Tribal Communities in the Malay World Geoffrey Benjamin, 2003-08-01 The Malay World (Alam Melayu), spanning the Malay Peninsula, much of Sumatra, and parts of Borneo, has long contained within it a variety of populations. Most of the Malays have been organized into the different kingdoms (kerajaan Melayu) from which they have derived their identity. But the territories of those kingdoms have also included tribal peoples - both Malay and non-Malay - who have held themselves apart from those kingdoms in varying degrees. In the last three decades, research on these tribal societies has aroused increasing interest. This book explores the ways in which the character of these societies relates to the Malay kingdoms that have held power in the region for many centuries past, as well as to the modern nation-states of the region. It brings together researchers committed to comparative analysis of the tribal groups living on either side of the Malacca Straits - in Indonesia, Malaysia, Thailand, and Singapore. New theoretical and descriptive approaches are presented for the study of the social and cultural continuities and discontinuities manifested by tribal life in the region.

Policies and Politics in Malaysian Education Cynthia Joseph, 2017-11-22 This book draws on elements of critical social theory, research on globalization, neo liberalism and education, and Malaysian Studies to understand the interplay of globalization, nationalism, cultural politics and ethnicized neoliberalism in shaping the educational reforms in Malaysia. Using the Malaysia Education Blueprint 2013-2025 (MEB) as a case study, a catalyst and a context, this collection critically explores some of the complex historical and contemporary push-pull politics and factors shaping Malaysia's education system, its reform and the experience of Malaysians - and others - within it. The authors in this volume focus on the interplay of neoliberalism, nationalism, ethnic and cultural politics in shaping the educational reforms in Malaysia. Their work captures and seeks to understand the enduring, though changing, hierarchy of access and differentiated rights to educational, social and economic resources and opportunities experienced by different individuals and collectives, including those involved in the neoliberal enterprise of international education. It looks at how inequities have been re-configured in different educational spaces in Malaysia, and at how these inequities have been addressed through reform policies and practices. The book will be a shaper and critical contributor to the assessment of the Malaysian Education Blueprint and related policies. It will also have wider relevance globally as a critical approach to policy discussion.

Malaysia and the "original People" Robert Knox Dentan, 1997 Sharply focused on key issues affecting indigenous and

ethnic groups worldwide, this book is part of a series of ethnographies, authored by leading figures in the field of anthropology and builds on introductory material by going further in-depth and allowing readers to explore, virtually first hand, a particular issue and its impact on a culture. Concentrates on a well-researched, specific issue and its impact on a particular culture. Provides in-depth information on a particular culture, expanding the reader's grasp of the experiences and problems encountered by different cultures.

Malaysia's Original People Kirk Endicott, 2015-11-27 The Malay-language term for the indigenous minority peoples of Peninsular Malaysia, "Orang Asli", covers at least 19 culturally and linguistically distinct subgroups. This volume is a comprehensive survey of current understandings of Malaysia's Orang Asli communities (including contributions from scholars within the Orang Asli community), looking at language, archaeology, history, religion and issues of education, health and social change, as well as questions of land rights and control of resources. Until about 1960 most Orang Asli lived in small camps and villages in the coastal and interior forests, or in isolated rural areas, and made their living by various combinations of hunting, gathering, fishing, agriculture, and trading forest products. By the end of the century, logging, economic development projects such as oil palm plantations, and resettlement programmes have displaced many Orang Asli communities and disrupted long-established social and cultural practices. The chapters in the present volume show Orang Asli responses to the challenges posed by a rapidly changing world. The authors also highlight the importance of Orang Asli studies for the anthropological understanding of small-scale indigenous societies in general.

Civilizing the Margins Christopher R. Duncan, 2008 Discusses the programs, policies, and laws that affect ethnic minorities in eight countries: Burma, Cambodia, Indonesia, Laos, Malaysia, the Philippines, Thailand, and Viet Nam. Once targeted for intervention, people such as the Orang Asli of Malaysia and the hill tribes of Thailand often become the subject of programs aimed at radically changing their lifestyles, which the government views as backward or primitive. Several chapters highlight the tragic consequences of forced resettlement, a common result of these programs.

Routledge Handbook of Contemporary Malaysia Meredith Weiss, 2014-10-17 The Routledge Handbook of Contemporary Malaysia offers a broad, analytical survey of Malaysia. It provides a comprehensive survey of significant topics in Malaysian politics, economy, and society today, focussing on issues, institutions, and trends. It is divided into four thematic sections, which are all introduced by the editor: • Domestic politics • Economics • Social policy and social development • International relations and security. The volume brings together an international team of experts: an interdisciplinary mix of forty contributors from Malaysia and elsewhere, including many of the leading specialists on Malaysian affairs. The chapters included in the volume form an accessible and fascinating window onto contemporary Malaysia. They each introduce a different aspect of the Malaysian polity, economy, or society, offering both historical perspective and a current assessment or investigation. Designed for general readers and specialists alike, chapters may be read individually -- each stands on its own -

- or conjointly. Up-to-date, interdisciplinary, and academically rigorous, the Handbook will be of interest to students, academics, policymakers, and others in search of reliable information on Malaysian politics, economics, and society.

Historical Dictionary of Malaysia Ooi Keat Gin, 2017-12-18 Malaysia is one of the most intriguing countries in Asia in many respects. It consists of several distinct areas, not only geographically but ethnically as well; along with Malays and related groups, the country has a very large Indian and Chinese population. The spoken languages obviously vary at home, although Bahasa Malaysia is the official language and nearly everyone speaks English. There is also a mixture of religions, with Islam predominating among the Malays and others, Hinduism and Sikhism among the Indians, mainly Daoism and Confucianism among the Chinese, but also some Christians as well as older indigenous beliefs in certain places. This second edition of *Historical Dictionary of Malaysia* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Malaysia.

Encyclopedia of the Peoples of Asia and Oceania Barbara A. West, 2009 *Encyclopedia of the Peoples of Asia and Oceania* is a new two-volume A-to-Z reference to the peoples of the Asia-Pacific region east of the Caspian Sea, not including the countries of the Middle East. More than 400 entries cover the major peoples that for a time maintained a cultural identity in the area - from ancient to modern times - describing their history, migration, culture, belief system, social organization, and relationship to other peoples. This accessible resource makes it easy for students to find not only entries on the Han and Jurchens but also on 'Chinese: nationality', describing who they are today with cross-references to the various ancestral peoples. Entries on all large or well-known groups include information on their geography, origins, languages, history, and culture. Subsections cover such topics as subsistence, religion, social and political structures, economy, government, military practices, dwellings and architecture, clothing, transportation, technology, art, music, and literature. The back matter includes a chronology, bibliography, and comprehensive index, as well as several appendixes with useful background information on topics such as kinship systems, religious systems, and subsistence systems.
