Quand l'Algérie Tremble ,

Proceedings of the 3rd International Gas Processing Symposium ,2012-12-13 Natural gas continues to be the fuel of choice for power generation and feedstock for a range of petrochemical industries. This trend is driven by environmental, economic and supply considerations with a balance clearly tilting in favor of natural gas as both fuel and feedstock. Despite the recent global economic uncertainty, the oil and gas industry is expected to continue its growth globally, especially in emerging economies. The expansion in LNG capacity beyond 2011 and 2012 coupled with recently launched and on-stream GTL plants poses real technological and environmental challenges. These important developments coupled with a global concern on green house gas emissions provide a fresh impetus to engage in new and more focused research activities aimed at mitigating or resolving the challenges facing the industry. Academic researchers and plant engineers in the gas processing industry will benefit from the state of the art papers published in this collection that cover natural gas utilization, sustainability and excellence in gas processing. - Provides state-of-the-art contributions in the area of gas processing - Covers solutions to technical and environmental problems - Input from academia and industry

Traumatisme psychologique et suicide en Algérie Chérifa Sider,2018-11-23 L'auteure s'appuie sur l'enquête Santé Mentale en Population Générale (SMPG-2003) pour étudier la relation entre le trouble de stress post-traumatique et le risque suicidaire en Algérie. La réalité algérienne contemporaine est marquée par des violences protéiformes. De la guerre civile aux catastrophes naturelles, en passant par un malaise social, le citoyen algérien a vécu des événements « hors du commun », notamment lors de la décennie noire avec les séquelles du terrorisme islamiste radical. Une violence extrême qui s'intensifie par la négation du droit de la victime à la reconnaissance et à la réparation matérielle et/ou morale.

Historical Seismology Julien Fréchet, Mustapha Meghraoui, Massimiliano Stucchi, 2008-08-22 Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state of the art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms. A critical re-evaluation of historical accounts and early seismograms provides us with the basis for a realistic seismic hazard assessment. This book is dedicated to the memory of Jean Vogt (1929 - 2005). Audience: This book is of value to seismologists, earthquake geologists, engineering seismologists, earth scientists and historians of catastrophes.

Diversité littéraire en Algérie Najib Redouane, 2009 La particularité de la littérature contemporaine algérienne, née dans des circonstances dures, en rapport avec le destin tragique de l'Algérie des années quatre-vingt-dix, est son extrême diversité. Ce collectif, qui comporte des études inédites et pointues de plusieurs critiques et chercheurs d'horizons et de pays différents, traite des écrits diversifiés de cette génération d'écrivains algériens, en prenant en compte la valeur esthétique, l'originalité et la singularité de leurs oeuvres. Oeuvres qui constituent une véritable rupture avec les modèles précédents.
