Stranger Than Fiction Patricia Griffin Rens, 2001-12 Throughout history ordinary men and women who may or may not have been more intellectual than the rest of us, but were certainly more observant have often made great discoveries! Alexander Fleming noticed that some mold, which had blown into his laboratory, killed several of the bacterial cultures he was working with. Thus, we had penicillin! Another scientist who had been working with microwaves discovered they had heating properties that could popcorn and walla! Microwave ovens. Even more mysterious are those laws of science, which are proven irrefutable, yet no one knows why or how. For example, scientists have discovered that the further the planets are from the sun, the greater the distance is between them! This is Bode's Law. No one knows why it works, but NASA has proven that it does! Perhaps what we know as science is not as hard and fast as we once believed. If this is all true, is it such a leap of imagination to wonder whether or not time travel is possible? One man claims to have time-traveled and to have discovered the mysteries/secrets behind this phenomenon! Patricia Rens has studied some of the adventures/findings of fellow Nebraskan, Steve Gibbs and what she has uncovered is truly remarkable! Learn the secrets our government wants to keep hidden and hear about the future from a man who has been there! How many people do YOU know who have returned from Heaven and from Hell? And there's much, much more!

**The Fortean Influence on Science Fiction** Tanner F. Boyle, 2020-11-30 Charles Fort was an American researcher from the early twentieth century who cataloged reports of unexplained phenomena he found in newspapers and science journals. A minor bestseller with a cult appeal, Fort's work was posthumously republished in the pulp science fiction magazine *Astounding Stories* in 1934. His idiosyncratic books fascinated, scared, and entertained readers, many of them authors and editors of science fiction. Fort's work prophesied the paranormal mainstays of SF literature to come: UFOs, poltergeists, strange disappearances, cryptids, ancient mysteries, unexplained natural phenomena, and everything in between. Science fiction authors latched on to Fort's topics and hypotheses as perfect fodder for SF stories. Writers like Arthur C. Clarke, Philip K. Dick, Robert Heinlein, H.P. Lovecraft, and others are examined in this exploration of Fortean science fiction--a genre that borrows from the reports and ideas of Fort and others who saw the possible science-fictional nature of our reality.

**Breaking the Time Barrier** Jenny Randles, 2005-04-05 IT WAS ONLY A MATTER OF TIME.... Once widely considered an impossibility--the stuff of science fiction novels--time travel may finally be achieved in the twenty-first century. In *Breaking*

the Time Barrier, bestselling author Jenny Randles reveals the nature of recent, breakthrough experiments that are turning this fantasy into reality. The race to build the first time machine is a fascinating saga that began about a century ago, when scientists such as Marconi and Edison and Einstein carried out research aimed at producing a working time machine. Today, physicists are conducting remarkable experiments that involve slowing the passage of information, freezing light, and breaking the speed of light--and thus the time barrier. In the 1960s we had the space race. Today, there is a time race involving an underground community of working scientists who are increasingly convinced that a time machine of some sort is finally possible. Here, Randles explores the often riveting motives of the people involved in this quest (including a host of sincere, if sometimes misguided amateurs), the consequences for society should time travel become a part of everyday life, and what evidence might indicate that it has already become reality. For, if time travel is going to happen--and some Russian scientists already claim to have achieved it in a lab--then its effects may already be apparent.

Beyond 2012: Catastrophe or Awakening? Geoff Stray, 2009-05-21 An illustrated, encyclopedic overview of the prophecies, calendars, and theories that indicate the year 2012 is a threshold of great change for humanity • Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 • Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar's Great Cycle will come to an end. Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed. What is certain, however, is that a rare galactic alignment will occur, one so unique that it is found at the core of many wisdom traditions from around the globe. Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982. Far from confining his research to the Maya, who provide the most prominent predictions indicating this date will herald significant changes for humanity, he has studied the prophetic traditions of other cultures--including the Tibetan, Chinese, Jewish, Ethiopian, and tribal cultures from around the globe--to show the kind of convergence of cosmic purposes happening along a number of parallel tracks.

This book offers an extensive study of many modern theories, including Terence McKenna's timewave zero and Maurice Cotterell's sunspot research as well as anomalous phenomena such as near death experiences and crop circles. Sifting through all the scientific research and speculation that the year 2012 has inspired, Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date.
