Judith Green, Allan Luke

International Handbook of Children, Media and Culture Sonia Livingstone, Kirsten Drotner, 2008-03-06 Deliberately selected to represent as many parts of the globe as possible, and with a commitment to recognizing both the similarities and differences in children and young people's lives - from China to Denmark, from Canada to India, from Japan to Iceland, from - the authors offer a rich contextualization of children's engagement with their particular media and communication environment, while also pursuing cross-cutting themes in terms of comparative and global trends.

Serious Games Ute Ritterfeld, Michael Cody, Peter Vorderer, 2009-09-10 Serious Games provides a thorough exploration of the claim that playing games can provide learning that is deep, sustained and transferable to the real world. Serious games is defined herein as any form of interactive computer-based game software for one or multiple players to be used on any platform and that has been developed to provide more than entertainment to players. With this volume, the editors address the gap in existing scholarship on gaming, providing an academic overview on the mechanisms and effects of serious games. Contributors investigate the psychological mechanisms that take place not only during gaming, but also in game selection, persistent play, and gaming impact. The work in this collection focuses on the desirable outcomes of digital game play. The editors distinguish between three possible effects -- learning, development, and change -- covering a broad range of serious games' potential impact. Contributions from internationally recognized scholars focus on five objectives: Define the area of serious games Elaborate on the underlying theories that explain suggested psychological mechanisms elicited through serious game play, addressing cognitive, affective and social processes Summarize the empirical evidence on the effectiveness of serious games, Introduce innovative research methods as a response to methodological challenges imposed through interactive media Discuss the possibilities and limitations of selected applications for educational purposes. Anchored primarily in social science research, the reader will be introduced to approaches that focus on the gaming process and the users' experiences. Additional perspectives will be provided in the concluding chapters, written from non-social science approaches by experts in academic game design and representatives of the gaming industry. The editors acknowledge the necessity for a broader interdisciplinary study of the phenomena and work to overcome the methodological divide in games research to look ahead to a more integrated and interdisciplinary study of digital games. This timely and singular volume will appeal to scholars, researchers, and graduate students working in media entertainment and game

studies in the areas of education, media, communication, and psychology.

Yu-Gi-Oh!, Vol. 1 Kazuki Takahashi, 2013-07-02 Sitting by himself in the back of the class, 10th-grader Yugi always had his head in some game--until he solved the Millennium Puzzle, an Egyptian artifact containing a powerful spirit from the age of the pharaohs! Awakened after three thousand years, the King of Games possesses Yugi, recklessly challenging bullies and evildoers to the Shadow Games, where the stakes are high, and even the most ordinary bet may result in weirdness and danger beyond belief! Let the games...begin! -- VIZ Media

Now, with 10-sided dice in hand, Yugi and Dark Yugi must hack and slash their way through Bakura's adventure and defeat the Dark Master Zorc...or die trying! -- VIZ Media

The Material Child David Buckingham, 2013-04-26 Children today are growing up in an increasingly commercialised world. But should we see them as victims of manipulative marketing, or as competent participants in consumer culture? The Material Child provides a comprehensive critical overview of debates about children's changing engagement with the commercial market. It moves from broad overviews of the theory and history of children's consumption to insightful case studies of key areas such as obesity, sexualisation, children's broadcasting and education. In the process, it challenges much of the received wisdom about the effects of advertising and marketing, arguing for a more balanced account that locates children's consumption within a broader analysis of social relationships, for example within the family and the peer group. While refuting the popular view of children as incompetent and vulnerable consumers that is adopted by many campaigners, it also rejects the easy celebration of consumption as an expression of children's power and autonomy. Written by one of the leading international scholars in the field, The Material Child will be of interest to students, researchers and policy-makers,

as well as parents, teachers and others who work directly with children.

Rethinking Learning: What Counts as Learning and What Learning Counts Judith Green, Allan Luke, 2006-03-15 The rapid transformations of social, economic, and cultural worlds of learners in school and nonschool settings that we are facing today are reminiscent of the transformations that accompanied the industrial revolution at the turn of the 20th century. Like those at the turn of the 20th century, education researchers and their constituencies (e.g., students, teachers, community members, and policy makers) are faced with a series of questions: How are we to respond to the educational challenges of this new millennium? How do we engage with new forms of learning, the influence of new media on children's lives, changing community dynamics, and many long-standing and tenacious educational and social problems? And how can research and theory constructively and critically engage with the demands and imperatives of government educational and social policies? In this book, the editors bring together an intergenerational group of researchers who represent both new and long-standing perspectives and debates on the shapes, definitions, and processes of learning in the context of global cultural and economic change.
