Refeudalization and the Crisis of Civilization Olaf Kaltmeier,Edgardo Lander,2023-06-02 Discussing the civilizatory crisis and processes of refeudalization this volume brings into dialogue two of the most creative approaches, in Olaf Kaltmeier and Edgardo Lander, to rethink capitalism in the 21st century. In Part 1, Olaf Kaltmeier, takes issue with the state of social inequality in the region, highlighting the concentration of wealth within the upper 1% of society in Latin America. Comparing the current economic situation with the ancient regime, the discussion centers around the new phenomena like billionaires as president, increased luxury consumption, an emerging culture of distinction, and the intensification of land and spatial segregation. In Part 2, Lander urgently assesses the current state and political legacy of the Pink Tide governments in his essay Crisis of Civilization. Reviewing the past two decades of the new millennium, Lander critiques the failure of these governments to provide alternatives to extractivism and economic dependencies. Finally, Hans-Jürgen Burchardt connects the arguments through interviews where both authors sum their efforts to open the issues to future dialogue. Refeudalization in Latin America provides an accessible and thought-provoking political diagnosis from the Global South which departs from the oft idiosyncratic and cyclical debates of the Global North to offer new vocabulary for social change. It will interest scholars and students of global studies, sociology, and political science.

The Mystic Awakening Adrian Beale,2014-05-20 Unlock An Ancient Faith That Will Change Your Life... Today! These are not far-fetched, new age experiences. They are your inheritance as a believer in Jesus Christ! Get ready to tap into the supernatural realm that saints of old and forerunners of yesteryears have walked in for centuries. This is not new truth or extra-Biblical revelation—it is a transition to normal living in the Kingdom of Heaven on Earth. Enoch. Abraham. Moses. Elijah. Elisha. These great patriarchs of old experienced God in ways that seem foreign and inaccessible today. Yet, because of Jesus, a New and Living Way was made so you could enjoy a new level of supernatural lifestyle that our ancestors longed to see and experience. You will learn how to experience: • A deeper fellowship with God • The Holy Spirit's voice with greater clarity • Supernatural encounters that produce spiritual maturity • The untapped power of speaking in tongues... from the Old Testament The Mystic Awakening is coming to the body of Christ. Are you ready?

The Asian Turn in Foreign Investment Mahdev Mohan,Chester Brown,2021-08-26 Critically discusses the increasing significance of Asian States in the field of international investment law and policy. Contains analyses of national investment

law rule-making in Asia, contributions of Asian States on cutting-edge developments to the global community, and contemplates future possibilities for investor-State dispute settlement.

The Synchronization of National Policies Pertti Alasuutari, 2015-09-25 The Synchronization of National Policies shows how it is possible that there is remarkable uniformity in the policies that the nation-states adopt, although there is no world government. Mainstream research attributes such global governance to the influence of leading countries, to functional requirements created by capitalism and technological development, or to international organizations. This book argues that to understand how national policies are synchronized we need to realize that the global population forms a single global tribe of moderns, divided into some 200 clans called nations. While previous research on the world culture of moderns has focused on the diffusion of ideas, this book concentrates on the active role of local actors, who introduce global models and domesticate them to nation-states. In national policymaking, actors justify new policies by international comparisons, by the successes and failures of models adopted in other countries, and by building and appealing to the authority of international organizations. Consequently, national policies are synchronized with each other. Yet, because of the way such domestication of global trends takes place, citizens retain and reproduce the understanding that they follow a sovereign national trajectory. This book will be of interest to students and scholars of sociology, world culture theory, globalization, international relations, and political science.

Police and Citizen Participation Jan-Philipp Küppers, 2025-06-30 This book explains why participation processes have gained importance for the police and how they can be successfully designed. In the future, an integrated security structure will increasingly be required, in which stakeholder groups and affected citizens play an important role in police hazard and risk assessment, and thus in shaping their context-related sense of security. The book pursues a guiding and action-oriented approach on how practical participation processes for citizens can be integrated into the planning and projects of the police. Theoretical foundations and practical application fields for the implementation of participation processes are identified: involvement in cooperation discussions for discursive conflict resolution in advance of protest situations, opinion formation through information and discursive exchange of arguments within the framework of municipal security and prevention work, or issue-related round tables in the area of independent citizen and police commissioners. In a time of great uncertainty due to social change and complexity, participation processes offer the opportunity to ease strained relationships between the police and civil society and to build a mutual trust relationship. Citizen participation cannot replace sovereign action but can enrich it with everyday and experiential knowledge. In these turbulent times, there is no better recipe for jointly shaping security and addressing problems. The Content Practical assistance and better understanding of participation processes for police work Advantages of citizen participation at a glance Three practical application areas (cooperation discussions in protest situations, independent citizen and police commissioners, and municipal security and prevention work)

Dynamic Media Bob Connolly, 2007 Flash animation, music and videos, virtual reality 3D, and more in a PDF? Yes! Acrobat documents converged with audio, video, and interactive content it's the wave of the future and it's called rich media. Do you want to get your video and audio content out into the world in a more convenient way than on the Web? Are you looking for a way to share rich-media content with the broadest possible range of readers? Print publishers, advertisers, educators, and anyone else who's ready to leverage the power of PDF and Adobe Reader can benefit from learning about the possibilities of this new convergence technology. In the first book of its kind, rich-media PDF pioneer Bob Connolly presents an eye-opening overview of the world of PDFs that contain video, audio, and interactive elements. Dozens of case studies illustrate the nearly limitless potential of rich media. And the best part about the book is that it practices what it preaches, with a fully interactive rich-media version of the book on the accompanying CDROM. Readers can experience first-hand the power of rich-media PDFs through interactive animation, videos, and audio. Walk through the process of constructing rich-media PDFs on the fly using a Web server Learn which applications work together for building rich-media PDFs and which don't See how some of the world's most forward-thinking artists and designers are pushing the boundaries with rich-media PDFs Learn why PDF documents are more compelling than Web sites for reaching your target audience Understand how best to translate print material into online PDF documents

