Grey E. L. James,2015-06-18 'Fifty shades of Grey' as told by Christian--Cover.

The Future of the Nineteenth-Century Dream-Child Amy Billone,2016-06-10 This book investigates the

reappearance of the 19th-century dream-child from the Golden Age of Children's Literature, both in the Harry Potter series and in other works that have reached unprecedented levels of popular success today. Discussing Harry Potter as a reincarnation of Lewis Carroll's Alice and J.M. Barrie's Peter Pan, Billone goes on to examine the recent resurrection of Alice in Tim Burton's *Alice*, and of Peter Pan in Michael Jackson and in James Bond. Visiting trends that have emerged since the Harry Potter series ended, the book studies revisions of the dream-child in texts and films that have inspired mass fandom in the twenty-first century: Stephenie Meyer's *Twilight*, E.L. James's *50 Shades of Grey* and Suzanne Collins's *The Hunger Games*. The volume argues that the 21st-century desire to achieve dream-states in relationship to eternal youth results from the way that dreams provide a means of realizing the fantastic yet alarming possibility of escaping from time. This current identification with the dream-child stems from the threat of political unrest and economic and environmental collapse as well as from the simultaneous technophilia and technophobia of a culture immersed in the breathless revolution of the digital age. This book not only explores how the dream-child from the past has returned to reflect misgivings about imagined dystopian futures but also reveals how the rebirth of the dream-child opens up possibilities for new narratives where happy endings remain viable against all odds. It will appeal to scholars in a wide variety of fields including Childhood Studies, Children's/YA Literature, Cinema Studies, Cultural Studies, Cyberculture, Gender Studies, Queer Studies, Gothic Studies, New Media, and Popular Culture.

Green Home Building Miki Cook, Doug Garrett, 2014-09-01 A comprehensive guide to building green on any budget.

According to conventional wisdom, building a green home is an expensive endeavor. The standard approach treats green as an add-on, tacking premium products, finishes, and equipment onto a traditional home design. As a result, many green home projects end up over budget or fail to achieve their environmental and performance goals. Green Home Building explodes the myth that green homes have to cost more. Using proven methods based on applied building science, the authors show how to: Lower base construction costs to provide funding for high performance upgrades Achieve a net-zero energy home, including zero-ing water, waste, carbon, and associated costs within fifteen years Live affordably into the future, despite anticipated rising costs for fuel, water, materials, taxes, and health care This comprehensive guide to building green on any budget defines the strategies that maximize the return on green investments. Written for anyone who has ever been swayed by the argument that the price tag limits how green a home can be, Green Home Building is a must-read for builders, contractors, architects, designers, and homeowners. Miki Cook is a green building and sustainability consultant who has dedicated her career to educating contractors and the public on the strategies, methods, and benefits of green homes. Doug Garrett has trained thousands of homebuilders, architects, and sub-contractors to build energy-efficient homes using applied building science to improve comfort, durability, and healthfulness while meeting or exceeding the energy code.

The Final Four of Everything Mark Reiter, Richard Sandomir, 2009-12-15 Edited by Mark Reiter and Richard Sandomir, and featuring contributions from experts on everything from breakfast cereal and movie gunfights to First Ladies and bald guys, The Final Four of Everything celebrates everything that's great, surprising, or silly in America, using the foolproof method of bracketology to determine what we love or hate-and why. As certain to make you laugh as it will start friendly arguments, The Final Four of Everything is the perfect book for know-it-alls, know-a-littles, and anyone with an opinion on celebrity mugshots, literary heroes, sports nicknames, or bacon. Bracketology is a unique way of organizing information that dates back to the rise of the knockout (or single elimination) tournament, perhaps in medieval times. Its origins are not precisely known, but there was genius in the first bracket design that hasn't changed much over the years. You, of course, may be familiar with the bracket format via the NCAA basketball tournament pairings each March. If you've ever watched ESPN or participated in a March Madness office pool, you know what a bracket looks like. The Final Four of Everything takes the idea one step further, and applies the knockout format to every category BUT basketball. In areas where taste, judgment, and hard-earned wisdom really matter, we've set out to determine, truly, the Final Four of Everything.
