Milkyway Media

Are We Smart Enough to Know How Smart Animals Are? Frans de Waal, 2016-04-25 A New York Times bestseller: A passionate and convincing case for the sophistication of nonhuman minds. —Alison Gopnik, *The Atlantic* Hailed as a classic, *Are We Smart Enough to Know How Smart Animals Are?* explores the oddities and complexities of animal cognition—in crows, dolphins, parrots, sheep, wasps, bats, chimpanzees, and bonobos—to reveal how smart animals really are, and how we've underestimated their abilities for too long. Did you know that octopuses use coconut shells as tools, that elephants classify humans by gender and language, and that there is a young male chimpanzee at Kyoto University whose flash memory puts that of humans to shame? Fascinating, entertaining, and deeply informed, de Waal's landmark work will convince you to rethink everything you thought you knew about animal—and human—intelligence.

Summary of Frans de Waal's Are We Smart Enough to Know How Smart Animals Are? by Milkyway Media Milkyway Media, 2018-08-31 *Are We Smart Enough to Know How Smart Animals Are?* by Frans de Waal (2016) provides an overview of the history of animal cognition research and the most recent discoveries about animal intelligence. As researchers continue to improve methods for testing animals' cognitive abilities, they are discovering that animals process, respond to, and act on stimuli in ways previously assumed to be exclusively human... Are We Smart Enough to Know How Smart Animals Are? Frans de Waal, 2016-05-10 A New York Times Bestseller From world-renowned biologist and primatologist Frans de Waal, a groundbreaking work on animal intelligence destined to become a classic. What separates your mind from an animal's? Maybe you think it's your ability to design tools, your sense of self, or your grasp of past and future—all traits that have helped us define ourselves as the planet's preeminent species. But in recent decades, these claims have eroded, or even been disproven outright, by a revolution in the study of animal cognition. Take the way octopuses use coconut shells as tools; elephants that classify humans by age, gender, and language; or Ayumu, the young male chimpanzee at Kyoto University whose flash memory puts that of humans to shame. Based on research involving crows, dolphins, parrots, sheep, wasps, bats, whales, and of course chimpanzees and bonobos, Frans de Waal explores both the scope and the depth of animal intelligence. He offers a firsthand account of how science has stood traditional behaviorism on its head by revealing how smart animals really are, and how we've underestimated their abilities for too long. People often assume a cognitive ladder, from lower to higher forms, with our own intelligence at the top. But

what if it is more like a bush, with cognition taking different forms that are often incomparable to ours? Would you presume yourself dumber than a squirrel because you're less adept at recalling the locations of hundreds of buried acorns? Or would you judge your perception of your surroundings as more sophisticated than that of a echolocating bat? De Waal reviews the rise and fall of the mechanistic view of animals and opens our minds to the idea that animal minds are far more intricate and complex than we have assumed. De Waal's landmark work will convince you to rethink everything you thought you knew about animal—and human—intelligence.

Are We Smart Enough to Know How Smart Animals Are? Frans de Waal, 2017-04-04 A New York Times bestseller: A passionate and convincing case for the sophistication of nonhuman minds. —Alison Gopnik, *The Atlantic* Hailed as a classic, *Are We Smart Enough to Know How Smart Animals Are?* explores the oddities and complexities of animal cognition—in crows, dolphins, parrots, sheep, wasps, bats, chimpanzees, and bonobos—to reveal how smart animals really are, and how we've underestimated their abilities for too long. Did you know that octopuses use coconut shells as tools, that elephants classify humans by gender and language, and that there is a young male chimpanzee at Kyoto University whose flash memory puts that of humans to shame? Fascinating, entertaining, and deeply informed, de Waal's landmark work will convince you to rethink everything you thought you knew about animal—and human—intelligence.

Analysis of Frans de Waal's Are We Smart Enough to Know How Smart Animals Are? by Milkyway Media Milkyway Media, 2017-12-30 *Are We Smart Enough to Know How Smart Animals Are?* by Frans de Waal (2016) provides an overview of the history of animal cognition research and the most recent discoveries about animal intelligence. As researchers continue to improve methods for testing animals' cognitive abilities, they are discovering that animals process, respond to, and act on stimuli in ways previously assumed to be exclusively human. Purchase this in-depth analysis to learn more.

Wild Souls Emma Marris, 2021-06-29 Winner of the 2022 Rachel Carson Environment Book Award * Winner of the 2022 Science in Society Journalism Award (Books) * Finalist for the Los Angeles Times Book Prize "Thoughtful, insightful, and wise, *Wild Souls* is a landmark work." --Ed Yong, author of *An Immense World* Fascinating . . . hands-on philosophy, put to test in the real world . . . Marris believes that our idea of wildness--our obsession with purity--is misguided. No animal remains untouched by human hands . . . the science isn't the hard part. The real challenge is the ethics, the act of imagining our appropriate place in that world. --Outside Magazine From an acclaimed environmental writer, a groundbreaking and provocative new vision for our relationships with--and responsibilities toward--the planet's wild animals. Protecting wild animals and preserving the environment are two ideals so seemingly compatible as to be almost inseparable. But in fact, between animal welfare and conservation science there exists a space of underexamined and unresolved tension: wildness itself. When is it right to capture or feed wild animals for the good of their species? How do we balance the rights of introduced species with those already established within an ecosystem? Can hunting be ecological? Are any animals truly

