**Misfit** Amanda Goff, 2025-03-04 Amanda Goff was a successful journalist in London and Sydney before ditching her nine-to-five job at the age of 38 to become Samantha X, Australia's most famous escort. A bipolar diagnosis changed everything: she retired from sex work, walked away from Samantha X, and went in search of Amanda. Misfit is her third memoir - but the first written as 'herself'. Raw, honest, provocative, wise and often laugh-out-loud funny, this is an unflinching record of her journey along the bumpy path to healing and self-acceptance. Beyond confronting her bipolar disorder and addiction issues, Amanda must also contend with prejudice and judgement, lingering trauma from her earlier life, and her own crushing self-doubt. As she struggles with the realities of so-called normality, the persistent voice of Samantha X is there to remind her of a former life that offered power, money, fame - and protection from the challenges that Amanda has courageously chosen to tackle head-on.

***Feminism in the Wild*** Ambika Kamath, Melina Packer, 2025-03-11 How dominant culture—from sexism and homophobia to racism, capitalism, ableism, and more—has limited the science of animal behavior, and how we can free ourselves from these limited perspectives. In *Feminism in the Wild*, Ambika Kamath and Melina Packer reveal how scientists studying animal behavior have long projected human norms and values onto animals while seeking to understand them. When scientific studies conclude that these norms and values are natural in animals, it makes it easier to think of them as natural in humans too. And because scientists, historically and to this day, largely belong to elite, powerful segments of society, the norms and values embedded in animal behavior science match those of the already powerful. How can animal behavior science escape this trap of naturalizing dominant culture? Drawing from decades of feminist, antiracist, queer, disability justice, and Marxist contributions—including those of biologists—Kamath and Packer break down persistent assumptions in the status quo of animal behavior science and offer a multitude of alternative approaches. Core concepts in animal behavior science and evolutionary biology—from sex categories and sexual selection to fitness, adaptation, biological determinism, and more—are carefully contextualized and critically reexamined. This unique collaboration between an animal behavior scientist and a feminist science studies scholar is an illuminating and hopeful read for anyone who is curious about how animals behave, and anyone who wants to break free from scientific approaches that perpetuate systems of oppression.

**Grease Monkey Jive** Ainslie Paton,2012-11-01 Their journey is a really sweet and romantic one with a lot of depth and a great supporting cast, too - USA Today - Happily Ever After Blog A romance about changing the game, finding the truth, and fancy footwork. When ballroom teacher Alex Gibson dances with Dan Maddox she's reminded of the time she stuck a knife in the toaster, gave herself an electric shock, and saw stars. He's precisely the type of man Alex's mother warned her off - a player, like the father who abandoned her. Dan Maddox comes from a long line of men who were hiding under the hood of a beat-up car when the 'successful relationship' gene was given out, but he was first in the queue for an extra jolt of chick-pulling power. The chicks in Dan's life are universally gorgeous, random, and disposable, until one drunken night when he picks the wrong girl, hurts a good friend, and realises that unless he does something to change, he'll end up like his violent, unstable father. It's Pimp My Ride meets Dancing With The Stars as Alex and Dan come together to compete in a ballroom dancing competition that changes the way they both feel about relationships and love.
