

Case Study On Child Labour

Maria Cristina Salazar

Child Labor in the Developing World Alberto Posso, 2020-07-20 This book provides new evidence of the theoretical and empirical causes and consequences of child labor. In so doing, the chapters provide a unique set of policy prescriptions that are applicable to both the developing countries that make up the case studies of the volume, as well as other countries more broadly. The volume is constructed to inform policy with rigorous analysis. However, unlike most academic studies, the language and flavour of the volume is largely non-technical, while the policy recommendations are practical. The volume is made up of three sections. The first section builds on the existing literature and provides new theoretical insights into child labor. Section 2 provides empirical evidence from both quantitative and qualitative case studies on child labor from across Asia, Africa and Latin America. This section provides information from studies conducted in Brazil, Cameroon, the Dominican Republic, India and Vietnam. Section 3 provides policy recommendations.

Child Labour and the Law C. K. Shukla, S. Ali, 2006 Considering The Problem In Its Totality, An Effort Has Been Made To Cover The Diverse Aspects Of The Subject. All The Articles Are Judiciously Selected From Authoritative Sources. This Joint Venture Has Been Taken As An Academic Exercise To Provide An Overall View An Issues And Problems Related To Child Labour At Macro, Meso And Micro Level, Including The Valuable Contributions From Social Scientists, Planners And Administrators To Present A More Comprehensive View On The Subject. Students, Teachers, Researchers, Administrators, Policy Planners And Professionals From Different Streams Of Disciplines Would Find This Book Informative And Useful.

Child Labour Anaclaudia Gastal Fassa, David L. Parker, Thomas J. Scanlon, 2010-07 Child labour constitutes a major public health concern, with estimates that world-wide 110 million children aged 5-14 years are engaged in labour that can be described as hazardous or intolerable. This book examines both the rights oriented and public health perspectives on child labour. A rights approach ensures that exploitative and abusive work is considered not just in terms of a labour market or health rights approach, but also in terms of human dignity and the solutions that preserve the rights of children and communities. The public health approach is steeped in the relationship between individuals and their community, seeking to identify how the presence (or absence) of government programmes and policies affects those involved. The economics perspective is also presented early in the book, to aid understanding of the causes and consequences of child labour, before

the alternate public health and sociological views are presented. The editors examine factors such as poverty, malnutrition, social disadvantage, gender, globalisation, and education, and look at both physical and psychological threats. This book will be of use to academics and students involved in health, health policy, social sciences and development disciplines. Those actively involved in public health initiatives, such as policy makers, and non-governmental organisations, will also find this an invaluable resource.

Child Work and Education Maria Cristina Salazar, Walter Alarcon Glasinovich, 2018-12-07 Published in 1998. In recent years research, as well as the results of practical programmes, has led to a clearer understanding of the relationship between child work and education. It is increasingly evident that child work is not entirely the result of economic need or exploitation. Frequently is the failure of educational system to offer adequate, stimulating and affordable schooling that encourages children to drop out in favour of work that appears to offer advantages more relevant to their everyday lives. Parents too may undervalue the role and purpose of a school that provides inadequate preparation for the future and often see a job, including home-based work, as a positive alternative to crime, delinquency or begging. Consequently, while a distinction needs to be made between 'formative child work' and 'harmful child work', in certain situations and cultures the phenomenon is not always seen as negative. Yet, although gratifying in the short term and sometimes even providing the means for a younger child to attend school as well as a way of learning discipline and responsibility, often these jobs provide no useful experience and do not lead to an improvement in the personal development of life chances of a child. The situation is therefore complex and requires a more realistic evolution of the relationship between archaic pedagogy, dropout rates and child work. These five case studies from Latin America all reveal the effects of inappropriate school curricular. Desertion of the educational system for the labour market leads to inadequate training and perpetuates the poverty trap. As part of the commitment to combating work which is detrimental to the child, major educational reform is needed. Improvements in coverage, quality and affordability should lead to greater acceptance of schooling at all levels of society and provide a greater incentive for parents and children alike to participate more fully in the system. Moreover, in cases of severe economic hardship and forced or harmful labour, practical assistance with subsidies and scholarships should be considered to remove children from such work.

The World of Child Labor Hugh D. Hindman, 2009 This definitive resource details both the current and historical state of child labor in each region of the world, focusing on its causes, consequences, and cures. Including contributions by an international team of leading child labor scholars, researchers, policy-makers, and activists, as well as a wealth of current statistical data, it is the most comprehensive reference available on the subject.

Annotated Bibliography on Child Labour, 2003 The aim of this bibliography on child labour was to assemble the best of the rapidly increasing literature and research material in recent years and make it accessible. The focus is from 1995 to

2002 although a few authoritative earlier sources have been included. Three basic selection criteria were applied: the material had to be considered representative; relevant and to present sources that had been previously overlooked.

The Policy Analysis of Child Labor Christiaan Grootaert, Harry Anthony Patrinos, 1999 This work examines the conditions which lead to child labour in four countries, using the findings to recommend a policy approach toward its eradication. Although Bolivia, Colombia, Ivory Coast and the Philippines possess different economic and social settings, data on the determinants of child labour are strikingly consistent. The researchers found that many children's days involve both work and schooling, and they conclude that many of the current policy approaches, such as bans on child labour, are not optimal because they view child work and schooling as mutually exclusive alternatives. Instead, a gradual policy approach in two phases would be more effective. This policy would begin by increasing legal and social protection for working children and adding school time to child work routines. In the second phase, when parents' income constraints have been lessened, the policy would shift the work school combination toward schooling only. Their policy also calls for joint provision of support to home enterprises and enrollment incentives especially for girls.

Learning Or Labouring? Judith Ennew, 1995 Harmonized with UNICEF's efforts to reduce hazardous and exploitative forms of child labor, this compilation of key texts examines the area of child labor and basic education. The articles are organized into four main areas covering ideas, debates, evidence, and case studies. The first part provides some definitions of childhood, work, exploitation and education. The second part provides a review of changes in policy attitudes at an international level and presents some of the classical views in both the compulsory education and fertility debates. The cases of India, China, Java and Nepal are considered. The third part examines cases of children working in rural and urban settings, evidence of the importance of primary education for economic development, the relationship between school and work during childhood, and the different reasons why children may be unable to attend school. The final part of the book presents examples of how basic education for working children has been approached in several parts of the world. Suggestions for further reading and a resource section of relevant books, articles, and other materials that can be obtained from academic sources and international agencies is included. (AA)

Child Labor in the Philippines Rosario Del Rosario, Melinda A. Bonga, 2000 Child labor robs children of their childhood. It

jeopardizes their health and education. It grabs their leisure moments for exploration, discovery and experimentation, so necessary for a promising life. It ensures the perpetuation of poor communities in society. This book contains the stories of child workers and their unfortunate situations. It also assesses the terrain of child labor in the Philippines, and the research and advocacy experiences of those who have spent time to study such a complex, seemingly invisible reality in the 10 years between 1986-1995.
