**Curt R. Bartol, Anne M. Bartol**

**Criminal Behavior** Curt R. Bartol, Anne M. Bartol, 2020 In this text we focus on criminal behavior and antisocial behavior (because antisocial behavior is not always criminal) from a psychological perspective. More specifically, adults and juveniles who violate the law or who act antisocially are portrayed as embedded in and continually influenced by multiple systems within the psychosocial environment. Meaningful theory, well executed research, and skillful application of knowledge to the crime problem require an understanding of the many levels of events that influence a person's life course--from the individual to the individual's family, peers, schools, neighborhoods, community, culture, and society as a whole--

Adopting a global perspective, this volume applies various theoretical frameworks to explore the experiences of diverse disabled communities, including those with mental health issues, neurodiversity, sensory impairments, and physical disabilities, as they interact with the criminal justice system. It also presents contemporary perspectives on crime and victimisation, encompassing biomedical, biopsychosocial, structural, cultural, and realist approaches, and in doing so it delves into critical issues, including marginalisation, discrimination, exclusion, and intersectionality, while also addressing the inherent disablism and ableism apparent in the justice system. *Sex Crimes* Donna Vandiver, Jeremy Braithwaite, 2022-04-11 *Sex Crimes: Research and Realities*, 2nd edition, provides succinct overviews and details of the research regarding sex crimes and the persons who commit them, dispelling common myths related to sex crimes that have been contradicted in the scientific literature in recent decades. Throughout the book, survivors of sexual violence are highlighted, including those who have engaged in activism leading to positive changes for victims of sexual violence or came forward with their stories of sexual victimization despite being told nothing can be done. The book begins with a broad overview of the number and types of sex crimes that occur annually, then outlines several theories developed to explain sex crimes specifically, along with descriptions of popular criminological theories that have been applied to persons who have committed a sex crime. The next several chapters provide details regarding different types of sex crimes. Subsequently, the authors provide an overview of juveniles and females who commit sex crimes, and of sex crimes that occur within an institution, such as college campuses and sports or youth organizations. New to this edition is a chapter that focuses on victims of sex crimes and the victimology of sexual violence. Attention is given to the nuances of investigating sex crimes and policies (such as registration and civil commitment laws) affecting persons who have committed a sex crime. The conclusion provides an overview of the myths regarding sex crimes and the persons who commit them, again with a summary of what research has unveiled while highlighting areas of recommended future research. This book is suitable for an undergraduate or graduate-level course for a variety of social science fields. It is invaluable for treatment providers, law enforcement officers, detectives, or policy makers.