Carbon Free , 2025-03-03 It's now or never. The goal of achieving global climate neutrality is essential for ecological, economic and social reasons and requires immediate and decisive action from politicians and society. Carbon Free summarizes the building blocks we need to successfully manage the energy transition. Replete with international examples, the book's first part explores the transformation of the energy markets, necessary accompanying redistributions, the often neglected issue of global population development, but also the ethical and political framework conditions under which the energy transition should take place. Part II deals with sector-specific topics including renewable energies, heat pumps, geothermal energy and solar thermal energy. Levelized costs of energy in the context of innovation promotion and the financing method of project financing are presented. The chapters in this part discuss implementation of strategic energy partnerships and how to shape future regulatory steps. The book's third part then goes on to discuss the available toolbox, with contributions on the technical and economic perspectives of green hydrogen, grid infrastructures, digitalization as well as the circular economy. This book will benefit both scholars and practitioners with its unique overview of the elements that need to be taken into account in order for the energy transition to succeed.

Africa Analysis , 2005 A fortnightly bulletin on financial and political trends.

Germany and the European Union Gisela Müller-Brandeck-Bocquet, 2022-10-26 This book aims to present a coherent picture of Germany's European policy during Merkel's chancellorship. At the same time, it traces the development of the EU in the period 2005-2021. Accordingly, the European crises and the internal and external threats to the integration

community are addressed, as well as the jointly developed solutions. Thus, on the one hand, the book shows what Germany was willing to do for Europe; on the other, it reveals how the EU was able to develop further as the most important point of reference for German politics and power.

Power, Voice and Rights Anuradha K. Rajivan, 2010 Women still confront multiple forms of discrimination in every Asia-Pacific country. Despite robust growth and progress on many fronts, gender inequality persists and deprives the region of a significant source of human potential. Countries in the region that have done the most to tap women's talents and capacities have traveled farthest on many aspects of human development. Countries that tolerate deep inequities fall short of equal citizenship and face social instability and economic loss, particularly acute amid global economic downturn. Today, Asia-Pacific stands at a crossroads. But with better institutions, openness to ideas, and more resources, the region is well equipped to achieve gender equality. This Report looks at three key opportunities for achieving gender equality-economics, politics and the law. Transforming institutions in all three areas, changing attitudes and assessing progress continually will open the door wide to rapid, far-reaching change for human development.

Vulnerability, Territory, Population Samuel Rufat, Pascale Metzger, 2024-07-11 During the Covid-19 pandemic, the term vulnerable was applied to individuals and to populations, groups and countries in discussions, laws and regulations; now it applies to all objects in relation to all kinds of threats. However, rather than a label for governing people and places, the notion of vulnerability was expected to become an instrument to tackle the root causes of disasters, poverty and maldevelopment, as well as the inequalities and injustices they bring, whether social, political, economic or environmental. Despite this radical dimension, vulnerability has gradually been incorporated into public policies and international recommendations for global risk and disaster management. This book is intended for researchers, students, managers and decision makers concerned with the management of not only risks and crises but also climate and environmental change. The first part examines the multiple theoretical and conceptual approaches; the second explores vulnerability assessments, using examples from the Global North and Global South; and the third discusses tools, public policies and actions taken to reduce vulnerability.

Digital Libraries Catherine C. Marshall, 2003 This is the third in a series of IEEE-CS/ACM joint conferences on digital library research and development. The opening paper section in the JCDL 2003 proceedings is on music and digital libraries and runs the gamut from ethnography to algorithms. Other sections of the text tackle the formidable problem of creating metadata and managing digital resources and services. Humanities digital libraries - collections representing cultural heritage and museum artifacts - stand alongside scientific and business digital libraries.

Transnational Organized Crime in East Asia and the Pacific, 2013 Human trafficking and smuggling of migrants: Four of the 12 illicit flows reviewed in this report involve human beings. The first two concern movement between the countries of the region, one for general labour and one for sexual exploitation. The third concerns the smuggling of migrants from the region to the rich countries of the West, and the last focuses on migrants smuggled through the region from the poor and conflicted countries of South and Southwest Asia. Drug trafficking: The production and use of opiates has a long history in the region, but the main opiate problem in the 21st century involves the more refined form of the drug: heroin. In addition, methamphetamine has been a threat in parts of East Asia for decades (in the form of yaba tablets), but crystal methamphetamine has recently grown greatly in popularity. Virtually every country in the region has some crystal methamphetamine users, and some populations consume at very high levels. Resources: Resource-related crimes include those related to both extractive industries, such as the illegal harvesting of wildlife and timber, and other crimes that have a negative impact on the environment, such as the dumping of e-waste and the trade in ozone-depleting substances. In all cases, the threat goes beyond borders, jeopardizing the global environmental heritage. These are therefore crimes of inherent international significance, though they are frequently dealt with lightly under local legislation. Counterfeit goods: The trade in counterfeit goods is often perceived as a soft form of crime, but can have dangerous consequences for public health and safety. Fraudulent medicines in particular pose a threat to public health, and their use can foster the growth of treatment resistant pathogens.
