Postfoundational Phenomenology James Richard Mensch,2010-11-01 A study of Edmund Husserl's philosophy as a non-foundational approach to understanding the self as an embodied presence. It demonstrates how Husserl, anticipating the investigations of Merleau-Ponty, explored how the body functions to determine our self-presence, freedom, and sense of time.

Heidegger Jacques Derrida,2016-06-16 Few philosophers held greater fascination for Jacques Derrida than Martin Heidegger, and in this book we get an extended look at Derrida's first real encounters with him. Delivered over nine sessions in 1964 and 1965 at the École Normale Supérieure, these lectures offer a glimpse of the young Derrida first coming to terms with the German philosopher and his magnum opus, Being and Time. They provide not only crucial insight into the gestation of some of Derrida's primary conceptual concerns—indeed, it is here that he first uses, with some hesitation, the word “deconstruction”—but an analysis of Being and Time that is of extraordinary value to readers of Heidegger or anyone interested in modern philosophy. Derrida performs an almost surgical reading of the notoriously difficult text, marrying pedagogical clarity with patient rigor and acting as a lucid guide through the thickets of Heidegger's prose. At this time in intellectual history, Heidegger was still somewhat unfamiliar to French readers, and Being and Time had only been partially

translated into French. Here Derrida mostly uses his own translations, giving his own reading of Heidegger that directly challenges the French existential reception initiated earlier by Sartre. He focuses especially on Heidegger's *Destruktion* (which Derrida would translate both into "solicitation" and "deconstruction") of the history of ontology, and indeed of ontology as such, concentrating on passages that call for a rethinking of the place of history in the question of being, and developing a radical account of the place of metaphoricity in Heidegger's thinking. This is a rare window onto Derrida's formative years, and in it we can already see the philosopher we've come to recognize—one characterized by a bravura of exegesis and an inventiveness of thought that are particularly and singularly his.

Biodeconstruction Francesco Vitale, 2018-02-15 In *Biodeconstruction*, Francesco Vitale demonstrates the key role that the question of life plays in Jacques Derrida's work. In the seminar *La vie la mort* (1975), Derrida engages closely with the life sciences, especially biology and evolution theory. Connecting this line of thought to his analysis of cybernetics in *Of Grammatology*, Vitale shows how Derrida develops a notion of biological life as itself a sort of text that is necessarily open onto further articulations and grafts. This sets the stage for the deconstruction of the traditional opposition between life and death, conceiving of death as an internal condition of the constitution of the living rather than being the opposite of life. It also provides the basis for the deconstruction of the rigidly deterministic concept of the genetic program, an insight that anticipates recent achievements of biological research in epigenetics and sexual reproduction. Finally, Vitale argues that this framework can enrich our understanding of Derrida's late work devoted to political issues, connecting his use of the autoimmune lexicon to the theory of cellular suicide in biology.

Refugees Nathan Bell, 2021-03-18 There have never been more refugees, across the world from Myanmar to Syria, than at this moment. Many more millions of refugees are likely to be displaced by the effects of climate change. Why has politics failed to produce adequate responses to these challenges, and not heeded the lessons of refugee crises of the past? Are human rights and international law, or more radically, the case for 'open borders', sufficient to address them? Nathan Bell argues for nothing less than a new concept of the political: that societies (liberal or not, in the mode of the sovereign state or some other form) embrace an ethos of responsibility for others, where the right to seek asylum becomes foundational for politics itself. Such a proposal is at the antipodes of Schmitt's friend-enemy distinction, such that hospitality and not hostility forms the basis of political decision-making. This book comprises two halves: the first establishes the theoretical basis of the ethos of responsibility, with particular reference to the writings of Hannah Arendt, Emmanuel Levinas and Jacques Derrida,

while the second half examines these theorists in the context of historical and contemporary case studies. Finally, the book calls for a 'politics of hauntology' in memory of the missing - those who might have been rescued, and those yet to come, who are already among the disappeared. In this urgent work, Bell demonstrates that a radical reconfiguration of the understanding of politics is required in order to safeguard the future and human dignity of stateless persons.

Fieldnotes in the Critical Study of Religion Richard Newton, Vaia Touna, 2023-05-18 This book introduces students to the so-called classics of the field from the 19th and 20th centuries, whilst challenging readers to apply a critical lens. Instead of representing scholars and their works as virtually timeless, each contributor provides sufficient background on the classic work in question so that readers not only understand its novelty and place in its own time, but are able to arrive at a critical understanding of whether its approach to studying religion continues to be useful to them today. Scholars discussed include Muller, Durkheim, Freud and Eliade. Fieldnotes in the Critical Study of Religion: Revisiting Classical Theorists therefore offers a novel way into writing both a history and ethnography of the discipline, helping readers to see how it has changed and inviting them to consider what-if anything endures and thereby unites these diverse authors into a common field.
