Behavioral, Social, and Emotional Assessment of Children and Adolescents Sara Whitcomb, 2017-08-30 Generally recognized as the standard work in its field, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* is a comprehensive guide for conducting conceptually sound, culturally responsive, and ecologically oriented assessments of students' social and emotional behavior. Written for graduate students, practitioners, and researchers in the fields of school psychology, child clinical psychology, and special education, it will also be of interest to those in related disciplines. Building on the previous editions, this fifth edition includes updated references to DSM-5 and federal standards as well as an integrated approach to culturally competent assessment throughout the text. In Part I, *Foundations and Methods of Assessment*, the author provides a general foundation for assessment practice and outlines basic professional and ethical issues, cultural considerations, and classification and diagnostic problems. Part II, *Assessment of Specific Problems, Competencies, and Populations*, includes material on assessing specific social-emotional behavior domains, including externalizing problems, internalizing problems, social skills and social-emotional strengths, and the unique needs of young children. A chapter on school-wide screening methods was also added with this edition. By weaving together the most recent research evidence and common application issues in a scholarly yet practical matter, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* continues to be the pre-eminent foundation for assessment courses.

Counseling Children and Adolescents Jolie Ziomek-Daigle, 2025-03-07 Expansive and practical, *Counseling Children and Adolescents* offers graduate students the information they need to prepare for work in both school and clinical mental health settings (two CACREP specialty areas). This text includes not only content related to developmental and counseling theories but also information on evidence-based practices across the continuum of care, diagnosis and treatment of youth, and current trends such as integrated care, mindfulness, telehealth, and neuroscience. Unique to this book are sections on both the instructional and behavioral Response to Intervention (RtI) model and Positive Behavioral Interventions and Supports (PBIS), examples of evidence-based practices used across settings such as Student Success Skills, Check & Connect, and trauma-focused CBT, and a review of common mental health-related disorders most often seen in youth and treatment recommendations. Ethical and legal implications are infused throughout the book, as are CACREP learning outcomes. The new edition uses a trauma-informed and anti-racist lens and fills a gap in counselor preparation programs. A

Encyclopedia of Special Education Cecil R. Reynolds, Elaine Fletcher-Janzen, 2007-01-02 The Third Edition of the highly acclaimed Encyclopedia of Special Education offers a thoroughly revised, comprehensive A to Z compilation of authoritative information on the education of those with special needs. All articles are cross-referenced, and citations guiding you to related sources appear at the end of each entry.

Assessment of Exceptional Students Ronald L. Taylor, 2000 Assessment of Exceptional Students, Fifth Edition, offers a pragmatic approach that emphasizes how both informal and formal procedures fit into the overall assessment process. Retaining the major features of previous editions, this book details historical, legal, and philosophical issues as well as current concerns in the field. It provides up-to-date coverage of assessment instruments, techniques, and procedures that are used with special education students, and reviews observation, criterion-referenced testing, curriculum-based and portfolio assessment, and other alternative procedures. In addition to covering the areas of ability assessment, achievement testing, early childhood assessment, and vocational assessment, the book also provides readers with a complete chapter and case studies that examine the instruments and techniques for students with both mild and severe disabilities. For anyone interested in assessing special education students.

Essentials of Behavioral Assessment Michael C. Ramsay, Cecil R. Reynolds, R. W. Kamphaus, 2002-03-05 This book provides mental health professionals with state-of-the-art interpretive and administrative guidelines for using the Child Behavior Checklist tests.

Disorders of Development and Learning Mark Wolraich, 2003 This third edition of Disorders of Learning and Behavior builds upon the superb foundation established by the previous editions while maintaining its basic text format. The first section provides information on various assessments and general management procedures. Theories of development and learning are described to provide a theoretical system for a scientific method of management. Commonly used assessment procedures from such professionals as psychologists and speech and language clinicians are examined in addition to providing information on developmental screening and early intervention. The second section of the book provides specific information about the most common developmental and learning disorders likely to be seen by the primary care clinician. Each chapter has been revised to include the most recent information available, particularly for attention deficit hyperactivity disorder. Several chapters have been added to cover some additional common causes of mental retardation. Key Features Chapters are organized by definitions, etiologies and pathophysiologies, assessments and findings, management, and outcomes. Content has been updated and revised to include the most recent information available on disorders of development and learning. Accompanying CD-ROM features the complete text and illustrations in fully searchable PDF files and is ideal for presentations and patient education.
