B. Yeager,Edia Connole

Amygdalatropolis B. Yeager,Edia Connole,2017-01-17 From Schism[2] Press Amygdalatropolis is a work of brilliant neurorealism in which the city is a Computer, a libidinal pornutopia voided of all bedeutung other than the residual, electronic prickling of sexual fear and auto-autistic aggression where software and synapse flicker in an endless algorithmic loop. Norburt Wiener's apocalyptic steersman leads directly here: a psychopathological cyberutopia heading straight into the lake of fire. Scott Wilson, author of Great Satan's rage: American negativity and rap/metal in the age of supercapitalism Yeager's haphephobic protagonist /1404er/ has got over reality, family or the social and moved on - to a somewhat more tenable amnion of snuff porn, clickbait and casual online scapegoating. Amygdalatropolis inhabits our post-truth heterotopia like some virulent new literary life form, perfectly tooled for the death of worlds. David Roden, author of Posthuman Life: Philosophy at the Edge of the Human

The Literature of Exclusion Andrew C. Wenaus,2021-05-05 In the early twentieth century, the Dadaists protested against art, nationalism, the individual subject, and technologized war. With their automatic anti-art and cultural disruptiveness, Dadaists sought to “signify no thing.” Today, data also operates autonomously. However, rather than dismantling tradition, data organizes, selects, combines, quantifies, and simplifies the complexity of actuality. Like Dada, data also signifies nothing. While Dadaists protest with purpose, data proceeds without intention. The individual in the early twentieth century agonizes over the alienation from daily life and the fear of being converted into a cog in a machine. Today, however, the individual in twenty-first-century supermodernity merges, not with large industrial machinery, but with the processual and procedural logic of programming with innocuous ease. Both exclude human agency from self-narration but to differing degrees of abstraction. Examining the work of B.R. Yeager, Samuel Beckett, Jeff Noon, Kenji Siratori, Mike Bonsall, Allison Parrish, and narratives written by artificial intelligence, Wenaus considers the threshold of sensible narration and the effects that the shift from a culture of language to a culture of digital code has on lived experience. While data offers a closed system, Dadaist literature of exclusion, he suggests, promises a future of open, hyper-contingent, unprescribed alternatives for self-narration.

Wretch Ansgar Allen,2020-05-16 In Ansgar Allen's Wretch, a naked prisoner in a cell dutifully records the seemingly ineluctable decay of 'the Known City' with the aid of a writing machine. Each account, however, is a reordering of the

scattered testaments of souls disordered by expeditions into an ever encroaching 'Outside'. The unreliability of its copyist is thus no postmodern trope but derives from the principled impossibility of the copy. *Wretch* thus builds its horror from the simplest metaphysical constituents, envelops the reader like slow mo Ligotti, but is yet more paradoxically disturbing for the glacial consistency of its prose.-- David Roden, author of *Posthuman Life: Philosophy at the Edge of the Human*. If Samuel Beckett had rewritten Jules Verne's *Journey to the Centre of the Earth* while watching Tarkovsky's *Stalker*, you might get something like *Wretch*. A hypnotic expedition into the cells and territories of an ecological dystopia and the lives of those in its service. Terrifying, haunting, but also, in places, strikingly beautiful, like the flowers blooming in the radioactive landscapes of Diana Thater's *Chernobyl*.-- Emile Bojesen, author of *Forms of Education and Reader in Education* at the University of Winchester. A copyist, or rather the body of a copyist, is at work in a cell. He is nameless, as is everyone. There are no names in his world. Pieces of paper are pushed under his door, and he is busy at a machine. Both body and machine are, though, having trouble. Infernal reason is on the rise. What now? Stunning.-- John Schad, Professor of Modern Literature, University of Lancaster, and author, most recently, of *Paris Bride*. Pessoa once said: '[t]o still not have died is enough for life's wretches, and to still have hope.' One of these wretches produced the copy you hold in your hands, and while that might go some way toward explaining this book's title and thematic, allow me to expand. Ansgar Allen is an accomplished stylist engaged in a highly structured, critical form of fiction-as-medium (in the manner of Marcel Proust or Marcel Broodthaers, for instance), thus what he has ostensibly given us in *Wretch* is a stack of found copy (format trouvé) -- produced by an entirely unreliable narrator -- that bound together constitutes a sort-of-narrative straddling the landscape of reason and its Other; stratifying, accordingly, compulsively, infernal regions and impregnable fortresses. Less a book than an 'object-event' (in the Foucauldian sense), *Wretch* is a meticulously constructed puzzle of reality and unreality, of psychological and . . . creeping biological horror, relayed by an abject Sisyphean copyist whose conscription in this (alien and alienating) loopy labour largely eludes us, but whose droning prose is at once maddeningly mundane and insanely compelling. A textual aberration worthy of Schism Neuronics. If you enjoyed B.R. Yeager's *Amygdalatropolis*, you'll love this!-- Edia Connoles, Schism editorial board member and author, most recently, of 'So, Black Is Myself,' in *Hebidge and Subculture in the Twenty-First Century: Through the Subcultural Lens*. What at first feels like a bleak update of Beckett's *Molloy* soon devolves into a terrifying take on Tarkovsky's *Stalker*. An imprisoned, nameless narrator tasked with copying knowledge, to render 'what was written' into print, transcribes reports of a traveling party who wandered beyond the confines of 'the known city.' *Wretch* reflects an increasingly isolated, unthinkable world, one in which unknown regions encroach upon the comforts of our bleach-soaked jail cells. The very act of reading this book--an object so wonderfully and frighteningly about itself--risks exposure to decay and disintegration. You'll never see the act of creation in quite the same way again.-- David Peak, author of *The Spectacle of the Void*.
