**Digital Innovations for Mental Health Support** Prescott, Julie, 2021-11-19 Given the migration to more technologically driven services and resources in today's world, as well as the range of digital innovations and research that have taken shape throughout the COVID-19 pandemic, it is important to consider the role that such advancements have played in supporting mental health initiatives. Throughout the COVID-19 pandemic, mental health service providers utilized technology and online environments more than ever before to care for people's mental health and emotional needs, which has forced us to raise questions like how COVID-19 has impacted mental health support and services and how technology has helped people with their mental health through this ongoing crisis, along with outlooks for the future. Digital Innovations for Mental Health Support explores a range of current developments and topics surrounding the application of technology in mental health services including the need to examine the availability and forms of technologies to support mental health, how technology is received by people and the providers of services utilizing technology, how online platforms are increasingly being used for support and how efficacious these are, as well as how they are monitored and the issues that arise from their use. This publication provides an outlet with chapters focusing on empirical studies across a variety of disciplines that utilize technologies and online platforms to support mental health and emotional well-being, including psychology, counseling, medicine, education, and psychiatry. Covering topics such as counseling online and computer games to support mental health, it is ideal for researchers, academics, healthcare professionals, and students.

**Adolescent Suicide and Self-Injury** Laurel L. Williams, Owen Muir, 2020-07-22 This volume presents a comprehensive and practical approach to the treatment of suicide and NSSI for adolescents utilizing a mentalizing framework. The beginning of the text provides up-to-date information on the theory of a mentalizing therapy in order to ground the readers in the neuroscientific underpinnings of a mentalizing approach. Next chapters provide information on the fundamental building blocks of a mentalizing therapy at the individual and family level. These chapters provide step-by-step approaches in order to provide examples of the techniques involved in mentalizing treatment that can be employed to address suicidality and NSSI. The next chapter builds on these concepts as the reader learns about mentalizing failures involved in common co-morbidities in adolescents who are experiencing suicidality and/or employing NSSI. The next several chapters cover practical issues related to working within this patient population including the key concept of social systems and connections for both providers and adolescents, the ability of mentalizing theory and therapy to integrate with other effective therapies, how to approach sessions after a suicide attempt, resiliency for patient, family and the provider, along with important self-care for a therapist if a patient commits suicide. The final chapter brings all of the aforementioned elements together in order for the reader to conceptualize employing a mentalizing approach to adolescents and their families when suicide and NSSI concerns are a predominate focus of care. Illustrations of specific therapeutic approaches and a list of resources and guidelines where available are also included. Adolescent Suicide and Self-Injury is an excellent resource for all clinicians working with youths at risk for suicide and/or self-injury, including psychiatrists, psychologists, pediatricians, family medicine physicians, emergency medicine specialists, social workers, and all others.
