Bases moleculares de la vida Del Riesgo Prendes, Lilia, Garzón Fernández, Ruth, Castillo Rivera, Fabio, 2010-09-29 Con este nuevo libro pretendemos contribuir a la orientación del aprendizaje acerca de las características moleculares de las células y la comprensión de las modificaciones que estas sufren en su interacción con el entorno; asimismo, ofrecer una guía para que los estudiantes que comienzan sus aprendizajes en la educación superior y particularmente en la Bioquímica, logren comprender los conceptos relacionados con la estructura y la función de las principales biomoléculas encargadas de la vida celular. La comprensión teórica de los conceptos está directamente relacionada con su aplicación práctica, de tal forma que se ha establecido una serie de orientaciones para su abordaje experimental, buscando con ello que los estudiantes desarrollen sus capacidades de análisis, discusión y desempeño en el ámbito experimental. El estudio consecuente y comprometido de estas orientaciones se convertirá en una excelente herramienta para el aprendizaje con comprensión de la relación entre la estructura y función de las biomoléculas que hacen posible la vida en nuestro planeta.
