## Joe Karaganis

*Shadow Libraries* Joe Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Discrimination, Copyright and Equality Paul Harpur, 2017-04-03 While equality laws operate to enable access to information, these laws have limited power over the overriding impact of market forces and copyright laws that focus on restricting access to information. Technology now creates opportunities for everyone in the world, regardless of their abilities or disabilities, to be able to access the written word – yet the print disabled are denied reading equality, and have their access to information limited by laws protecting the mainstream use and consumption of information. The Convention on the Rights of Persons with Disabilities and the World Intellectual Property Organization's Marrakesh Treaty have swept in

a new legal paradigm. This book contributes to disability rights scholarship, and builds on ideas of digital equality and rights to access in its analysis of domestic disability anti-discrimination, civil rights, human rights, constitutional rights, copyright and other equality measures that promote and hinder reading equality.

**Digital Analytics Applications for Sustainable Training and Education** Kiran Sood, Prateek Kalia, Simon Grima, Aryan Chaudhary, 2024-11-01 Digital analytics is an emerging new trend used in education to measure, collect, analyze, and report on data about learners and their contexts and to understand and optimize learning and learning environments. Taking into consideration the UN's Sustainable Development Goal 4, which aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all, this new book looks at digital technologies as a means to foster sustainable educational innovations for improving the teaching, learning, and assessment from K-12 to higher education. It demonstrates how artificial intelligence, deep learning, cloud computing, big data, and machine learning can be used to assess, evaluate, record, and predict student progress, participation, performance, personalization, and empowerment in academic and curricular activities.

**Open-Source Horizons - Challenges and Opportunities for Collaboration and Innovation** Laura M. Castro, 2024-05-29 Open-Source Horizons - Challenges and Opportunities for Collaboration and Innovation dives into the world of open-source research and collaboration, exploring its impact beyond software development. This book brings together a range of voices to examine the exciting potential and ongoing challenges. You can read along to explore how open-source fosters innovation, empowers individuals and ensures wider access to knowledge. Readers will encounter discussions on critical issues like public transparency or data privacy and ownership, along with the role of open-source in the new age of artificial intelligence. By examining these challenges, this text highlights remarkable opportunities for progress enabled by the open-source philosophy. This book aims, thus, to inspire and inform anyone interested in everything that surrounds this movement, from developers to designers and curious minds alike.

Duchamp Is My Lawyer Kenneth Goldsmith, 2020-07-28 In 1996, during the relatively early days of the web, Kenneth Goldsmith created UbuWeb to post hard-to-find works of concrete poetry. What started out as a site to share works from a relatively obscure literary movement grew into an essential archive of twentieth- and twenty-first-century avant-garde and experimental literature, film, and music. Visitors around the world now have access to both obscure and canonical works, from artists such as Kara Walker, Yoko Ono, Pauline Oliveros, Samuel Beckett, Marcel Duchamp, Cecil Taylor, Glenn Ligon, William Burroughs, and Jean-Luc Godard. In Duchamp Is My Lawyer, Goldsmith tells the history of UbuWeb, explaining the motivations behind its creation and how artistic works are archived, consumed, and distributed online. Based on his own experiences and interviews with a variety of experts, Goldsmith describes how the site navigates issues of copyright and the ways that UbuWeb challenges familiar configurations and histories of the avant-garde. The book also portrays the growth of

other “shadow libraries” and includes a section on the artists whose works reflect the aims, aesthetics, and ethos of UbuWeb. Goldsmith concludes by contrasting UbuWeb’s commitment to the free-culture movement and giving access to a wide range of artistic works with today’s gatekeepers of algorithmic culture, such as Netflix, Amazon, and Spotify.
