A Frequency Dictionary of British English Vaclav Brezina, Dana Gablasova, 2023-11-30 A Frequency Dictionary of British English provides information about the frequency and distribution of words in British English. The dictionary presents rich information about word frequencies and distributions in an accessible manner. In addition to textual and numerical information, the dictionary offers a range of visualisations to help understand the statistical properties of words. These visualisations are especially important for pedagogical uses of the book. This book also includes vocabulary exercises for learners of English to activate their vocabulary with the help of the dictionary. The dictionary is based on extensive research on current British English using the British National Corpus 2014, a 100-million-word corpus of contemporary British English developed at Lancaster University. The corpus represents a wide range of genres/registers of spoken and written English, including informal speech, fiction, newspapers, academic writing and e-language. Additional support materials for this book are available at <https://lancslex.lancs.ac.uk> This dictionary is designed to meet the needs of a wide variety of users interested in current British English vocabulary including students, educators, journalists, material developers and researchers.

Media-Related Out-of-School Contact with English in Germany and Switzerland Maleika Krüger, 2023-08-22 This open access book aims to close a critical research gap in understanding how frequently German-speaking adolescents come into contact with the English language through various media channels, such as television, books, or the internet, and how this contact influences learners' English competences. In addition, this research project explores the effect of family background and gender on this contact. The analysis shows frequent contact with English-language media content by young learners in Germany and Switzerland. More frequent contact was associated with higher language competences. Differences could be found in the preferences of media content and type of media channels due to socio-economic family background and gender.

The Aboutness of Writing Center Talk Jo Mackiewicz, 2016-11-18 Writing centers in universities and colleges aim to help student writers develop practices that will make them better writers in the long term and that will improve their draft papers in the short term. The tutors who work in writing centers accomplish such goals through one-to-one talk about writing. This book analyzes the aboutness of writing center talk—what tutors and student writers talk about when they come together to talk about writing. By combining corpus-driven analysis to provide a quantitative, microlevel view of the subject matter and sociocultural discourse analysis to provide a qualitative macrolevel view of tutor-student writer interactions, it further establishes how these two research methods operate together to produce a robust and rigorous analysis of spoken discourse.

The Alphabet and Sounds of Usa English: Truespel Book 4 Thomas E. Zurinkas, 2006-06-01 This book is an in-dept analysis of the letter/sound correspondence of USA English. It combines two databases, one from the Times of London which counts the frequency of words in the newspaper, and the other from the truespel database of phonetic spelling of USA English. Together they combine to count letter and sound correspondence for frequency analysis. Each of the 26 letters of the alphabet is examined and lists are made of a letters most frequent position in words, top ten words containing the letter, and sounds spelled by the letter. Each of the 40 sounds are analyzed similarly. The analysis represents once and for all how the sounds of USA English are spelled as spoken (spoken word dialog being the same as newspaper text) and how often and in what way the letters of the alphabet portray those sounds.
