Artificial Intelligence: Anthropogenic Nature vs. Social Origin Elena G. Popkova,Bruno S. Sergi,2020-02-22 This book presents advanced research studies on the topic of artificial intelligence as a component of social and economic relations and processes. It gathers research papers from the International Research-to-Practice Conference "The 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects" (May 23–24, 2019, Nizhny Novgorod, Russia) and the International Research-to-Practice Conference "Economics of Pleasure: a Science of Enjoying Economic Activities" (October 3–5, 2019, Prague, Czech Republic). Both conferences were organized by the Autonomous Non-Profit Organization "Institute of Scientific Communications" (Volgograd). What sets this book apart from other publications on the topic of artificial intelligence is that it approaches AI not as a technological tool, but as an economic entity. Bringing together papers by representatives of various fields of social and human knowledge, it systematically reflects on various economic, social, and legal aspects of the creation, application, and development of artificial intelligence. Given the multidisciplinary nature of its content, the book will appeal to a broad target audience, including those engaged in developing AI (scientific research institutes and universities), and Industry 4.0 enterprises interested in its implementation, as well as state regulators for the digital economy.

Towards Cognitive Cities Edy Portmann,Matthias Finger,2016-06-09 This book introduces the readers to the new concept of cognitive cities. It demonstrates why cities need to become cognitive and why therefore a concept of cognitive city is needed. It highlights the main building blocks of cognitive cities and illustrates the concept by various cases. Following a concise introductory chapter the book features nine chapters illustrating various aspects and dimensions of cognitive cities. The logic of its structure proceeds from more general considerations to more specific illustrations. All chapters offer a comprehensive view of the different research endeavours about cognitive cities and will help pave the way for this new and innovative approach to governing cities in the future.

The Introduction of Information and Communication Technology (ICT) in Organizations J. H. Erik Andriessen,1996 Information and communication technology ICT in organizations has many faces, such as office automation, production automation, telecommunication and electronic networks connecting organizations. The C in ICT refers to the fact that, besides information processing technologies, a rapid growth can be found in computer-assisted communication technologies and computer-supported co-operative work. Organizations change as a result of socio-economic and technological developments. New organizational forms and work arrangements are emerging, and ICT is adapted and designed to solve problems caused by these changes. The impact of the introduction of ICT becomes apparent in changes in work patterns, qualifications and decision-making procedures. In this special issue, the implementation processes and some of the consequences are discussed, mostly on the basis of empirical studies.; Contributions include: a discussion of recent developments of ICT and organizational change in the banking sector; an analysis of the introduction of technological

innovation in the ambulance service in several big cities; and an illustration of the different options in introduction strategies, including methods used to facilitate user participation in systems development. In some cases, so-called business re-engineering processes form the framework for the analysis.
