La llamada Revolución Industrial Arístides Silva Otero, Mariela Mata de Grossi, 1998

Estudios filosóficos de historia de la ciencia Alfonso Pérez de Laborda, 2005-06-08 «¿Historiador de la ciencia que un día le picó la mosca y se dedicó a lo que no era lo suyo? No, claro, aunque incluso de ser así no entiendo por qué debería aceptarse una manera tan oficinesca y burocratizada de ver las cosas del pensar, que codicia encajonar a cada uno en la casilla en la que debe estar quieto, como si de un nicho se tratara en el que, ya inviviente, sólo le falta ir pudriéndose poco a poco. Quiero manifestar una vez más lo malévol y mortífero que me ha parecido siempre el que nuestras universidades conviertan a los suyos en profesores de una cada vez más pequeña pelismidad, 'mi materia', haciendo que se olvide de por vida el conjunto entero del pensar, el esfuerzo maravilloso de intentar pensarlo todo, de pensar el todo [...] Antes y ahora, eterno y montaraz papador de libertades, sigo siendo el mismo cavilador rumiante de pensares. Y los pensares se van espesando y enredando. ¿Hasta dónde? ¿Hasta cuándo? No lo sé. Yo no tengo la respuesta». (del Prólogo del autor)

Revolución industrial Fouad Sabry, 2024-02-12 Qué es la Revolución Industrial La Revolución Industrial, también conocida como Primera Revolución Industrial, fue un período de transición global de la economía humana hacia una economía más generalizada, eficiente y estable. Procesos de fabricación que sucedieron a la Revolución Agrícola, comenzando en Gran Bretaña y extendiéndose a Europa continental y Estados Unidos, que ocurrieron durante el período comprendido entre aproximadamente 1760 y aproximadamente 1820-1840. Esta transición incluyó el paso de métodos de producción manuales a máquinas; nuevos procesos de fabricación de productos químicos y producción de hierro; el uso cada vez mayor de la energía hidráulica y del vapor; el desarrollo de máquinas herramienta; y el surgimiento del sistema fabril mecanizado. La producción aumentó considerablemente y el resultado fue un aumento sin precedentes de la población y de la tasa de crecimiento demográfico. La industria textil fue la primera en utilizar métodos de producción modernos y los textiles se convirtieron en la industria dominante en términos de empleo, valor de la producción y capital invertido. Proyectos reales para explorar la Revolución Industrial (Real-World Projects to Explore the Industrial Revolution) Ellina Litmanovich, 2018-07-15 The varied projects in this volume present readers with more than a dozen lenses through which to learn about the progress and impact of the Industrial Revolution, and the tide of industrialization it unleashed, in the United States. Broad questions prompt readers to engage with major themes in civics, geography, economics, and history. A wealth of background information helps readers understand how these themes play out in the context of the profound shifts in the American economy and society that took place in the nineteenth and early twentieth centuries.

20 datos curiosos sobre la Revolución Industrial (20 Fun Facts About the Industrial Revolution) Joan Stoltman, 2019-12-15 The Industrial Revolution was one of the most dramatic eras of all time, filled with fascinating people, strange events, and incredible stories. This period of great change comes into sharp focus through each spread with detailed, accessible language. Each fact is complemented with vivid, carefully-chosen historical images and illustrations, and a caption that adds just a touch more history. Readers are drawn deep into the facts not covered in history textbooks, like working conditions, inventions, failures, and characters, to make this important history lesson fun and engaging.

El tsunami tecnológico Ángel Bonet Codina, 2018-09-25 En el Neolítico, el paso de una cultura nómada a una sedentaria supuso la primera gran transformación socio-económica de la humanidad. Dio lugar a los primeros asentamientos urbanos y, posteriormente, permitió el auge de grandes civilizaciones. Habría que esperar hasta la Revolución Industrial para encontrar un cambio semejante en la historia. Ahora nos encontramos ante una nueva gran revolución de la humanidad: la

Disrupción Tecnológica. La coincidencia en el tiempo de una serie de tecnologías como la inteligencia artificial, el internet de las cosas, la nube, la robótica o la conectividad móvil, entre otras, nos sitúa ante el mayor cambio económico-social, no ya de las últimas décadas, sino de los últimos siglos. No se trata de una moda pasajera ni de un fenómeno trivial. Es una verdadera revolución que va a cambiarlo todo: nuestra forma de trabajar, de hacer negocios, de comprar, e incluso de relacionarnos. La transformación será general, no habrá ciudad, comunidad, sector o empresa que no se vea afectada. Una vez más, sobrevivirán los que mejor y más rápidamente sepan adaptarse al nuevo entorno. Pues, tal y como dijo hace un siglo y medio Charles Darwin, «las especies que subsisten no son las más fuertes, ni las más rápidas, ni las más inteligentes, sino aquellas que se adaptan mejor al cambio». El tsunami tecnológico no ha hecho más que empezar, ¿estás preparado para surfearlo?
