Visions and Ideas of Europe during the First World War Matthew D'Auria, Jan Vermeiren, 2019-08-02 Given the destruction and suffering caused by more than four years of industrialised warfare and economic hardship, scholars have tended to focus on the nationalism and hatred in the belligerent countries, holding that it led to a fundamental rupture of any sense of European commonality and unity. It is the central aim of this volume to correct this view and to highlight that many observers saw the conflict as a 'European civil war', and to discuss what this meant for discourses about Europe. Bringing together a remarkable range of compelling and highly original topics, this collection explores notions, images, and ideas of Europe in the midst of catastrophe.

The First Global War William Nester, 2000-02-28 Explores the North American campaigns in relation to events elsewhere in the world, from the ministries of Whitehall and Versailles to the land and sea battles in Europe, Africa, South Asia, and the Caribbean.

The CIA and the Marshall Plan Sallie Pisani,1991 Pisani shows how the U. S. added a Cold War Corollary to the principle of self-determination: massive foreign aid and nonmilitary covert operations to reshape war-torn Europe in the image of the U. S. She tells, for the first time, the story of the top CIA operatives who were instrumental in developing the non-military covert intervention policies of the early Cold War years and the Office of Policy Coordination that carried them out.

Sixty Years of Science at UNESCO 1945-2005 ,2006 The scientific mandate of the United Nations educational, Scientific and Cultural Organization (UNESCO) linked, from the outset, science with people, peace, societal benefits and the environment. Among others, it has also helped create numerous institutes, publications and non-governmental organizations to bring together the scientific world. This publication offers an inside perspective on the past six decades of this engagement. The volume traces through six parts the role played by UNESCO in the history of international science cooperation in an ever-changing world: I. Setting the Scene, 1945-1965; II. Basic Sciences and Engineering; III. Environmental Sciences; IV. Science and Society; V. Overviews and Analyses; and VI. Looking Ahead. It also features a list of chronological milestones set along the way.--Publisher's description.

The Origins of Totalitarianism Hannah Arendt,2004 In [this book, the author] provide[s] a historical account of the forces that crystallized into totalitarianism: The ebb and flow of nineteenth-century anti-Semitism (she deemed the Dreyfus Affair a dress rehearsal for the Final Solution) and the rise of European imperialism, accompanied by the invention of racism as the only possible rationalization for it. For [the author,] totalitarianism was a form of governance that eliminated the very possibility of political action. Totalitarian leaders attract both mobs and elites, take advantage of the unthinkability of their atrocities, target objective enemies (classes of people who are liquidated simply because of their group membership), use

terror to create total loyalty, rely on concentration camps, and are obsessive in their pursuit of global primacy. But even more presciently, [she] understood that totalitarian solutions could well survive the demise of totalitarian regimes.-Dust jacket.
