Green Fashion Retail Jochen Strähle, 2016-10-18 This book focuses on sustainability in fashion retail, which is fast becoming the pivot point of future fashion retail strategies. Chapters in the book provide theoretical and practical insight on how going green may positively influence the strategy of fashion retailers and marketers, who have to react to the changing society and customer needs. Structured in four main parts, and based on distinct research questions, readers will be able to dig deep into the individual levers for possible adaptations. It thus provides a solid understanding on how to integrate green aspects into any fashion retailers business model.

Handbook of Design and Industry Maria João Félix, Rita Assoreira Almendra, Fernando Moreira da Silva, Fátima Pombo, Paulo Jorge de Sousa Cruz, 2025-09-30 The twenty-first century has been beset by a global pandemic, war and increasingly concerning environmental disasters. Designers and industries have been forced to imagine a world in which the only way to move forward is to look back. The design and industry sectors need to understand the role they can play in removing obstacles to social progress and work together to create healthier human societies that can interact with the world in a sustainable way. This book presents contributions from leading experts that reveal that a better and more prosperous world is achievable through good work and system design. This book consists of chapters that bring together researchers, academics, policy makers, and designers from technology companies and business associations with the objective of developing a focused vision that enhances innovation through design and industry for a better future. Through a transdisciplinary scientific exchange, it lists responses to the challenges of climate change and environmental degradation that will contribute to a more modern, resource-efficient, competitive economy, with smart, sustainable, and inclusive growth, promoting knowledge, inter-sector collaboration, health, education and a digital society for all. By putting the human at the heart of what can be accomplished, this book investigates better design in the disciplines of work, healthcare, product, system, manufacturing, and industry. The reader will gather an interdisciplinary perspective on what good design can achieve and why it is needed to challenge the climate crisis. The Handbook of Design and Industry: Scenarios for Sustainable Futures is essential reading for researchers and academics in the fields and disciplines of ergonomics/human factors, occupational health and safety, industrial design, product design, industrial engineering, materials engineering, process engineering, computer engineering, communication design, electronics and telecommunications engineering.

Supply Chain Management and Logistics in the Global Fashion Sector Rajkishore Nayak, 2020-11-12 The ways in which we design, make, transport and then discard clothes has a huge social and environmental impact. This book covers responsible business practices and sustainability in the fashion industry from the raw fibre stage, through production, to the point of customer consumption. The concepts of responsibility and sustainability are fast becoming essential factors in business decisions and *Supply Chain Management and Logistics in the Global Fashion Sector* leads the reader through the multiple stages in the supply chain that can impact on business strategy. A perfect resource for students studying fashion and for those working in the sector who wish to identify the latest thinking as they plan sustainability strategies, the book is divided into four clear sections. Part I of the book examines sustainability in the supply chain by identifying the three pillars of sustainability (social, economic and environmental) and considers how fashion brands are innovating in this area. Part II looks at fashion logistics and supply chain operations by assessing fibre, yarn and fabric considerations, logistical issues for both garment production, and service delivery, stock control, transportation, barriers and risks. Part III develops the logistics theme further by identifying recent trends and case studies that highlight agility and lean management structures, and the application of transparency enhancing radio frequency identification (RFID). This section further applies modelling and simulation techniques from the automotive and pharmaceutical industries to the fashion sector. Part IV considers how sustainability can be embedded into the multi-tiered fashion supply chain and its selling environment.

Reverse Design Ana Cristina Broega, Joana Cunha, Helder Carvalho, Manuel Blanco, Guillermo García-Badell, Diana Gómez-Chacón, 2018-09-25 The collaboration between the Textile Department of the University of Minho and the Brazilian Association of Studies and Research (ABEPEM) has led to an international platform for the exchange of research in the field of Fashion and Design: CIMODE. This platform is designed as a biennial congress that takes place in different European and Latin American countries with the co-organization of another university in each location. The current edition was jointly organized by the University of Minho and the Centro Superior de Diseño de Moda (CSDMM) - Universidad Politécnica de Madrid. CIMODE's mission is to explore fashion and design from a social, cultural, psychological and communication perspective, and to bring together different approaches and perceptions of practice, education and the culture of design and fashion. Through an interdisciplinary dialogue and intercultural perspective, CIMODE wants to generate and present new scenarios about the present and future of fashion and design. 'DISEÑO AL REVÉS' ('BACKWARD DESIGN') was the central

theme of the 4th CIMODE (Madrid, Spain, 21-23 May 2018), which produced a highly topical and relevant number of academic publications presented in this book.

Promoting Fair Globalization in Textiles and Clothing in a Post-MFA Environment Jean-Paul Sajhau, International Labour Organisation. Sectoral Activities Programme, 2005 There is considerable turmoil in the textiles and clothing industries as a result of the phasing out of quotas by Canada, Norway, USA and the EU and the ability of China to disproportionately profit from the new freedom of trade. Dealing with the problems requires integrated strategies from the global to local level and cooperation between governments and social partners. To aid this process the ILO is calling a tripartite meeting of governments, employers and workers organisations. This report has been prepared for discussion at that meeting. It looks at the implications of the phasing out of quotas and potential strategies for fair globalization.

Business in Kenya Dorothy McCormick, Patrick O. Alila, Mary Omosa, 2007 This book is about business in Kenya. Starting from theories of institutions as formal and informal rules that shape human behaviour, it examines the institutional context for business and the ways in which firms and other organisations are formed, operate, and interact. Some of the institutions are internal to Kenya, but others are regional, continental or global in their origins and impact. The book examines how these institutions interact to create incentives for certain types of investment, and disincentives for others. It also discusses the strategies that government can adopt to strengthen the Kenyan business system and make it more competitive. The book originated in a three-year research project on Business Systems in Africa carried out as part of a collaboration between the Institute for Development Studies of the University of Nairobi, and the Centre for Development Research, Copenhagen. The studies involved more than a dozen researchers in an examination of the influence of political, economic and social institutions on Kenyan firms of all sizes. Its approach, which uses sectors of the economy as lenses through which to view the business system, has provided a rich tapestry of information useful for policymakers, students and scholars. The editors are based at the Institute for Development Studies, University of Nairobi. Dorothy McCormick is Associate Research Professor and Director of the Institute. She specialises in industrial development with particular emphasis on micro and small

enterprises. Patrick O. Alila is Research Professor and was the Institute's Director from 1995 to 2001. Trained in political science and development administration, he specialises in rural development and local level institutions. Mary Omosa is Senior Research Fellow and University of Nairobi UNESCO/UNITWIN Chair. Her major research focus is on development sociology and rural livelihoods.
