Personal Well-Being Lessons for Secondary Schools: Positive psychology in action for 11 to 14 year olds Ilona Boniwell, Lucy Ryan, 2012-03-16 This book offers practitioners working with 11 to 14 year olds a highly practical education resource for running personal well-being lessons, backed up by scientific research from the field of positive psychology. The book is divided into six subject headings, with six lessons offered per subject area. This will allow you to run a programme with between 6 to 36 lessons. The six core concepts within positive psychology for young people are: Positive Self, Positive Body, Positive Emotions, Positive Mindsets, Positive Direction and Positive Relationships. The authors ensure that the lessons are easy to understand, to lead and to manage by ensuring each lesson contains: A suggested 60 minute outline lesson plan The main body or the 'how-to' of running the lesson Suggested homework where appropriate Academic references and resources This is a must-have resource for PSHE teachers, SEAL co-ordinators, educational psychologists and youth and community workers looking to deliver a personal well-being curriculum. Boniwell and Ryan provide an excellent synopsis of the current state of wellbeing literature focusing on evidence-based studies and how these link into contemporary public policy. This underpins the work that Boniwell and Ryan have done to ensure that the 'hands-on' methodology outlined throughout the text is underscored by science that highlights the importance of each exercise. Dr Mathew A White, Director, Wellbeing & Positive Education, St Peter's College, Australia and Fellow, Melbourne Graduate School of Education, University of Melbourne, Australia This book is a much welcomed addition to the field of student well-being. This book is an asset to any teacher who believes in 'whole-student' learning. Lea Waters, Associate Professor, University of Melbourne, Australia This book does exactly as promised by the title. Providing practical, exciting, creative, and stimulating lesson plans for students, on the subject of well-being and, indeed, life skills, informed by the best available evidence from Positive Psychology... This book provides a flexible and accessible source book of wonderful ideas and activities. Given the importance of student well-being, and their emotional, social and personal development, as well as their basic happiness, this book would be valuable for every Secondary School and Academy. Professor Irvine S. Gersch, University of East London, UK Ilona Boniwell and Lucy Ryan's book is exactly what teachers require... This is not only a book but also a very interesting tool designed for each teacher in charge of pupils aged from 11 to 14. Dr Charles Martin-Krumm, University Western Brittany, France A very useful compendium of PSHE-type activities Guy Claxton, University of Winchester, UK

Sharpen your storytelling by learning How to Craft Killer Dialogue. Ever wondered what techniques Elmore Leonard and Quentin Tarantino use to conjure the dialogue for their slick and highly quotable crime stories? **Characteristics and Functions of Direct Quotes in Hispanic Fiction** Isolde J. Jordan, 2001 The application of pragmalinguistic methods of analysis to literature is often difficult due to the special and unique way language is used in a written literary work. Based on the assumption that literature is an act of communication, Isolde J. Jordan applies communication models, such as Bühler's, Jacobson's, and Ducrot's, and theories of relevance, information and dialogue structure, and foregrounding to direct quotations taken from Hispanic fiction. Jordan shows how direct speech reporting can facilitate the interpretation of fiction by creating context, enhancing relevance, and by foregrounding information, and thus speaking directly to the reader.
