Botanic Gardens of the World Deborah Trentham, 2023-09-28 Selected as one of the Sunday Times best gardening books of 2023 Discover the lavish beauty and fascinating history of the 40 most important and inspiring botanic gardens from across the globe. From the Renaissance gardens of Italy to the futuristic botanic gardens of Singapore, this gorgeous book tells the story of these unique institutions. It is a history of science and learning, of politics and national interests, of societal concerns and conservation. But, most of all, it is a compelling exploration of the power and possibility of the natural world, that we are still merely scratching the surface of. Expert garden historian Deborah Trentham has selected the world's most important gardens and delves deep into the history of these horticultural institutions - sharing stories of exploration, extraordinary plants and the scientific breakthroughs which have shaped these stunning gardens. Filled with rare and beautiful plants and incredible locations from around the globe - from Norway to Morocco, Kyoto to Kew, Brooklyn to Buenos Aires, and Madrid to Malaysia - this book will transport you to far-flung places and bygone eras, and consider the future of our botanical havens and the natural wonders they protect.

Eight Years Wandering In The High Mountains Of Sinai Peninsula: A Tale Of Two Maps Ahmed Shams, 2011-08-07 This book is the first complete geo-based account about the High Mountains of Sinai Peninsula. A series of seventeen expeditions (Phase I: 2000-2008) were conducted to study the geography and human occupation development, providing exclusive highly detailed maps. Between 2010 and 2013 (Phase II), the study has undergone an extensive analysis/modeling process, supervised and sponsored by IMT Institute for Advanced Studies; scientifically collaborating with the EURAC - European

Research Academy, towards a global perspective. It is a multidisciplinary geographical account which focuses on a local Bedouin community which inhabits a transitional mountain area of a rich and complex context, reflecting the socioeconomic and geopolitical paradoxes of the Middle East, the decade prior the revolutions of the Arab Spring. It presents a complete image for the local aspects in a keystone Arab state; a state of a significant share: 'the Egyptian National Reforms Revolution of January 25, 2011 CE'.

Natural History Dioramas - Traditional Exhibits for Current Educational Themes Annette Scheersoi, Sue Dale Tunnicliffe, 2018-11-14 This book presents the history of natural history dioramas in museums, their building and science learning aspects, as well as current developments and their place in the visitor experience. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. Contributions in this book specifically focus on their educational potential. In practice, dioramas are used by a wide range of educational practitioners to assist learners in developing and understanding specific concepts, such as climate change, evolution or conservation issues. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: "Natural History Dioramas - Traditional Exhibits for Current Educational Themes, Socio-cultural Aspects" the editors focus on socio-cultural issues and the potential of using dioramas to engage various audiences with - and in - contemporary debates and big issues, which society and the natural environment are facing.

Plants of the World Maarten J. M. Christenhusz, Michael F. Fay, Mark W. Chase, 2017-11-13 *Plants of the World* is the first book to systematically explore every vascular plant family on earth—more than four hundred and fifty of them—organized in a modern phylogenetic order. Detailed entries for each family include descriptions, distribution, evolutionary relationships, and fascinating information on economic uses of plants and etymology of their names. All entries are also copiously illustrated in full color with more than 2,500 stunning photographs. A collaboration among three celebrated botanists at the Royal Botanic Gardens, Kew, *Plants of the World* is authoritative, comprehensive, and beautiful. Covering everything from ferns to angiosperms, it will be an essential resource for practicing botanists, horticulturists, and nascent green thumbs alike.
