Child, Adolescent and Family Development Phillip T. Slee,2002-06-20 *Child, Adolescent and Family Development* is a comprehensive study of human development in the context of the family. Incorporating the latest Australian, British and American research it is an introduction to contemporary theory and issues in the study of child and adolescent development. Heavily illustrated and with a clear design, this sensitively written text is highly readable for students in several disciplines. Modelled on a highly successful first edition published in 1993, the text has been totally reconceptualised. A more thematic linking of materials in the text will allow both students and teachers to follow development either chronologically or thematically. Also, a life cycle approach to topics as they arise will be a very useful addition for many students. The text has an array of useful features, including definitions in the margins, a glossary, discussion questions and activities. Free online support is available, including multiple choice questions, a child observation manual, an easy student guide to research design and techniques, and worksheets. Please note the book no longer comes with a CD; all the CD content is now available via the Website.

Creating a New Horizon in Pedagogy through the Growth Mindset Anjali Sharma, Sukanya Singh, 2024-04-23 The belief that 'I can change my fate' goes beyond an inborn quality and leads to brain-bending. The brain changes itself and has its own means of healing from damage; this throws off the entity theory of belief. The brain is a muscle that gets stronger by activating neuronal circuits. Learning can turn on genes that alter the neural structure, a 'rewiring of neural circuits.' The growth mindset can change brain function and create cognitive reserves. Learning needs to be facilitated through a pedagogy that fosters a growth mindset, incorporating the belief that 'with practice and hard work, I can do better.' The pedagogy that creates a new horizon, including the structures mentioned, is the 'Growth Mindset Pedagogy.' The challenge of bringing this pedagogy into the classroom arises when dealing with disciplinary content. This book addresses the realities of the classroom through the following pedagogical framework: 'How to Develop a Growth Mindset-Oriented Classroom Culture.' It provides both the tools and the roadmap required to do so.

The SAGE Encyclopedia of Intellectual and Developmental Disorders Ellen Braaten, 2018-01-29 According to the CDC about one in six, or about 15%, of children aged 3 through 17 years have one or more developmental disabilities, such as ADHD, autism spectrum disorders, cerebral palsy, intellectual disability, and learning disability. Intellectual disorders are characterized by significant limitations in both intellectual functioning and in adaptive behavior, which covers many everyday social and practical skills, impacting learning, reasoning, problem solving, and other cognitive processes. These disabilities originate before the age of 18 and continue across the life span. Developmental disorders are chronic disabilities that can be cognitive or physical or both. The disabilities appear before the age of 22 and are likely to progress across the lifespan. Some developmental disorders are largely physical issues, such as cerebral palsy or epilepsy. Some individuals may have a disorder that includes a physical and intellectual disability; for example, Down syndrome or fetal alcohol syndrome. Intellectual and developmental disorders are significant and growing issues that are studied across a number of disciplines. The SAGE Encyclopedia of Intellectual and Developmental Disorders is aimed at students interested in psychology, counseling, education, social work, psychiatry, health sciences, and more. This encyclopedia will provide an in-depth look at a wide range of disorders, alongside interventions, the latest research translated for an undergraduate audience, historical context, and assessment tools for higher-level students. We will take a truly interdisciplinary approach by also covering sociocultural viewpoints, policy implications, educational applications, ethical issues, and more.

Bringing Antiracism into Focus Alicia Herrera, Kevin Ferreira van Leer, Samantha Blackburn, 2025-06-19 This guide introduces applied antiracist developmental science and developmental frameworks that have been comprehensively integrated with antiracist principles. It underscores the importance of viewing child and adolescent development-related work through an antiracist lens from the outset, examining how systemic racism, implicit bias, and critical consciousness shape human development, and emphasizes the need to cultivate an antiracist developmental perspective to promote equity in professional settings. Anchored in the foundational bioecological model, this book extends to additional frameworks such as the Racism + Resilience + Resistance Integrative Study of Childhood Ecosystem (R3ISE), the Integrative Model of Ethnic Minority Development, the Multicontextual Model for Diverse Learning Environments, and the Phenomenological Variant of Ecological Systems Theory (PVEST). These frameworks are adapted to confront racism and support antiracist practices. Targeted discussions in dedicated chapters cover fields including psychology, PK-12 education, higher education, and allied health. This book bridges theory and practice through case studies, practical examples, and reflective activities, demonstrating how to incorporate antiracist strategies into daily professional practice. It also delves into how community assets can be protective and mitigate the effects of racism, guiding professionals to recognize and leverage these strengths effectively. This resource is designed for students, pre-professionals, and early-career professionals in child and adolescent development committed to incorporating antiracist practices into their work. It serves as both an introductory overview and a practical manual for applying developmental principles with an emphasis on reflection and praxis.
