The Oxford Handbook of Algorithmic Music Alex McLean, Roger T. Dean, 2018-01-18 With the ongoing development of algorithmic composition programs and communities of practice expanding, algorithmic music faces a turning point. Joining dozens of emerging and established scholars alongside leading practitioners in the field, chapters in this Handbook both describe the state of algorithmic composition and also set the agenda for critical research on and analysis of algorithmic music. Organized into four sections, chapters explore the music's history, utility, community, politics, and potential for mass consumption. Contributors address such issues as the role of algorithms as co-performers, live coding practices, and discussions of the algorithmic culture as it currently exists and what it can potentially contribute society, education, and ecommerce. Chapters engage particularly with post-human perspectives - what new musics are now being found through algorithmic means which humans could not otherwise have made - and, in reciprocation, how algorithmic music is being assimilated back into human culture and what meanings it subsequently takes. Blending technical, artistic, cultural, and scientific viewpoints, this Handbook positions algorithmic music making as an essentially human activity.

Music: A Social Experience Steven Cornelius, Mary Natvig, 2022-01-31 By taking a thematic approach to the study of music appreciation, *Music: A Social Experience*, Third Edition demonstrates how music reflects and deepens both individual and cultural understandings. Musical examples are presented within universally experienced social frameworks (ethnicity, gender, spirituality, love, and more) to help students understand how music reflects and advances human experience. A companion website features streaming audio and instructors' resources. The third edition includes: A

chapter on Black American music A revised and developed chapter on gender and sexuality A dozen additional Listening Guides, with an emphasis on contemporary popular music Over 100 new full-color images Updated teacher and student resources on the book's companion website Expanded content throughout, highlighting the social, cultural, and technological changes since publication of the previous edition The culmination of thirty years of experimentation in the music appreciation classroom, this third edition of *Music: A Social Experience* continues to empower lifelong musical learning by engaging students and readers on their own terms.

Music Steven Cornelius, Mary Natvig, 2016-06-03 *Music: A Social Experience* offers a topical approach for a music appreciation course. Through a series of subjects—from Music and Worship to Music and War and Music and Gender—the authors present active listening experiences for students to experience music's social and cultural impact. The book offers an introduction to the standard concert repertoire, but also gives equal treatment to world music, rock and popular music, and jazz, to give students a thorough introduction to today's rich musical world. Through lively narratives and innovative activities, the student is given the tools to form a personal appreciation and understanding of the power of music. The book is paired with an audio compilation featuring listening guides with streaming audio, short texts on special topics, and sample recordings and notation to illustrate basic concepts in music. There is not a CD-set, but the companion website with streaming audio is provided at no additional charge.
