Anil Narine

Eco-Trauma Cinema Anil Narine, 2014-09-19 Film has taken a powerful position alongside the global environmental movement, from didactic documentaries to the fantasy pleasures of commercial franchises. This book investigates in particular film's complex role in representing ecological traumas. Eco-trauma cinema represents the harm we, as humans, inflict upon our natural surroundings, or the injuries we sustain from nature in its unforgiving iterations. The term encompasses both circumstances because these seemingly distinct instances of ecological harm are often related, and even symbiotic: the traumas we perpetuate in an ecosystem through pollution and unsustainable resource management inevitably return to harm us. Contributors to this volume engage with eco-trauma cinema in its three general forms: accounts of people who are traumatized by the natural world, narratives that represent people or social processes which traumatize the environment or its species, and stories that depict the aftermath of ecological catastrophe. The films they examine represent a central challenge of our age: to overcome our disavowal of environmental crises, to reflect on the unsavoury forces reshaping the planet's ecosystems, and to restructure the mechanisms responsible for the state of the earth.

Lifestyle Medicine Jeffrey I. Mechanick, Robert F. Kushner, 2025-05-26 This book represents the third in a series of Springer textbooks on Lifestyle Medicine by Dr. Mechanick and Dr. Kushner. The first book focused on theory and practice concepts. The second book focused on implementation with a specific tactic of building a lifestyle medicine center. This third book focuses on scientific evidence to close research gaps, knowledge gaps, and practice gaps. The general intent is to imbue the field of lifestyle medicine with scientific evidence. The other intent is to continue advancing a culture of preventive care for chronic disease using lifestyle medicine, but again through a tactic of emphasizing science, evidence, and critical thinking. *Lifestyle Medicine: Closing Research, Practice, and Knowledge Gaps* is organized into three sections. In the first section, driver-based chronic disease models and other elements that pertain to lifestyle medicine are explored in terms of current levels of scientific substantiation. In the second section, educational modalities are presented that can improve awareness of scientific and experiential knowledge by healthcare professionals. Topics include innovative teaching models,

web-based activities, training and accreditation programs, and certification exams. In the third section, a variety of clinical scenarios are presented to highlight practice gaps – implementation issues where there is inadequate clinical action despite an awareness of the pertinent knowledge. The topics span critical domains that must be addressed so that lifestyle medicine can lead to favorable outcomes in people and populations at risk. These domains include: alcohol and substance abuse, colitis, brain health, environmental risk, pharmacotherapy de-escalation, routine change, socioeconomics, transculturalization, advanced analytics, home cardiac rehabilitation, digital twin technology, and a highly referenced discussion of the lifestyle medicine ecosystem and infrastructure. Care is taken to provide not only theoretical foundations but also case studies, where appropriate, to emphasize critical aspects. In conclusion, this third book on Lifestyle Medicine will complement the previous two Springer books and define a compendium of resources necessary for anyone interested in this field.

Interpreting the Environment at Museums and Historic Sites Debra A. Reid,David D. Vail,2019-09-19 Interpreting the Environment at Museums and Historic Sites is for anyone who wants to better understand the environment that surrounds us and sustains us, who wants to become a better steward of that environment, and who wants to share lessons learned with others. The process starts by focusing attention on the environment – the physical space that constitutes the largest three-dimensional object in museum collections. It involves conceptualizing spaces and places of human influence; spaces that contain layer upon layer documenting human struggles to survive and thrive. This evidence exists in natural environments as well as city centers. The process continues by adopting an environment-centric view of the spaces destined to be interpreted. This mind-set forms the basis for devising research plans that document how humans have changed, destroyed, conserved and sustained spaces over time, and the ways that the environment reacts. Interpretation built on this evidence then becomes the basis for minds-on engagement with the places that humans inhabit and the spaces that they have changed and continue to manipulate. Interpreting the Environment at Museums and Historic Sites provides a tool kit designed to help you research environmental history, document evidence of human influence on land and the environment over time, and tailor that knowledge to new public engagement. It proposes a multi-disciplinary approach that requires expertise in the humanities as well as the sciences and social sciences to best understand space and place over time. It incorporates case

