

Education System Of Thailand

Benjamin Franklin Crowson

Sustainability of Thailand's Competitiveness Patarapong Intarakumnerd, Yveline Lecler, 2010 Competitiveness of a country requires continuous upgrading and, sometimes, major transformation. Thailand is at the crossroad. It can no longer pursue a strategy based on low-cost advantages, but its capability achievements are still too low to become an advanced economy. This book points out weaknesses of Thailand's national innovation system or education and suggests how the country should develop new capabilities to survive and prosper in the globalized and fiercely competitive world. It will be useful to researchers and students who want to learn more about Thailand and emerging countries, and also to policy-makers and executives involved in economic and industrial development. Benefit Incidence Analysis on Thailand Mohammad Rezaul Karim, 2013-04-25 Essay from the year 2013 in the subject Economics - Case Scenarios, grade: none, , course: PhD, language: English, abstract: Abstract: To reduce inequality in income distribution and reduce the poverty social welfare spending in Thailand particularly on education and health services is regarded as one of the effective instruments. Policy makers agree that public subsidies on education and health produce positive externalities and have spill over effect in the society. This research is designed to analyse the effects of public spending of education and health on income distribution which examine the pre-expenditure and post-expenditure income

distribution in Thailand. It follows the benefit incidence analysis (BIA) that is a method of computing the distribution of public expenditure across different demographic groups, such as women and men. The procedure involves allocating per unit public subsidies (for example, expenditure per student for the education sector) according to individual utilization rates of public services. This paper aims at examine who are the real beneficiaries from the government expenditure. The study uses the quantitative method where data are used of 2010. From the benefit incidence analysis on the public expenditure on education it seems that education system is pro-poor and health care system are not pro-poor rather pro-rich. The poor people can be benefited more from the primary and secondary education and less benefited from the tertiary education. However, overall expenditure on education is favourable to the poor which proves from the income share of household. In this perspective, The Thai government should emphasize on higher education for poor by providing special loan created only for them and universities should also be adopted the policy so that poor income class people can access the opportunity. Government can increase the charge and fees for private higher education where normally rich households send their children. By doing so, government can earn more and spend for poor people. Regarding the healthcare system, Thai government should emphasize on preventive care than curative from which the whole nation will be benefitted. The programmes should be continued and more expenditure should be added to this. Government should charge tax on private healthcare system that will help collect more money and invest for the poor people. Since rich tends to go to the private hospitals, government will take money from the rich and spend for poor people. This process will minimize the income inequality.

Education in Thailand Gerald W. Fry, 2018-11-01 This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape “the middle income trap” and enhance the quality of its education to ensure its long-term developmental success.

Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

1951 Report on Foreign Educational Systems Benjamin Franklin Crowson, 1951

Education, Economy and Identity Collectif, 2018-07-03 Modern education in Thailand started at the end of the nineteenth century under the impulse of King Chulalongkorn. Many scholars tracing back the evolution from traditional education to a modern education system emphasized the feeling of necessity that motivated this transformation. Wyatt (1969), Mead (2004) and Watson (1982) underlined the need for a modern administration, to handle the Siamese nation-state “as” the Western states, and in that respect, the key role played by education to structure the new Siam and to appear to the eyes of the world as civilized (Peleggi 2002). The shaping of a new education took place amidst strong political struggles. Siam needed to stand firm within the regional arena, swept by the winds of Western colonialism. Internally, King Chulalongkorn had to legitimize his power and to unify the kingdom by integrating satellite kingdoms into a wider space, the Siamese nation state. Education was vital for this mission as it would contribute not only to bringing state power into the provinces through state-paid teachers and government officials, but also to transmitting a whole nation-related imagery to the young generations. Giving rise to Thai-ness among the populations located at the margins of the kingdom was a

tremendous ordeal. In the Southern part of the kingdom, population was mainly Muslim, spoke Malay and felt culturally closer to the Malay state (Dulyakasem 1991). In the Northern part, incorporating the Lanna kingdom and hill tribe populations into Siam proved not to be easy. Ideological, social and national values were introduced into education delivered to students, and with the implementation of the Compulsory Education Act of 1921, school attendance tied children and parents to the nation state and made them liable to it.
