*Circulation of Thought* - 1954 Eugen Rosenstock-Huessy, 1997-08

The State of the Masses Richard F. Hamilton, James D. Wright, 1986-01-01 Is the consciousness of Americans in the midst of dramatic transformation? Or do people think and feel much the same as they have always thought and felt? Do most people enjoy their work, or hate it? Is the American family being replaced by new institutional forms, or is it much the same as it was in the 1950's? Have material values been replaced by a postmaterial consciousness in a postindustrial society? Are Americans becoming more conservative, less conservative, or staying about the same? *State of the Masses* asks the important questions. Originally published in 1986, this prescient study evaluate the views of social critics, neo-conservatives, neo-Marxists, post-industrialists, and the theorists of the little man, who puport to describe the nature, social conditions, outlooks, and motivations of the American populace. The claims of one group are often diametrically opposed to those of another. The authors make the case for which claims can be considered true and which false. Hamilton and Wright analyze the contradictory claims and compares their implications with the best social science research and data available at that time. They also explore the implications for theories in light of the conflicting portrait the evidence provides. The authors conclude with a new perspective for understanding continuities and changes in the United States. This is a prescient view of American society during turmoil, and a model for how social science research can be used predictively. The manuscript is wonderfully devastating.--G. William Domhoff, University of California, Santa Cruz I think this is a masterful and timely piece of work a the book's message is so powerful, so wide sweeping that it cannot be ignored.--William Form, The Ohio State University Richard F. Hamilton is emeritus professor of sociology and political science at The Ohio State University. He has written eleven books and seventy articles, mostly dealing with elite and mass politics and their interconnections, including *President McKinley*, *War and Empire* (two volume work) published by Transaction. James D. Wright is a professor in the department of sociology at the University of Central Florida. He has published seventeen books including *Armed and Considered Dangerous* and *Under the Gun* as well as many journal articles. His current research interests include violence, urban poverty and inequality, health and the homeless population, and the divorce reform movement.

**Population Policies in the People's Republic of China** Xueyuan Tian,2025-10-27 From an insider's perspective, this book elaborates on the three stages of population policies since the founding of the People's Republic of China (PRC). As a key policy discussant and drafter, the author incorporates some valuable documentaries and manuscripts that have not been

revealed in the extant literature and brings in new theoretical angles for interpretations of population policies in the PRC. This book begins with a brief review of population policies in ancient China and then focuses on the population debates and growing concerns for population growth in the first thirty years of the PRC. This is followed by telling the whole story of the PRC's one-child policy, including theoretical discussions, the policy's situated social context, policy details, and strategies. Lastly, this book discusses the population changes and trends in the twenty-first century and provides advice on China's population development strategies in the future. Throughout the book, the author draws on his own experience in population policy-making to provide new insights in his review of China's one-child policy and facilitates a delineation of population changes among social developments, population debates, and government policy changes. This book is intended for readers who are interested in population policies of the PRC. It is particularly useful for students and researchers specializing in China's population studies and serves as a trustworthy source for those wanting a holistic picture of the PRC's population policies.