studies of the theory and method of environmental history to explore how human goals take lasting shape in the environment – creating working environments, getting water, generating and harnessing power, growing food, traveling and trading, building things, and preserving natural landscapes. Features include the Interpreting the Environment Tool Kit to help you launch the good work of interpreting the environment: Raw Materials (the evidence): landscape, ecosystems, artifacts, and the built environmentPreparation (methods): thinking like a naturalist/scientist; thinking like a historian; combining approachesPlanning (envisioning the goal): proactive message, stewardship, sustainabilityPartnerships (sharing work): strength in numbers; allying across disciplinary divides; united in efforts to inform the public about their individual and collective effects on the landscape and the environmentPotential: educating the public about people and places is part of a world-wide goal with the cumulative effect of saving the planet, one story at a time.A Timeline and Bibliographic essay round out the book's resources.

Umberto Eco's Alternative Norma Bouchard,Veronica Pravadelli,1998 Comprises 13 contributions reflecting the wide range of Eco's interests and influence, arranged in sections on semiotics, philosophy of language, and theory of interpretation; writing (post)modern fictions--the ambivalent status of knowledge; popular culture--ideology, consumption, resistance. Some examples of specific topics: individual and communal encyclopedias; the limitations of openness--Foucault's pendulum and Kabbalah; popularizing culture in Eco's Superfictions; and cinema and the question of reception. An afterword by Eco himself discusses how and why he writes. Lacks an index. Annotation copyrighted by Book News, Inc., Portland, OR

Diagnóstico clínico cardiovascular por imagen Martin St. John Sutton,John Rutherford,2005-09-30 Esta obra resulta de gran interés en el área de la medicina cardiovascular, ya que en los últimos años se ha producido una reducción espectacular de la morbilidad y mortalidad cardiovascular debido sobre todo a los avances producidos en tres ámbitos: el diagnóstico, el tratamiento y la prevención. Y en el primero de ellos, el diagnóstico cardíaco, el avance se ha debido casi de manera exclusiva a los progresos espectaculares que se han producido en el diagnóstico por imagen. En los últimos cinco años la tecnología para el diagnóstico cardíaco por imagen ha progresado de forma exponencial y las aportaciones de las técnicas de imagen no invasivas o mínimamente invasivas han aumentado con una rapidez inesperada, por lo que se hacía imprescindible

una obra completa que recogiera todo el saber actual sobre el diagnóstico clínico cardiovascular por imagen. Cada vez resulta también más importante realizar no ya un diagnóstico sino una evaluación clínica exacta y un avance del pronóstico, para lo que se necesita acudir de manera ineludible a las técnicas de imagen disponibles. Esta obra, complemento del clásico 'Braunwald. Tratado de Cardiología', revisa los principios físicos del diagnóstico cardiovascular por imagen y aporta la información necesaria para utilizar e interpretar toda la gama actual de técnicas de imagen y representa una guía muy útil para la aplicación de estas técnicas, complejas y algunas veces muy caras, a la resolución de una gran variedad de problemas cardiovasculares. Su gran aportación, teniendo en cuenta, además, que suelen ser técnicas caras o muy caras, es que compara la utilidad de las diferentes técnicas de imagen para cada patología cardiovascular tratada y los beneficios que aportan para recomendar la más conveniente desde todos los puntos de vista: clínico y económico (análisis de rentabilidad). La mayoría de los capítulos comienzan con un resumen detallado para facilitar la búsqueda de información sobre los diferentes temas y contienen la información necesaria para realizar una correcta elección de la técnica de imagen más apropiada y rentable para conseguir un diagnóstico exacto y rápido, siguiendo, siempre que ha sido posible, un orden lógico en las decisiones clínicas. Esta obra, complemento del clásico Braunwald Tratado de Cardiología, revisa los principios físicos del diagnóstico cardiovascular por imagen y aporta la información necesaria para utilizar e interpretar toda la gama actual de técnicas de imagen.
