Henschel, Joh R.

The Aging Gap Between Species Anca Ioviță, 2016-12-18 Aging is a puzzle to solve. This process is traditionally studied in a couple of biological models like fruit flies, worms and mice. What all these species have in common is their fast aging. This is excellent for lab budgets. It is a great short-term strategy. Who has time to study species that live for decades? But lifespan differences among species are magnitudes of order larger than any lifespan variation achieved in the lab. This is the reason for which I studied countless information resources in an attempt to gather highly specialized research into one easy-to-follow book. I wanted to see the forest among the trees. I wanted to expose the aging gap between species in an easy-to-follow and logical sequence. This book is my attempt at doing just that. What are the mechanisms underlying the aging gap between species? I intentionally chose to write the answer to this question in plain English. Aging research is too important to hide it behind the closed doors of formal scientific jargon. This book could not have existed if green tea, libraries and the Internet were not invented. The amount of data I had to browse in order to keep the essential patterns is huge. Yet this book is not exhaustive. This is not a dry academic textbook. I tried to instill life in a topic that is hugely important for the extension of human lifespan. Only you can decide if I achieved this. ***** TABLE OF CONTENTS ***** Finding the Forest Among the Trees Being Reliable Counts The Mathematics of Aging The Speed of Senescence Case Study: Aging in Fish How to Estimate Chronological Age Taking Life Slowly On Temperature and Aging Dormancy The Housekeeping Problem Case Study: Aging in Turtles Intracellular Junk Case Study: Aging in Crustaceans Extracellular Junk Case Study: Protein Quality Control The Sweet Poison Are Cell Membranes the Pacemakers of Metabolism? How Far the Light Reaches Sabrina Imbler, 2022-12-06 A fascinating tour of creatures from the surface to the deepest ocean floor: this miraculous, transcendental book invites us to envision wilder, grander, and more abundant possibilities for the way we live (Ed Yong, author of *An Immense World*). A queer, mixed race writer working in a largely white, male field, science and conservation journalist Sabrina Imbler has always been drawn to the mystery of life in the sea, and particularly to creatures living in hostile or remote environments. Each essay in their debut collection profiles one such creature, including: ·the mother octopus who starves herself while watching over her eggs, ·the Chinese sturgeon whose migration route has been decimated by pollution and dams, ·the bizarre, predatory Bobbitt worm (named after Lorena), ·the common goldfish that flourishes in the wild, ·and more. Imbler discovers that some of the most radical models of family, community, and care can be found in the sea, from gelatinous chains that are both individual organisms and colonies of clones to deep-sea crabs that have no need for the sun, nourished instead by the chemicals and heat throbbing from the core of the Earth. Exploring themes of adaptation, survival, sexuality, and care, and weaving the wonders of marine biology with stories of their own family, relationships, and coming of age, *How Far the Light Reaches* is a shimmering, otherworldly debut that attunes us to new visions of our world and its miracles. Toktok Talkie Henschel, Joh R., 2015-12-01 With his penchant for nature, science, writing and photography, the desert ecologist, Dr Joh R Henschel, could not help but document the conversations about the natural world with his friend Zophosis Moralesi, a Toktokkie as beetly as can be. The Toktok Talkie articles were first published as weekly newspaper columns between 2011 and 2013, and these are now collated in this book. In it, Joh reveals some of his musings about nature and his observations of peoples' relationships to it. He deftly interweaves the human defiance of nature, symbolised by the Ancient Mariner, with nature's many values and ultimate power of having the last word, presented by a humble messenger, the Toktokkie beetle, Zophosis moralesi. His first experience of the Namib in 1977 became love at first sight. Since then he has been conducting research in the Namib and several deserts world-wide, reported in numerous scientific papers and technical

documents. After spending over three decades in Namibia, Joh and his wife, Theresa, moved to Kimberley in South Africa in 2013, where he joined the National Research Foundation to continue arid land research through the South African Environmental Observation Network (SAEON).

Weird-o-pedia Alex Palmer,2012-05-11 Check out the weird and wonderful facts in this massive encyclopedia of alphabetized oddities: HUMANS ARE THE ONLY ANIMALS THAT ENJOY SPICY FOOD (there's a reason no one sells Tabasco-flavored cat food). NAPPING CAN SAVE YOU FROM A HEART ATTACK (assuming you are not operating heavy machinery at the time). PSYCHOLOGISTS CAN ASSESS YOUR PERSONALITY FROM HOW YOU DIP FRIES IN KETCHUP (nice fries, sociopath). SURFING THE INTERNET ACTUALLY MAKES YOU SMARTER (but not as smart as reading this book will). Now the next time someone tells you smugly that Pluto isn't a planet, you can counter with any one of these hundreds of weird facts and remain king or queen of the cocktail (or kegger) chatter.

Review of Jellyfish Blooms in the Mediterranean and Black Sea Ferdinando Boero,2013 It is clear that a new type of human approach to marine ecosystems is needed to confront phenomena such as jellyfish blooms. This document provides an updated overview of this phenomenon in the Mediterranean and Black Sea and illustrates how the problem is affecting societies. It reviews current knowledge on gelatinous plankton in the affected region, providing a framework for its inclusion into fisheries science and the management of human activities such as tourism and coastal development. Fact sheets on the most important gelatinous plankters of the Mediterranean and Black Seas are included as an appendix.
