The answers contain explanations from Tafsir of 'Ibn Khathir', related 'aahadhees', 'the lessons to be learnt', according to the requirement of the Quranic verses selected.

Scientific Development in Islamic Civilization Aijaz Ahmad, 2023-01-01 This book, "Scientific Development in Islamic Civilization" is a humble effort to highlight the scientific research conducted by Islamic scholars of the mediaeval world between the seventh and seventeenth centuries. The Quranic verses and the traditions of the Prophet, dealing with scientific enterprise, have also been analysed and quoted in this work. The works of the majority of Muslim scientists are also discussed in depth. The scientific development during the periods of various ruling dynasties and caliphates is properly mentioned in various chapters. Above all, the goal of writing this book is to make Muslims, in particular, and non-Muslims in general, aware of the glorious past of Islamic civilization, which has been washed out or purposefully ignored in historical texts these days.

The Quran: A New Interpretation M. B. Behbudi, Dr Colin Turner, 2013-09-13 This new rendering of the Holy Quran into the English language is the first of its kind, since it is a combination of translation and exegesis in which the author 'opens out' the verses of the Holy Book to reveal some of the layers of meaning expounded by the Prophet and transmitted through the ages by the Prophet's companions, family and the scholars who followed them. The fruit of over thirty years of research into the principles of Quranic exegesis and hadith analysis, this work matches a depth of Arabic and Islamic learning with a mastery of English that is lucid and accessible while preserving the integrity of the original text.

The Sacred Paths Theodore M. Ludwig, 2001 For courses in Religions of the World, History of Religions, Comparative Religion, and Introduction to Religious Studies in departments of Religion, Religious Studies, Theology, and Philosophy. Unique in approach, this text combines an historical-descriptive presentation of individual religions with a comparative-thematic approach. It begins with a discussion of the basic human questions and concerns relating to religion e.g., origin and identity, ultimate reality, human nature, and the good life and then uses these essential concepts to help describe the beliefs, practices, and historical development of each religion. As the work of a single scholar much of it based on original research this book offers a consistency and depth missing in many of the texts in this field.

The Sacred Paths of the West Theodore M. Ludwig, 1994 This text combines study of the dynamic historical development of each religious tradition with a comparative thematic structure. Students are encouraged to discover and explore the nature of religious experience by comparing basic themes and issues common to all religions, finding connections with their own personal experiences. By sensitively introducing descriptive material within a comparative thematic structure, this text helps students to understand how each religion provides, for its adherents, patterns and meanings that make up a full way of life (from Amazon).
