian F. Bennett, 2017-01-05 This book is open access under a CC BY 4.0 license. This volume presents an Empirical Model of Global Climate developed by the authors and uses that model to show that global warming will likely remain below 2oC, relative to preindustrial, throughout this century provided: a) both the unconditional and conditional Paris INDC commitments are followed; b) the emission reductions needed to achieve the Paris INDCs are carried forward to 2060 and beyond. The first section of the book provides a short overview of Earth's climate system, describing and contrasting climatic changes throughout the planet's history and anthropogenic changes post-Industrial Revolution. The second section describes the climate model developed by the authors (Canty et al., Atmospheric Chemistry and Physics, 2013) and contrasts the model with climate models used in the Intergovernmental Panel on Climate Change (IPCC) 2013 Report. Chapter 3 examines both the unconditional (i.e., firm commitments) and conditional Paris INDCs (commitments contingent on financial flow and/or technology transfer) through the lens of their climate model and concludes that if all of the Paris INDCs are followed, then they are indeed a beacon of hope for Earth's climate. The fourth part of the book offers a perspective of energy needs and subsequent emissions reductions required to meet the Paris temperature goals, illuminating challenges faced both in the developing world and the developed world. Throughout the book, easy-to-understand charts and graphics illustrate concepts. The scientific basis of Chapters 2 and 3 was first presented in a keynote session of the 96th Annual Meeting of the American Meteorological Society in January, 2016.
