Radical Right Ideologues in the Age of Trump Ronald Beiner, 2025-11-18 Radical Right Ideologues in the Age of Trump offers a series of sketches of what it means to live within a new Zeitgeist where ideas of the radical right are once again attractive to young minds. The book first zeroes in on Nietzsche as a privileged philosophical source for the contemporary radical right - as a kind of prophet of the ferocious rebellion against liberal democracy evident today. It then explores this in more detail with a series of case studies of contemporary far-right ideologues and activists including Steve Bannon, Bronze Age Pervert, Alexander Dugin, Jason Jorjani, and others. This book will appeal to activists, researchers, and scholars with an interest in the contemporary radical right, fascist intellectualism, and anti-democratic ideologies.

Fight the Good Fight Jay W. Richards, James Robinson, 2024-02-13 Hard choices lie ahead, Christians. The bestselling team of James Robison and Jay Richards show what's at stake in our post-Christian society, how to prepare, and why we must never forget that the battle, above all, is spiritual. Our rulers have kicked aside our Constitution and common sense. They have demonized our heroes. Now they're trying to erase the difference between male and female. All while running up unimaginable and catastrophic debt. What's left for Christians in such a society, where dissent invites ruinous retribution? Should they retreat? Fight back? Something else? God is not finished with us as a nation, but if we're going to get off the road to ruin, we must do more than slow down and conserve whatever good remains: We must repent. That means a hard, 180-degree turn—and fast. If we'll pray, think straight, persuade other lovers of truth to join us, and fight together—wise as serpents and innocent as doves—then there's still hope.

Truth to the 1st Power Mike Thomas, 2014-11-10 The theories and conclusions made within the pages of this book are meant to open the minds of the religious and non religious readers to the idea that faith that is declared a truth can and must be scrutinized in order to confirm and also remove doubt has to how one can perceive the world and appreciate its wonderful burden and blessing with regards to how religion paints our perception however accurate or inaccurate. The title Truth to the 1st Power is an analogy to the math equation that anything to the power of one is essentially itself. The theory is to bring to life the principle idea that truth will always remain true and it will only expand but continue to remain constant all while being scrutinized. The truth will never deviate its first position of complete logic and relevance. The author attempts to bring this theory to the topic of religion with compelling conclusions.

Coins, Cult and Cultural Identity Eberhard W. Sauer, 2005 In 1875 an extraordinary hoard of over 4,500 Augustan coins was discovered in a hot spring in Bourbonne-les-Bains, France. Mystified at why this discovery has been ignored for 130 years, even though it is the largest known single deposit of Augustan coins, Eberhard Sauer sets out here to re-discover the clearly votive deposit, placing it in its archaeological, cultural and religious context. Sauer examines the archaeological remains at the site, a sophisticated Roman spa, and assesses who would have had access to so many coins c.AD 9. The interesting thesis argues that in this area where army recruitment was a thriving business, only the military could have deposited such a hoard. Sauer then assesses the popular Roman habit of offering coins in sacred springs. Finally, the study pieces together the numismatic and archaeological evidence to discuss the history of the military spa of Bourbonne-les-Bains. Includes a substantial catalogue.
