Information Technology and Educational Management in the Knowledge Society Arthur Tatnall,Javier Osorio,Adrie Visscher,2006-03-02 Information Technology and Educational Management in the Knowledge Society is an essential reference for both academic and professional researchers in the field of information technology and educational management. Since the mid-1980's, computer assisted educational information systems have been developing in various parts of the world and the knowledge surrounding the development and implementation of these systems has been growing. The papers presented in this volume are the result of an international call for papers addressing the challenges faced by the information technology and education management (ITEM) field in a society where knowledge management is becoming a major issue both in educational and business systems. This state-of-the-art volume presents the proceedings of the 6th International Working Conference on Information Technology in Educational Management, held July 2004 in Spain. The collection will be important not only for information technology and education management experts and researchers, but also for all teachers and administrators interested in this growing field.

Global perspectives on higher education and lifelong learners Maria Slowey,Hans Schuetze,2012-06-14 The global expansion of participation rates in higher education continue more or less unabated. However, while the concept of lifelong learning has figured prominently in national and international educational policy discourse for more than three decades, its implications for the field of higher education has remained relatively underdeveloped. This book focuses on a particular dimension of the lifelong learning: higher education for those who have not progressed directly from school to higher education. Some will embark on undergraduate programmes as mature students, part-time and/or distance students; others wish to return to higher education after having completed (or not completed) a previous academic programme, while increasing numbers participate in postgraduate and continuing studies for a complex mix of professional and personal

reasons. Adopting a comparative and international longitudinal perspective which goes beyond a snapshot view by building on the cases of a core group of ten OECD countries, this timely book investigates the ways in which important new developments impacting on higher education crystallise around the lifelong learning agenda: new technology and open source resources; the changing role of the state and market in higher education; the blurring of public and private boundaries; issues of equity and access in a time of global economic turmoil; the increased emphasis on research and international league tables; the changing nature of the education; and, the complex interaction of international, national and regional expectations which governments and other stakeholders have of universities and other public and private institutions of higher education. While focusing on the situation in Canada, USA, Japan, Australia, New Zealand and a wide variety of European countries, the book also assesses the issues from the perspective of developing countries. Launched by the Irish Minister of Education, this timely book is a must read. Find out more here:

The Routledge Handbook of Global Sustainability Education and Thinking for the 21st Century Michele John, 2025-02-20 This Handbook emerges as a pivotal resource in underscoring the important role of sustainability education in catalysing a global shift toward sustainable development. It articulates the need for a profound transformation within institutional leadership and educational frameworks to support the critical global sustainability transition. This Handbook explores

sustainability thinking as a critical paradigm shift in confronting the multifaceted challenges of sustainable development. It presents an urgent case for a systemic overhaul in our approach to education in the 21st century, advocating for multidisciplinary education and holistic systems thinking in order to more successfully navigate the complexities of sustainable development. The text discusses the foundational elements of modern sustainability thought and management, including the significance of values, ethics, governance, and the pressing issues of environmental degradation and climate change. It offers an extensive trans-disciplinary overview of sustainability discourse, spanning a broad array of perspectives on sustainability management and education. It provides a comprehensive introduction to the language of sustainability and a detailed examination of sustainability issues, highlighting their implications for education, training, and management development. It addresses urgent global issues such as decarbonisation, resource scarcity, population dynamics, pollution, and land degradation, emphasising the crucial role of educational initiatives in helping to mitigate these challenges. This seminal work has been developed for a diverse audience, including academics, policymakers, students, and educators, serving as a valuable tool for those wanting to comprehend complex global sustainability challenges and the paramount importance of education in supporting global sustainability in the 21st century.

Challenging Boundaries Neil Garrod, Bruce Macfarlane, 2009-01-13 This edited volume will be an important and key resource for managers, researchers, and policy makers in the field of Higher Education and Further Education. It offers insights into a radical new way of organizing post-compulsory education on an international basis that directly promotes a social justice agenda (i.e., widening of student participation). Around the world post-compulsory education is divided between Universities and Community-based Colleges. Universities are typically concerned with higher education, while community based colleges focus on further and technical education. In response to a range of social and economic forces there has been a growth in the number of dual sector institutions (or duals) that span this divide. Challenging Boundaries brings together leading international thinkers, policy analysts, academic managers, and researchers who question whether duals can provide relevant education to students and appropriate graduates for the economy, while also offering greater opportunities to disadvantaged students. Challenging Boundaries provides an analysis of the potential of dual sector institutions in North America, UK, South Africa, and Australasia. This volume draws on the very latest research findings and effectively looks to: Challenge conventional thinking about post-compulsory education Demonstrate how a number of institutions internationally are addressing the organizational, managerial, and cultural challenges of operating as dual sector universities Combine the latest research in the field from a range of international scholars with operational insights from university leaders Provide a key resource for education policy makers and researchers and students of educational policy and management at masters and doctoral level