wild on a planet that humans have so thoroughly changed? No clear guidelines yet exist to help us resolve such questions. Transporting readers into the field with scientists tackling these profound challenges, Emma Marris tells the affecting and inspiring stories of animals around the globe--from Peruvian monkeys to Australian bilbies, rare Hawai'ian birds to majestic Oregon wolves. And she offers a companionable tour of the philosophical ideas that may steer our search for sustainability and justice in the non-human world. Revealing just how intertwined animal life and human life really are, *Wild Souls* will change the way we think about nature-and our place within it.

Radical Regeneration Andrew Harvey, Carolyn Baker, 2022-11-29 An inspiring manual for navigating humanity's collective dark night and enacting personal and planetary transformation • Explores how Sacred Activism--specifically, creative, wise, sacredly inspired action--offers an antidote to the crises facing our world • Reveals how to uncover and sustain joy and how to use it as fuel for continuing Sacred Activism in dangerous times • Includes practical maps of the dark night process and of the four-part path to transfiguration drawn from the secret depths of the mystical traditions Presenting a manual for navigating humanity's collective dark night, Andrew Harvey and Carolyn Baker explore potential antidotes, drawn from mystical traditions and Sacred Activism, to help us find inspiration and take action in the face of the daunting challenges to our world. Offering a deep discussion of our global dark night in terms of the Kali Yuga, the authors examine the dangers of a growing constellation of intractable crises--authoritarianism both in America and abroad, climate change, economic inequality, social upheaval, and spiritual malaise. They then explore the antidotes to these crises: Sacred Activism--specifically, creative, wise, sacredly inspired action--and a profound understanding of our evolutionary ordeal and its potentialities. Examining the power of joy to help enact personal and planetary transformation, they explain how joy, or ananda, is a force all mystical traditions recognize as the essence of the Divine. They reveal how to uncover and sustain joy in ourselves and how to use joy as fuel for continuing Sacred Activism in dangerous times. Drawing on the visionary teachings of mystics such as Pierre Teilhard de Chardin and Sri Aurobindo, the authors show how the global dark night is part of an evolutionary mutation process and how its very intensity makes it the potential seedbed of a new embodied, divine humanity. They offer practical maps of the crises, of the shadows that this global dark night is casting, and of the four-part path to transfiguration drawn from mystical traditions. Sharing a vision of a new and focused global moment of love in action, the authors reveal that apocalypse is not inevitable--if enough people awaken to the extraordinary possibilities of Sacred Activism.

Through a Glass Brightly David P. Barash, 2018 Human beings are important, especially to themselves! But as science advances, it has become increasingly clear that we are less special and more natural than many people have long believed. This book shows how, as we finally look at ourselves honestly and accurately, we can identify ourselves as wonderfully natural, inseparable from the universe and other living things--

An Anthropology of Robots and AI Kathleen Richardson, 2015-02-11 This book explores the making of robots in labs at the Massachusetts Institute of Technology (MIT). It examines the cultural ideas that go into the making of robots, and the role of fiction in co-constructing the technological practices of the robotic scientists. The book engages with debates in anthropological theorizing regarding the way that robots are reimagined as intelligent, autonomous and social and weaved into lived social realities. Richardson charts the move away from the “worker” robot of the 1920s to the “social” one of the 2000s, as robots are reimagined as companions, friends and therapeutic agents.

HIV and AIDS Simon Uchenna Ortuanya, 2023-05-05 This book provides a detailed and timely analysis of key regulatory and legal issues arising in the context of HIV and AIDS. The ten chapters cover the core issues central to an understanding of law and public health as concerns AIDS. Whilst the book focuses on how Nigerian law applies to HIV and AIDS, the author draws heavily on materials from other jurisdictions. There are many parallels that exist between the application of law and governance considerations in the AIDS pandemic that resonate with other infectious diseases including Covid-19, therefore the book is widely relevant to public health law in communicable disease contexts. Topics covered: overview and origin of the HIV and AIDS epidemic; legal and institutional framework of the HIV and AIDS epidemic in Nigeria; human rights and the epidemic; decriminalisation of HIV and AIDS in Nigeria; HIV and AIDS and vulnerable groups; HIV and AIDS and patents; HIV and AIDS and sports; international organisations and programmes on HIV; judicial responses to HIV and AIDS; and global pandemics and control.

Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari, today's average American has their foot in three ideological camps: nationalism, free market capitalism, and humanism. The first two might seem obvious, but the third? It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning, much less use it self-descriptively. This book is designed to serve two important purposes: First, to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents. Second, to address what the author believes is a critical question for our time, the era of the Anthropocene: Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems? To answer the last question, Schuler draws from an eclectic collection of commentators, including life scientists, spiritual writers, public intellectuals, technologists, novelists, and even poets. In the end, this wide-ranging survey will help the reader determine whether humanism makes sense for them.
