Dictionary Of E-Commerce J. Erickson,2003-01-01 Electronic Commerce Popularly Called E-Commerce Is Often Used Interchangeably With The Term E-Business . In Reality, E-Business Carries A Much Broader Sense Rather Than Just The Shopping. Some People Also Use The Term Internet Commerce To Mean Electronic Commerce That Specifically Uses The Internet Or The Web For Data Transmission. In Its Simplest Form, It Refers To Shopping On The Part Of The Internet Called The World Wide Web Or The Web. But Web Shopping Is Only A Small Part Of The E-Commerce Picture. The Term Also Includes Online Stock Transactions, Downloading Software Without Going Near A Store, Etc. For Most Businesses, It S Not Really About Selling At All But About Improving Relationships Among Suppliers, Distributors And Customers. Electronic Commerce Can Be Defined As Any Form Of Computerized Buying And Selling, Both By Consumers And From Company To Company, Which Facilitates Choosing The Goods, Ordering, Delivery, After Sales Support And Payment.E-Commerce Is Shrinking The World. Distant Markets Suddenly Are Within Easy Reach, Saving Business Time And Money, Prospecting And Presenting New Business Opportunities Based On Better And More Thorough Information.Keeping In View The Rapidly Growing Importance Of E-Commerce, The Present Dictionary Is Prepared. The Terms Are Judiciously Selected And Defined Accurately And Explained. Substantially Based On Authoritative Sources, This Can Be Used As A Dependable Reference Tool.

Modern Law of International Trade Ajendra Srivastava,2020-08-31 This book presents a comprehensive and systematic study of the principal aspects of the modern law of international commercial transactions. Based on diverse sources, including legislative texts, case law, international conventions, and a variety of soft-law instruments, it highlights key topics such as the international sale of goods, international transport, marine insurance, international finance and payments, electronic commerce, international commercial arbitration, standard trade terms, and international harmonization of trade laws. In focusing on the private law aspects of international trade, the book closely analyzes the relevant statutes, case law and the European Union (EU) and international uniform law instruments like the Rome I Regulation, the UN

Convention on the Contracts for the International Sale of Goods (CISG), UNCITRAL Model Laws; non-legislative instruments including restatements such as the UNIDROIT Principles on International Commercial Contracts, and rules of business practices codified by the ICC such as the Arbitration Rules, UCP 600 and different versions of the INCOTERMS. The book clearly explains the key concepts and nuances of the subject, offering incisive and vivid analyses of the major issues and developments. It also traces the evolution of the law of international trade and explores the connection between the *lex mercatoria* and the modern law. Comprehensively examining the issue of international harmonization of trade laws from a variety of perspectives, it provides a detailed account of the work of major players in the field, including UNCITRAL, UNIDROIT, ICC, and the Hague Conference on Private International Law (HCCH). Adopting the comparative law method, this book offers a critical analysis of the laws of two key jurisdictions—India and England—in the context of export trade. In order to stimulate discussion on law reform, it explains the similarities and differences not only between laws of the two countries, but also between the laws of India and England on the one hand, and the uniform law instruments on the other. Given its breadth of coverage, this book is a valuable reference resource not only for students in the fields of law, international trade, and commercial law, but also for researchers, practitioners and policymakers.

E-business M. Papazoglou,Pieter Ribbers,2006 Two significant factors combine to drive the phenomenon of e-Business. Competition constantly motivates companies in their marketplaces, while rapidly developing information technologies offer new opportunities and challenges. For Mike Papazoglou and Pieter Ribbers, both business and technology are integral to e-Business. They demonstrate here how a solid understanding of business, organization, management and technology is crucial to an understanding of what e-Business is today and how it is going to be shaped in the future. e-Business: Organisational and Technical Foundations focuses on the development of e-Business between and within enterprises. In particular it addresses how enterprises collaborate, what coordination mechanism are necessary and how this is reflected at the technical

infrastructure level. It includes: Abundant real-world examples to encourage readers to understand and appreciate real-life e-Business An analytical and critical approach to understanding business issues, decision-making and technology use and development Extensive end of chapter discussion questions and assignments for students A companion website at www.wiley.com/go/ebusiness with additional exercises for students and PowerPoint slides and solutions for lecturers

The E-Fulfillment Process 2020 of Amazon, 2020-10-06 Seminar paper from the year 2020 in the subject Computer Science - Commercial Information Technology, grade: 1.3, University of Applied Sciences Bonn (FOM), language: English, abstract: This essay aims to define and explain the comprehensive e-fulfillment process in detail as well as its essential existence within e-marketplaces. The series of sub-processes making up the e-fulfillment process will be presented in the corresponding order of the four phases of transaction. Of all five sub-processes the e-matching process will be covered in further detail. "An e-marketplace (also called e-market, virtual market, or marketspace) is an electronic space where sellers and buyers meet and conduct different types of transactions.". Taking this definition as a reference one can say that an e-marketplace serves as one of the possible platforms for transactions between providers and demanders in electronic-commerce. E-marketplaces differ in their strategy and layout and are composed of a variety of specifications such as branch specificity (vertical- and horizontal marketplaces), different pricing models such as e-auctions, dynamic- and fixed pricing as well as a selection of possible operator models.
