Engaging in Action Research Jim Parsons, Kurtis Hewson, Lorna Adrian, Nicole Day, 2013-09-03 You don't need a tweed jacket to be a researcher — in thousands of schools across North America, practising teachers conduct studies on best practices, alternative approaches, and effective learning strategies. Classroom teachers have experiences and opportunities unavailable to researchers in a university setting, and action research — site-based, teacher-conducted research — can have a valuable impact on the educational community. Yet many teachers don't see their work as real research, and many other teachers have great ideas for research projects but don't know where to begin. For these teachers, *Engaging in Action Research* demystifies the world of educational research and provides support, guidance, and encouragement. From creating a research plan to reporting findings, this book provides step-by-step instructions to help teachers conduct research projects in the classroom, using strategies that work. Introduction to Critical Reflection and Action for Teacher Researchers Bernie Sullivan, Máirín Glenn, Mary Roche, Caitriona McDonagh, 2016-04-28 Introduction to Critical Reflection and Action for Teacher Researchers provides crucial direction for educators looking to improve their teaching and maximise learning. While many students can grasp the basic elements of researching their practice and can write about practitioner research, some need guidance and assistance to reflect meaningfully on their teaching practice so as to articulate their educational values. This book provides this guidance. By exploring how to engage in an authentic, practical and personalised framework, the book encourages critical reflection and action on educational practice. Moving through the process of reflecting on practice, engaging in critical thinking and planning and taking action, it helps the reader to subsequently generate educational theory from their own personal learning. Examples from the authors' experiences illustrate the issues raised in each section, with 'Pause and Reflect' activities, guidelines for conducting a research project and annotated further reading available for every chapter. Introduction to Critical Reflection and Action for Teacher Researchers is based on the idea that reflection is in itself a deliberate action and something we must live - it is key to understanding our practice and is a core component of action research. This book is a valuable guide for teachers, trainee teachers and researchers interested in reflecting on and enhancing their teaching practice.

*Workshops on Action Research* Kay Cheng Soh, 2006

*The Elements of Inquiry* Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 The Elements of Inquiry covers the basic guidelines for graduate students doing an investigation or inquiry project. It distils the rubrics necessary for teaching research methods and completing research projects, and gives the student researcher a list of steps to follow to complete any type of inquiry project - including formal research projects such as doctoral dissertations. It was written to support the work of students in an educational leadership doctoral program, but it will also assist the research efforts of college students at any level in any discipline. The book begins by establishing the underlying philosophical concepts upon which all good

research is based, preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others. Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research. Numerous practical examples illustrate the steps in the research process presented in the text. There are end-of-chapter exercises for students to apply the concepts discussed in the chapter. Templates for organizing and presenting research provide students with a game plan for success with their research. The book ends with an up-to-date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics. While most research books detail one or more method in depth, this text provides a broad introduction to many techniques and models used in doctoral dissertations, and will be of particular value to those who are consumers of inquiry studies and research reports. Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research.

*The Role of Research in Teachers' Work* Lesley Scanlon, 2018-01-29 In the debate regarding what constitutes teachers' work, academics and bureaucrats continue to speak for teachers, with teachers' voices rarely heard and not accorded equal recognition. *The Role of Research in Teachers' Work* addresses this imbalance by privileging teachers' voices as they narrate their experiences of engaging in systematic inquiry. The book embeds the teacher narratives within the scholarly debates

about the nature of knowledge and the nature of professional practice. Scanlon examines the knowledge teachers create through their research and how that knowledge is perceived by others within the school community. This book can be read as a companion volume to Scanlon's 2015 Routledge publication *My School*, or as a standalone exploration of teachers' own narratives of engaging in action research. Together, these two books are unique in contemporary writing on schools, representing one of the only comprehensive longitudinal studies of a low socioeconomic secondary school from the perspective of those who learn and teach therein. This book enables teachers to be part of the scholarly conversation about their work and the place of research in that work. As such, it should be essential reading for academics, teacher educators and postgraduates in the field of education. It should also be of interest to policymakers and teachers.

**Research, Action, and Change** James M. Frabutt, Anthony C. Holter, Ronald James Nuzzi, 2008 An introduction to action research in Catholic schools through the specific lens of community and spirituality, including original research from Catholic school leaders--Provided by publisher.
